

MATHEMATICAL REVIEWS

A journal containing reviews of the mathematical literature of the world, with full subject and author indices

Publication of this journal is sponsored by the American Mathematical Society, Mathematical Association of America, Institute of Mathematical Statistics, London Mathematical Society, Edinburgh Mathematical Society, Union Matematica Argentina, and others.

Subscriptions accepted to cover the calendar year only.
Issues appear monthly except July. \$20.00 per year.

Send subscription order or request for sample copy to

BIOMETRIKA

A Journal for the Statistical Study of Biological Problems

Volume 37

Contents

Parts 1 and 2, June 1950

I. Periodogram analysis and continuous spectra. By M. S. BARTLETT. II. Notes on continuous stochastic phenomena. By P. A. P. MORAN. III. Accident proneness. By MAJOR GREENWOOD. IV. Organic correlation and allometry. By K. A. KERMAK and J. B. S. HALDANE. V. The probability integral transformation when the variable is discontinuous. By F. N. DAVID and N. L. JOHNSON. VI. How balanced incomplete block designs may be made to furnish orthogonal estimates in weighing designs. By K. S. BANERJEE. VII. The power of the χ^2 index of dispersion test when Neyman's contagious distribution is the alternative hypothesis. By G. I. BATEMAN. VIII. Power of the modified t-test (u-test) based on range. By E. LORD. IX. The use of mean range as an estimator of variance in statistical tests. By P. B. PATNAIK. X. Some notes on the use of range. By E. S. PEARSON. XI. On the statistical independence of quadratic forms in normal variates. By A. C. AITKEN. XII. Two combinatorial tests of whether a sample has come from a given population. By F. N. DAVID. XIII. Maximum likelihood and the efficiency of the method of moments. By L. R. SHENTON. XIV. Fiducial limits of the parameter of a discontinuous distribution. By W. L. STEVENS. XV. Extension of the Neyman-Pearson theory of tests to discontinuous variates. By K. D. TOCHER. XVI. A simplified form of Sheppard's correction formulae. By H. O. HARTLEY. XVII. Some theorems in least squares. By R. L. PLACKETT. XVIII. Weighted probits and their use. By A. N. BLACK. XIX. Table of the probability integral of the t-distribution. By H. O. HARTLEY and E. S. PEARSON. XX. MISCELLANEA: A method of estimating the parameters of an autoregressive time-series. By S. G. GHURYE. A test for the serial independence of residuals. By P. A. P. MORAN. Efficiencies of certain linear systematic statistics for estimating dispersion from normal samples. By K. R. NAIR. Apparent correlation between independent series of autocorrelated observations. By Sir GILBERT WALKER. On the inversion of circulant matrices. By I. J. GOOD. The effect of non-normality on the z-test, when used to compare the variances in two populations. By D. J. FINCH.

The subscription price, *payable in advance*, is 45s. inland, 54s. export (per volume including postage). Cheques should be drawn to Biometrika and sent to "The Secretary, Biometrika Office, Department of Statistics, University College, London, W.C. 1." All foreign cheques must be in sterling and drawn on a bank having a London agency.

SANKHYĀ

The Indian Journal of Statistics

Edited by P. C. Mahalanobis

Vol. IX, Part 4, 1949

A theoretical system of selection for Homostyle Primula..... R. A. FISHER
On some problems arising out of discrimination with multiple characters
C. RADHAKRISHNA RAO
On certain aspects of spring balance designs..... K. S. BANERJEE
United Nations Economic and Social Council Sub-commission on Statistical Sampling:
Report to the Statistical Commission
Recommendations concerning the preparation of reports of Sampling Surveys
Comparability of measurements..... K. P. CHATTOPADHYAY
Book Reviews

Annual subscription: 30 rupees
Inquiries and orders may be addressed to the
Editor, Sankhyā, Presidency College, Calcutta, India.

SKANDINAVISK AKTUARIETIDSKRIFT

1949 - Parts 3 - 4

Contents

A. HALD: Maximum Likelihood Estimation of the Parameters of a Normal Distribution which is Truncated at a Known Point	119
N. F. GJEDDEBAEK: Contribution to the Study of Grouped Observations. Application of the Method of Maximum Likelihood in Case of Normally Distributed Observations	135
J. F. STEFFENSEN: On the Technical Functions of Invalidity Insurance.....	160
S. J. BJORAA: Approximate Values of Premium Return Assurances	176
HANNES HYRENIUS: Sampling Distribution from a Compound Normal Parent Population	180
H. L. SEAL: Mortality Data and the Binomial Probability Law.....	188

Annual subscription: 10 Swedish Crowns (Approx. \$2.00).

Inquiries and orders may be addressed to the Editor,
SKÄRVIKSVÄGEN 7, DJURSHOLM (SWEDEN)

ECONOMETRICA

Journal of the Econometric Society

Contents of Vol. 18, July, 1950, include:

R. G. D. ALLEN	The Work of Eugen Slutsky
A. R. FERGUSON	Empirical Determination of a Multidimensional Marginal Cost Function
LAWRENCE R. KLEIN	Stock and Flow Analysis in Economics
WILLIAM FELLNER AND HAROLD M. SOMERS	Stock and Flow Analysis: Comment
LAWRENCE R. KLEIN	Stock and Flow Analysis: Further Comment
KARL BRUNNER	Stock and Flow Analysis: Discussion
WILLIAM FELLNER AND HAROLD M. SOMERS	Stock and Flow Analysis: Note on the Discussion
PAUL B. SIMPSON	Risk Allowances for Price Expectations
GEORGE KINGSLEY ZIPF	A Note on Brand-Names and Related Economic Phenomena
Report of the New York Meeting, December 27-30, 1949.	
Announcements of Future Meetings.	

Published Quarterly

Subscription to Nonmembers: \$9.00 per year

The Econometric Society is an international society for the advancement of economic theory in its relation to statistics and mathematics.

Subscriptions to *Econometrica* and inquiries about the work of the Society and the procedure in applying for membership should be addressed to William B. Simpson, Secretary, The Econometric Society, The University of Chicago, Chicago 37, Illinois, U.S.A.

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

OFFICERS FOR 1950

President:

J. L. DOOB, University of Illinois, Urbana

President-Elect:

P. S. DWYER, University of Michigan, Ann Arbor

Secretary-Treasurer:

C. H. FISCHER, University of Michigan, Ann Arbor

Editor:

T. W. ANDERSON, Columbia University, New York

The purpose of the Institute of Mathematical Statistics is to stimulate research in the mathematical theory of statistics and to promote cooperation between the field of pure research and the fields of application.

Membership dues including subscription to the ANNALS OF MATHEMATICAL STATISTICS are \$7.00 per year within the Western Hemisphere and \$5.00 per year elsewhere. Dues and inquiries regarding membership in the Institute should be sent to the Secretary-Treasurer of the Institute.

MEETING OF THE INSTITUTE

ANNUAL MEETING—CHICAGO, ILLINOIS—December 27-29, 1950.

To be held in conjunction with the meeting of the American Statistical Association. Abstracts must be in the hands of Associate Secretary K. J. Arnold, Mathematics Department, University of Wisconsin, Madison, Wisconsin, not later than November 15.
