

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Optimal flow through the disordered lattice	DAVID ALDOUS	397
Geometric characterization of intermittency in the parabolic Anderson model JÜRGEN GÄRTNER, WOLFGANG KÖNIG AND STANISLAV MOLCHANOV		439
A long range dependence stable process and an infinite variance branching system TOMASZ BOJDECKI, LUIS G. GOROSTIZA AND ANNA TALARCZYK		500
Scaling limits for random fields with long-range dependence INGEMAR KAJ, LASSE LESKELÄ, ILKKA NORROS AND VOLKER SCHMIDT		528
Ergodic properties of Poissonian ID processes	EMMANUEL ROY	551
How large a disc is covered by a random walk in n steps?	AMIR DEMBO, YUVAL PERES AND JAY ROSEN	577
Large deviations and laws of the iterated logarithm for the local times of additive stable processes	XIA CHEN	602
0–1 laws for regular conditional distributions	PATRIZIA BERTI AND PIETRO RIGO	649
Tracy–Widom limit for the largest eigenvalue of a large class of complex sample covariance matrices	NOUREDDINE EL KAROUI	663
Chaînes de Markov Constructives Indexées par \mathbf{Z}	JEAN BROSSARD AND CHRISTOPHE LEURIDAN	715
Recurrence of random walk traces ITAI BENJAMINI, ORI GUREL-GUREVICH AND RUSSELL LYONS		732
Filtration shrinkage by level-crossings of a diffusion	A. DENIZ SEZER	739
When the law of large numbers fails for increasing subsequences of random permutations	ROSS G. PINSKY	758
The growth of additive processes	MING YANG	773
