Washington 6, D. C.

Reviewers praise
MACMILLAN STATISTICS TEXTS...

*"A real contribution to the pedagogy of statistics."
—Reader's report*

STATISTICAL THEORY

By B. W. Lindgren, Institute of Technology, University of Minnesota

This outstanding text for a one-year course in statistical theory or mathematical statistics offers a thorough explanation of the modern theory of statistics based on a firm calculus foundation. The book includes comprehensive coverage of sufficiency, minimal sufficiency, exponential families, Cramer-Rao inequality and efficiency, decision theory, Bayes procedures, and Fisher-Yates and vanderWaerdan comparison tests.

April, 448 pp., \$7.95

*"This is an excellent book, consistent in content and development."
—J. B. HASSLER, University of Nebraska, in *Journal of Farm Economics**

INTRODUCTION TO MATHEMATICAL STATISTICS

By Robert V. Hogg and Allen T. Craig; both, State University of Iowa
The Allenoerfer Advanced Series

This text introduces fundamental concepts in probability and statistics, demonstrating their interrelations wherever possible. Among the topics featured are: probability distributions, sampling distribution theory, point and interval estimation, distribution-free problems, and correlation.

1959, 245 pp., \$6.75

"The only purpose of another book on elementary statistics is either a clearer exposition of the subject or the incorporation of newer subject matter. This book passes on both criteria with flying colors."

*—ABRAHAM J. BERMAN, in *The Statistical News**

INTRODUCTION TO PROBABILITY AND STATISTICS

By B. W. Lindgren and G. W. McElrath, Institute of Technology,
University of Minnesota

This comprehensive text provides many classical and modern statistical methods based on a preliminary, thorough treatment of probability theory. Numerous problems and illustrations, as well as such current techniques as non-parametric tests, are included.

1959, 277 pp., \$6.25

HANDBOOK OF STATISTICAL TABLES

By DONALD B. OWEN, *Sandia Corporation*

Offers an unusually complete collection of tables of functions used in statistics. Extremely helpful to statisticians, quality control and industrial engineers. Some 100 different tables are included.

c. 576 pp, 1962—\$10.00

MATHEMATICAL PROGRAMMING

By S. VAJDA, *British Admiralty Research Laboratory, Teddington*

This well-organized book offers a large number of fine worked-out examples and problems. Early chapters offer an exhaustive treatment of the theoretical foundations, always with the use of fairly elementary mathematics. Later chapters guide the reader to the rapidly expanding frontiers of the subject.

310 pp, 77 illus, 1961—\$8.50

INDEX OF MATHEMATICAL TABLES—Second Edition

By A. FLETCHER AND J. C. P. MILLER, L. ROSENHEAD AND L. J. COMRIE, *Scientific Computing Service, Ltd.*

Indexes the contents of all important mathematical tables published since Briggs' *Logarithmorum Chilias Prima* (1617). Some previously unpublished tables included.

2 Vols. Dec. 1961—approx. \$42.00

INTERNATIONAL JOURNAL OF ABSTRACTS STATISTICAL THEORY AND METHOD

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give complete coverage of published papers in the field of statistical theory (including associated aspects of probability and other mathematical methods) and new published contributions to statistical method.

All contributions in the following five journals—being wholly devoted to this field—are abstracted: *Annals of Mathematical Statistics*; *Biometrika*; *Journal, Royal Statistical Society (Series B)*; *Bulletin of Mathematical Statistics*; *Annals, Institute of Statistical Mathematics*; and a further group of six journals are abstracted on a virtually complete basis as follows: *Biometrics*; *Metrika*; *Metron*; *Review, International Statistical Institute*; *Technometrics*; *Sankhyā*. There are about 250 other journals partly devoted to statistical theory and method from which the appropriate papers are abstracted.

The abstracts are about 400 words long—the recommendation of UNESCO for the “long” abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) are given in detail to facilitate contact in order to obtain further detail or request an off-print. The journal is published quarterly and contains approximately 1000 abstracts per year.

