

The first two volumes in the *Statistical Research Monographs* series sponsored by the Institute of Mathematical Statistics and by the University of Chicago

The Passage Problem for a Stationary Markov Chain

By J. H. B. Kemperman. Presents systematically a number of methods useful in studying the problems of first passage and absorption in a Markov chain; in particular, methods for obtaining exact formulae for the probabilities under consideration or their moments. Numerous illustrations show adequately how each method serves as a natural tool for handling a large number of practical problems. **\$5.00**

Statistical Inference for Markov Processes

By Patrick Billingsley. A general mathematical theory for the statistical problems of determining whether Markov models fit empirical data and of estimating any parameters upon which the models may depend. The applications which illustrate the mathematical results make the book useful to workers in the applied fields as well as to mathematicians, statisticians, and graduate students in statistics. **\$4.00**

ADVERTISING IN THE ANNALS of MATHEMATICAL STATISTICS

ADVERTISEMENTS for books, recruitment of professional personnel, etc., may now be placed in the *Annals of Mathematical Statistics*. Only full-page and half-page advertisements will be accepted. For details about costs, deadlines, sizes, and so on, please write to

**Mr. Edgar M. Bisgyer
Advertising Manager
American Statistical Assn.
1757 K Street, N.W.
Washington 6, D. C.**

Modern Factor Analysis

by Harry H. Harman. Designed to serve the interests of graduate students and researchers in statistics, psychology, and related disciplines, this study presents an accurate, up-to-date account of factor analysis from its basic foundations through the latest and most advanced methods, including the use of high-speed electronic computers. 480 pages. 1960.

\$10.00

An Introduction to the Theory of Experimental Design

by D. J. Finney. A book for the mathematician, statistician, and mathematically oriented scientist. In emphasizing that the success of an experiment depends primarily on the choice of design, this manual offers a comprehensive survey of the principles, problems, and both classical and newly discovered techniques of experimental design. 232 pages, index. 1960.

\$7.00

Experimental Design and its Statistical Basis

by D. J. Finney. This volume introduces experimental design as it pertains to biological research—with methods by which the experimentalist can select and construct designs for particular objectives. 169 pages, tables and figures. 1955. 2d printing now ready. \$4.5

Important **ADDISON-WESLEY** *books*

MATHEMATICAL PROGRAMMING

BY S. VAJDA, *British Admiralty Research Laboratory*

An introduction to linear and nonlinear programming, with emphasis on the mathematical aspects of the subject. Designed for use as a textbook on the graduate level, or as a reference work for those in mathematics and statistics, operations research, and management science.

The earlier chapters of the book offer an exhaustive treatment of the theoretical foundations, always subject to the rule that only fairly elementary mathematics be used. In the latter part of the book, general and special algorithms, applications, and recent developments such as nonlinear, discrete, stochastic, and dynamic programming are considered.

c. 350 pp, 77 illus, ready July—probably \$9.00

MATHEMATICAL METHODS AND THEORY IN GAMES, PROGRAMMING, AND ECONOMICS

BY SAMUEL KARLIN, *Stanford University*

"The two volumes of this book will for some time to come be the definitive work on the subject. The exposition is lucid without verbosity and the amount of material included is impressive. The explanatory notes and bibliographical references make the book an excellent starting point for research in the field." J. Gillis, *PHYSICS TODAY*

two volumes—each \$10.75

AND COMING FALL 1961

HANDBOOK OF STATISTICAL TABLES

BY DONALD B. OWEN, *Sandia Corporation*

A collection of statistical tables intended for: the student; the practicing statistician, quality control man, or industrial engineer; and the research worker. Many tables were computed on the IBM-704, IBM-610, or CDC-160 digital computers.

