THE ANNALS of MATHEMATICAL STATISTICS

FOUNDED AND EDITED BY H. C. CARVER, 1930–1938

EDITED BY S. S. WILKS, 1938–1949

THE OFFICIAL JOURNAL OF THE INSTITUTE OF MATHEMATICAL STATISTICS

Contents

PAGE

Information Theory for Mathematicians ..... J. WOLFOWITZ 351

Some Problems Connected with Statistical Inference ..... D. R. COX 357

Asymptotic Distribution of Stochastic Approximation Procedures ..... JEROME SACKS 373

Admissibility for Estimation with Quadratic Loss ..... SAMUEL KARLIN 406

On the Estimation of Parameters Restricted by Inequalities ..... H. D. BRUNK 437

Intersection Region Confidence Procedures with an Application to the Location of the Maximum in Quadratic Regression ..... DAVID L. WALLACE 455

Exact Probabilities and Asymptotic Relationships for Some Statistics From m-th Order Markov Chains ..... LEO A. GOODMAN 476

Tests of Multiple Independence and the Associated Confidence Bounds ..... S. N. ROY AND R. E. BARGMANN 491

Sequential Tests for Variance Ratios and Components of Variance ..... ALLAN BIRNBAUM 504

Sums of Powers of Independent Random Variables ..... J. M. SHAPIRO 515

The Staircase Design: Theory ..... FRANKLIN A. GRAYBILL AND WILLIAM E. PRUITT 523

A Note on the Fundamental Identity on Sequential Analysis ..... R. R. BAHADUR 534

On the Statistical Treatment of Stochastic Processes ..... ISIDORE FLEISCHER AND ANTHONY KOOHARIAN 544

Some Remarks on Sampling with Replacement ..... DES RAJ AND SALEM H. KHAMIS 550

A Distribution-free Upper Confidence Bound for $\Pr\{Y < X\}$, Based on Independent Samples of X and Y ..... Z. W. BIRNBAUM AND R. C. MCCARTY 558

On the Integrodifferential Equation of Takacs. I ..... EDGAR REICH 563

Notes:

Probabilities of Hypotheses and Information-Statistics in Sampling from Exponential-class Populations ..... MORTON KUPPERMAN 571

On the Distribution of 2 x 2 Random Normal Determinants ..... W. L. NICHOLSON 575

A Smooth Invertibility Theorem ..... J. W. TUKEY 581

On the Inversion of the Sample Covariance Matrix in a Stationary Autoregressive Process ..... M. M. SIDDIQUI 585

A Problem of Berkson, and Minimum Variance Orderly Estimators ..... J. W. TUKEY 588

An Elementary Theorem Concerning Stationary Ergodic Processes ..... LEO BREIMAN 592

A Test of Fit for Multivariate Distributions ..... LIONEL WEISS 595

Tables for Obtaining Non-parametric Tolerance Limits ..... PAUL N. SOMERVILLE 599

(Continued on outside back cover)

Vol. 29, No. 2 — June, 1958

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Mathematical Statistics.* www.jstor.org

THE ANNALS OF MATHEMATICAL STATISTICS

Subscription Rates. Current issues are $12 per volume (four issues of one calendar year) in the U. S. and Canada, $10 per volume elsewhere. Single issues are $3.50. Back numbers are $12 per volume, $3.50 per issue, $200 for the first 25 volumes, $10 per additional volume purchased at the same time as Volume I through XXV.

Rates to members of the Institute of Mathematical Statistics are lower (see inside back cover).

Communications concerning **subscriptions, back numbers, payment of dues,** etc., should be addressed to A. H. Bowker, Treasurer, Department of Statistics, Stanford University, Stanford, Calif.

Communications concerning **membership, changes of address,** etc., should be addressed to George E. Nicholson, Jr., Secretary, Department of Statistics, University of North Carolina, Chapel Hill, N. C. Changes of address which are to become effective for a given issue of the *Annals* should be reported to the Secretary on or before the 10th of the month preceding the month of issue.

Editorial Office. The RAND Corporation, 1700 Main St., Santa Monica, Calif., T. E. Harris, Editor.

Preparation of manuscripts. Manuscripts should be submitted to the editorial office. Each manuscript should be typewritten, double spaced, with wide margins at sides, top, and bottom, and the original should be submitted with one additional copy, on paper that will take corrections. Dittoed or mimeographed papers are acceptable only if completely legible. Footnotes should be reduced to a minimum, and where possible replaced by remarks in the text, or a bibliography at the end of the paper; formulae in footnotes should be avoided. References should follow current *Annals* style, and should be numbered alphabetically according to authors' names.

Figures, charts, and diagrams should be professionally drawn on plain white paper or tracing cloth in black India ink twice the size they are to be printed.

Authors are asked to keep in mind the typographical difficulties of complicated mathematical formulae. The difference between capital and lower-case letters should be clearly shown; care should be taken to avoid confusion between such pairs as zero and the letter O, the numeral 1 and the letter l, numeral 1 used as superscript and prime ($'$), alpha and a, kappa and k, mu and u, nu and v, eta and n, etc. Subscripts or superscripts should be clearly below or above the line. Bars above groups of letters (e.g., $\overline{\log x}$) and underlined letters (e.g., $\underline{x}$) are difficult to print and should be avoided. Symbols are automatically italicized by the printer and should not be underlined on manuscripts. Boldface letters may be indicated by underlining with a wavy line on the manuscript; boldface subscripts and superscripts are not available. Complicated exponentials should be represented with the symbol exp. In writing square roots the fractional exponent is preferable to the radical sign. Fractions *in the body of the text* (as opposed to displayed expressions) and fractions occurring in the numerators or denominators of fractions are preferably written with the solidus; thus $(a + b)/(c + d)$ rather than $\frac{a + b}{c + d}$

Authors will ordinarily receive only galley proofs. Fifty reprints without covers will be furnished free. Additional reprints and covers will be furnished at cost.

Entered as second-class matter at the Post Office at Baltimore, Maryland, under the act of March 3, 1879

COMPOSED AND PRINTED AT THE
WAVERLY PRESS, INC., BALTIMORE, MARYLAND, U. S. A.