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. A unique aspect of this journal is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

Annual Subscription £5 (U.S.A. and Canada \$16.00)
Single Number 30s. (U.S.A. and Canada \$4.50)

SANKHYĀ

The Indian Journal of Statistics

Contents of Series A, Vol. 23—Part 4

The transformation of a distribution under selection.....	D. J. Finney
Analysis of errors in censuses and surveys with special reference to experience in India P. C. Mahalanobis and D. B. Lahiri	
On confidence interval for two-means problem based on separate estimates of variances and tabulated values of t table.....	Saibal Banerjee
Some limit theorems for joint distributions.....	J. Sethuraman
Best one-sided bounds for infinitely divisible random variables.....	Howard G. Tucker
Techebycheff type inequalities in terms of the mean deviation.....	Gerald J. Glasser
A note on functional minimality of sufficient statistics.....	Edward W. Barankin
Minimax solution for trichotomies.....	L. L. Lasman
Use of order-statistics in sampling without replacement.....	P. K. Pathak
On the evaluation of moments of the discrete units of a sample.....	P. K. Pathak
Moments of first order autocorrelation of the second order autoregressive scheme.....	Sukumar Mukherjee

The subscription price per volume for each of the series is: USA and Canada: \$10.00; Other Countries: £3.
The subscription price per volume for both the series taken together is: USA and Canada: \$18.00; Other Countries: £5-6s.

Subscription is payable in advance to:

The Secretary, Statistical Publishing Society,
204/1 Barrackpore Trunk Road,
Calcutta-35, India.

TECHNOMETRICS

A Journal of Statistics
for the Physical, Chemical and Engineering Sciences

CONTENTS

TECHNOMETRICS, Vol. 4. No. 1, February, 1962

Probability Plots for the Gamma Distribution *M. B. Wilk, R. Gnanadesikan and Miss M. J. Hsuett*; Symmetrical and Asymmetrical Fractional Factorial Plans *Sidney Addelman*; Orthogonal Main-effect Plans for Asymmetrical Factorial Experiments *Sidney Addelman*; Cumulative Sum Schemes Using Gauging *E. S. Page*; Estimation of Sample Size *N. L. Johnson*; On Certain Redundant Systems which Operate at Discrete Times *George Weias*; Some Acceptance Sampling Plans Based on the Theory of Runs *R. R. Prarie, W. J. Zimmer and J. K. Brookhouse*; Parameter-free and Non-parametric Tolerance Limits: The Exponential Case *Leo A. Goodman and Albert Madansky*; Systematic Errors in Physical Constants *W. J. Youden*; Notes: An Analogue of Techebycheff's Inequality in Terms of the Range *G. A. Barnard*; An Upper Bound for the Sample Standard Deviation *H. E. Guterman*; On the Calculation of Certain Constrained Maxima *Wen M. Chow*; Distribution of Radial Error in the Bivariate Elliptical Normal Distribution *Victor Chew & Ray Boyce*; Book Reviews *G. A. Dodson, Preston C. Hammer, Paul S. Olmstead*; Statistical Programs for High Speed Computers; Notices.

Technometrics is published quarterly in February, May, August, and November. To members of the American Statistical Association and the American Society for Quality Control the rate is \$6.00. The annual non-member subscription rate is \$8.00. Checks should be made payable to *Technometrics* and addressed to *Technometrics*, Post Office Box 587, Benjamin Franklin Station, Washington 6, D. C.

LIST OF MEMBERS OF THE ECONOMETRIC SOCIETY

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

A. H. Bowker, Department of Statistics, Stanford University, Stanford, California

President-Elect:

T. W. Anderson, Department of Mathematical Statistics, Columbia University, New York 27, New York

Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Treasurer:

Gerald Lieberman, Institute of Mathematical Statistics, Sequoia Hall, Stanford University, Stanford, California

Editor:

J. L. Hodges, Jr., Department of Statistics, University of California, Berkeley 4, California

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$10.00 per year for residents of the United States or Canada and \$5.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

Membership in the Institute of Mathematical Statistics is not required of authors of papers in the *Annals of Mathematical Statistics*, and the fact of membership or non-membership is given no weight in the consideration of submitted manuscripts.

Contents (Continued)

Asymptotic Shapes of Bayes Sequential Testing Regions . . GIDEON SCHWARZ 224

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

**EASTERN REGIONAL MEETING—
Chapel Hill, North Carolina, April 12-14, 1962**

**WESTERN REGIONAL MEETING—Albuquerque, New Mexico,
April 19-20, 1962**

**EUROPEAN REGIONAL MEETING—
Dublin, Ireland, September 3-5, 1962**

ANNUAL MEETING—Minneapolis, Minnesota, September 7-10, 1962

Abstracts should be submitted in duplicate to the Editor, on abstract blanks which can be found in the back of every *Annals*, beginning with the March 1961 issue, or can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if introduced by members. Abstracts must follow the stylistic requests on the abstract blank, or they may be returned.