MATHEMATICAL REVIEWS

A Journal Containing

REVIEWS OF MATHEMATICAL LITERATURE

of the Entire World

With full Subject and Author Indices

Pure and Applied

This journal is an indispensable tool for all those who need to keep up with new research in pure and applied mathematics. Includes extensive coverage of

PROBABILITY and STATISTICS
STOCHASTIC PROCESSES & TIME SERIES
THEORY OF STATISTICAL INFERENCE
SAMPLING TECHNIQUES
ANALYTICAL PROBABILITY THEORY

Subscriptions are accepted to cover the calendar year only

Issues appear monthly.....

\$50 per year.....

\$16 to members of the American Mathematical Society.....

SANKHYĀ

The Indian Journal of Statistics
Edited by P. C. Mahalanobis

Contents of Series B, Vol. 23—Parts 1 2 & 3.

Foreword.....	P. C. Mahalanobis
Statistical control of operational efficiency in rinderpest eradication campaign.....	V. G. Panse, V. N. Amble and T. R. Purj
Factors affecting blood pressure of Indian soldiers.....	N. T. Mathew
A restatement of a simple planning model with some examples from Yugoslav economy.....	Branko Horvat
On a method for estimating cost of arrangements for servicing of tractors and inclusion of this cost in the initial purchase price.....	G. K. Kripalani
Statistical work of the International Labour Organisation.....	Kailas Doctor
National Sample Survey: Number Fourteen: Some characteristics of the economically active population.....	
Contents of Series B, Vol. 23—Part 4.	
Survival rates of the Indian Carp (Catla, catla, Labeo rohita, Cirrhina mrigala) from first to fourth week of life under different experimental treatments.....	B. C. Das and H. Krishnamurthy
Survival rates of Indian Carp (Catla, catla, Labeo rohita, Cirrhina mrigala) from first to fourth week of life under experimental treatments isolating Vitamin B ₁₂ from Vitamin B Complex.....	B. C. Das and H. Krishnamurthy
A note on the amount of rejection in Lahiri's method of pps sampling.....	Ajit Haldar
National Sample Survey: Number Twenty-two: The sample survey of manufacturing industries: 1952.....	

ANNUAL SUBSCRIPTION: 30 rupees (\$10.00), 10 rupees (\$3.50) per issue.

BACK NUMBERS: 45 rupees (\$15.00) per volume; 12/8 rupees (\$4.50) per issue.

Subscriptions and orders for back numbers should be sent to

TECHNOMETRICS

A Journal of Statistics
for the Physical, Chemical and Engineering Sciences

CONTENTS

TECHNOMETRICS, Vol. 2. No. 4, November, 1960

Conclusions vs Decisions *J. W. Tukey*, Statistical Life Test Acceptance Procedures *Benjamin Epstein*, Estimation from Life Test Data *Benjamin Epstein*, Some New Three Level Designs for the Study of Quantitative Variables *G. E. P. Box and D. W. Behnken*, Graphical Procedure for Fitting the Best Line to a Set of Points *J. L. Dolby*, Tables of Tolerance-Limit Factors for Normal Distributions *Alfred Weissberg and Glenn H. Beatty*, On the Evaluation of the Negative Binomial Distribution with Examples *G. P. Patil*, On Methods of Constructing Sets of Mutually Orthogonal Latin Squares Using a Computer *R. C. Bose*, *I. M. Chakravarti and D. E. Knuth*, Book Reviews *A. P. Dempster and H. F. Dodge*, Notices

CONTENTS

TECHNOMETRICS, Vol. 3, No. 1, February, 1961

Cumulative Sum Charts *E. S. Page*, Average Run Lengths in Cumulative Chart Quality Control Schemes *P. L. Goldsmith and H. Whitfield*, Prediction Regions for Several Predictions from a Single Regression Line *Gerald J. Lieberman*, The Robustness of Certain Life Testing Procedures Derived from the Exponential Distribution *Marvin Zelen and Mary C. Dannemiller*, An Application of a Balanced Incomplete Block Design *Peter W. M. John*, Multi-component Systems and Structures and Their Reliability *Z. W. Birnbaum, J. D. Esary and S. C. Saunders*, An Asymptotic Distribution for an Occupancy Problem with Statistical Applications *M. Halperin and G. L. Burrows*, Outliers in Patterned Experiments: A Strategic Appraisal *Irwin D. J. Bross*, Book Reviews *Acheson J. Duncan and William Beranek*, Statistical Programs for High Speed Computers, Notices

