

# THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930-1938

EDITED BY S. S. WILKS, 1938-1949

THE OFFICIAL JOURNAL OF THE INSTITUTE  
OF MATHEMATICAL STATISTICS

## Contents

	PAGE
Optimum Designs in Regression Problems . . . . .	J. KIEFER AND J. WOLFOWITZ 271
Some Optimum Weighing Designs . . . . .	DAMARAJU RAGHAVARAO 295
Some Contributions to ANOVA in One or More Dimensions: I S. N. ROY AND R. GNANADESIKAN	304
Some Contributions to ANOVA in One or More Dimensions: II S. N. ROY AND R. GNANADESIKAN	318
Unbiased estimation: Functions of Location and Scale Parameters . . . . .	R. F. TATE 341
An Extension of the Cramér-Rao Inequality . . . . .	JOHN J. GART 367
On the Attainment of Cramér-Rao and Bhattacharyya Bounds for the Variance of an Estimate . . . . .	A. V. FEND 381
The Lagrangian Multiplier Test . . . . .	S. D. SILVEY 389
Intuitive Probability on Finite Sets CHARLES H. KRAFT, JOHN W. PRATT, AND A. SEIDENBERG	408
K-Sample Analogues of the Kolmogorov-Smirnov and Cramér-v. Mises Tests J. KIEFER	420
Asymptotic Expansions for the Smirnov Test and for the Range of Cumulative Sums J. H. B. KEMPERMAN	448
Asymptotic Minimax Character of the Sample Distribution Function for Vector Chance Variables . . . . .	J. KIEFER AND J. WOLFOWITZ 463
Bayes Solutions of the Statistical Inventory Problem . . . . .	HERBERT SCARF 490
A Generalization of the Beta-Distribution . . . . .	J. G. MAULDON 509
Determining Bounds on Integrals with Applications to Cataloging Problems BERNARD HARRIS	521
On a General Concept of "In Probability" . . . . .	JOHN W. PRATT 549
Densities for Stochastic Processes . . . . .	CHARLOTTE T. STRIEBEL 559
The Supremum and Infimum of the Poisson Process . . . . .	RONALD PYKE 568

(Continued on outside back cover)

Vol. 30, No. 2 — June, 1959

# THE ANNALS OF MATHEMATICAL STATISTICS

**Subscription Rates.** Current issues are \$12 per volume (four issues of one calendar year) in the U. S. and Canada, \$10 per volume elsewhere. Single issues are \$3.50. Back numbers are \$12 per volume, \$3.50 per issue, \$200 for the first 25 volumes, \$10 per additional volume purchased at the same time as Volume I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning subscriptions, back numbers, payment of dues, etc., should be addressed to A. H. Bowker, Treasurer, Department of Statistics, Stanford University, Stanford, Calif.

Communications concerning membership, changes of address, etc., should be addressed to George E. Nicholson, Jr., Secretary, Department of Statistics, University of North Carolina, Chapel Hill, N. C. Changes of address which are to become effective for a given issue of the *Annals* should be reported to the Secretary on or before the 10th of the month preceding the month of issue.

**Editorial Office.** Department of Statistics, Eckhart Hall, University of Chicago, Chicago 37, Illinois. William Kruskal, Editor.

**Preparation of manuscripts.** Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ('), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g.,  $\log x$ ) and underlined letters (e.g.,  $x$ ) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus  $(a + b)/(c + d)$  rather than  $\frac{a + b}{c + d}$ .

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Second-class postage paid at Baltimore, Maryland
