

# THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## Contents

	PAGE
An Approach to Time Series Analysis . . . . .	EMANUEL PARZEN 951
Some Model I Problems of Selection . . . . .	E. L. LEHMANN 990
Bayes Rules for a Common Multiple Comparisons Problem and Related Student- <i>t</i> Problems . . . . .	DAVID B. DUNCAN 1013
The Use of Least Favorable Distributions in Testing Composite Hypotheses . . . . .	H. E. REINHARDT 1034
Asymptotic Efficiency in Polynomial Estimation . . . . .	PAUL G. HOEL 1042
Maximum Likelihood Estimation of a Linear Functional Relationship	
	C. VILLEGAS 1048
Sequential $\chi^2$ - and $T^2$ -Tests . . J. EDWARD JACKSON AND RALPH A. BRADLEY	1063
Estimating the Parameters of Negative Exponential Populations from One or Two Order Statistics . . . . .	H. LEON HARTER 1078
On the Two Sample Problem: A Heuristic Method for Constructing Tests	
	V. P. GODAMBE 1091
A Nonparametric Test for the Problem of Several Samples.	
	V. P. BHAPKAR 1108
Distribution of the Anderson-Darling Statistic . . . . .	PETER A. W. LEWIS 1118
Errors in Discrimination . . . . .	S. JOHN 1125
On the Monotonic Character of the Power Functions of Two Multivariate Tests . . . . .	S. N. ROY AND W. F. MIKHAIL 1145
The Moments of Elementary Symmetric Functions of the Roots of a Matrix in Multivariate Analysis . . . . .	TITO A. MIJARES 1152
Variance Components in the Unbalanced 2-Way Nested Classification	
	S. R. SEARLE 1161
Some Main-Effect Plans and Orthogonal Arrays of Strength Two	
	SIDNEY ADDELMAN AND OSCAR KEMPTHORNE 1167
On A Geometrical Method of Construction of Partially Balanced Designs with Two Associate Classes . . . . .	ESTHER SEIDEN 1177
On Some Methods of Construction of Partially Balanced Arrays	
	I. M. CHAKRAVARTI 1181
Some Further Designs of Type O:PP . . . . .	G. H. FREEMAN 1186
Sufficiency in the Undominated Case . . . . .	D. L. BURKHOLDER 1191

(Continued on back cover)

Vol. 32, No. 4 — December, 1961

# THE ANNALS OF MATHEMATICAL STATISTICS

**Subscription Rates.** Current issues are \$15 per volume (four issues of one calendar year) in the U. S. and Canada, \$12 per volume elsewhere. Single issues are \$4. Back numbers for all issues up to and including 1956 (Vol. XXVII) are \$12 per volume, \$3.50 per issue; issues from 1957 on are \$15 per volume, \$4 per issue; for complete sets, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volumes I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues, membership, changes of address, etc.**, should be addressed to Gerald Lieberman, Treasurer, Institute of Mathematical Statistics, Department of Statistics, Stanford University, Stanford, Calif.

**Editorial Office,** Department of Statistics, University of California, Berkeley 4, California. J. L. Hodges, Jr. Editor. (See note on next page about change of Editor.)

**Preparation of manuscripts.** Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\overline{\log x}$ ) and underlined letters (e.g.,  $\underline{x}$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the

solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

---

Mail to the *Annals of Mathematical Statistics* should be addressed to either the Editor or the Treasurer, as described above. It should *not* be addressed to Waverly Press.

---

COMPOSED AND PRINTED AT THE  
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.

Second-class postage paid at Baltimore, Maryland

*By action of the Council of the Institute of Mathematical Statistics, the 1961 volume of the Annals of Mathematical Statistics is respectfully dedicated to*

**HARRY C. CARVER,**

*founder of the Annals of Mathematical Statistics, on the occasion of his retirement from the Department of Mathematics of the University of Michigan, and in recognition of his contributions to the development of mathematical statistics.*

*Harry C. Carver*