Technometrics is published quarterly in February, May, August, and November. The annual non-member subscription rate is \$8.00. To members of the American Statistical Association and the American Society for Quality Control the rate is \$8.00. Checks should be made payable to *Technometrics* and addressed to *Technometrics*, Post Office Box 587, Benjamin Franklin Station, Washington 6, D. C.

INTERNATIONAL JOURNAL OF ABSTRACTS STATISTICAL THEORY AND METHOD

A Journal of the International Statistical Institute

The aim of this journal of abstracts is to give complete coverage of published papers in the field of statistical theory (including associated aspects of probability and other mathematical methods) and new published contributions to statistical method.

All contributions in the following five journals—being wholly devoted to this field—are abstracted: *Annals of Mathematical Statistics*; *Biometrika*; *Journal, Royal Statistical Society (Series B)*; *Bulletin of Mathematical Statistics*; *Annals, Institute of Statistical Mathematics*; and a further group of six journals are abstracted on a virtually complete basis as follows: *Biometrics*; *Metrika*; *Metron*; *Review, International Statistical Institute*; *Technometrics*; *Sankhyā*. There are about 250 other journals partly devoted to statistical theory and method from which the appropriate papers are abstracted.

The abstracts are about 400 words long—the recommendation of UNESCO for the “long” abstract service: they are in the English language although the original language of the paper is noted on the abstract together with the name of the abstractor. In addition the address of the author(s) are given in detail to facilitate contact in order to obtain further detail or request an off-print. The journal is published quarterly and contains approximately 1000 abstracts per year.

A scheme of classification has been developed for the abstracts that is flexible and facilitates the transfer of code numbers to punched cards. A unique aspect of this journal is that the pages are colour-tinted according to the main sections of classification. This method of colour-coding the pages provides a distinctive and powerful visual aid in the identification of abstracts in whatever manner the journal is filed for reference.

<i>Annual Subscription</i>	£5 (U.S.A. and Canada \$16.00)
<i>Single Number</i>	30s. (U.S.A. and Canada \$4.50)

MEETINGS OF THE INSTITUTE

TENTATIVE SCHEDULE

**EASTERN REGIONAL MEETING—
Ithaca, New York, April 20-22, 1961**

**ANNUAL MEETING—Seattle, Washington
June 14-17, 1961**

Abstracts should be submitted in duplicate to the Editor, preferably on abstract blanks, which can be obtained from the IMS Secretary. Abstracts must be received at least 50 days before the first day of the meeting at which they are to be presented, indicating whether presented by title or in person. (Only one contributed paper may be given in person at any one meeting.) They may be printed prior to the publication of the report of the meeting. Those received by April 30 will appear in the September *Annals*, by July 31 in December, etc. Abstracts should be limited to 200 words or the equivalent, and should avoid displayed expressions and complicated formulae. They can be accepted from non-members of the IMS only if transmitted by members.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS

President:

E. L. Lehmann, Department of Statistics, University of California, Berkeley 4, California

President-Elect:

A. H. Bowker, Department of Statistics, Stanford University, Stanford, California

Secretary:

G. E. Nicholson, Jr., Department of Statistics, University of North Carolina, Chapel Hill, North Carolina

Treasurer:

Gerald Lieberman, Institute of Mathematical Statistics, Sequoia Hall, Stanford University, Stanford, California

Editor:

William Kruskal, Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

Membership dues including a subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$10.00 per year for residents of the United States or Canada and \$5.00 per year for residents of other countries. There are special rates for students and for some other classes of members. Inquiries regarding membership in the Institute should be sent to the Secretary of the Institute.
