

# THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

- Divergence of shape fluctuations in two dimensions  
CHARLES M. NEWMAN AND MARCELO S. T. PIZA 977
- Crossing velocities and random lattice animals . . . . . ALAIN-SOL SZNITMAN 1006
- Percolation of arbitrary words in  $\{0, 1\}^{\mathbb{N}}$  . . . . . ITAI BENJAMINI AND HARRY KESTEN 1024
- Enlargement of obstacles for the simple random walk . . . . . PETER ANTAL 1061
- Galton–Watson trees with the same mean have the same polar sets  
ROBIN PEMANTLE AND YUVAL PERES 1102
- Conceptual proofs of  $L \log L$  criteria for mean behavior of branching processes  
RUSSELL LYONS, ROBIN PEMANTLE AND YUVAL PERES 1125
- Poisson approximation for the final state of a generalized epidemic process  
CLAUDE LEFÈVRE AND SERGEY UTEV 1139
- On the structure of stationary stable processes . . . . . JAN ROSINSKI 1163
- The functional law of the iterated logarithm for stationary strongly  
mixing sequences . . . . . EMMANUEL RIO 1188
- On the almost sure convergence of series of stationary and related  
nonstationary variables . . . . . CHRISTIAN HOUDRÉ 1204
- Central limit theorem in negative curvature . . . . . FRANÇOIS LEDRAPPIER 1219
- Constructing gamma-martingales with prescribed limit, using backwards SDE  
R. W. R. DARLING 1234
- Markov field property of stochastic differential equations  
AURELI ALABERT, MARCO FERRANTE AND DAVID NUALART 1262
- Contrôle de la norme  $H^p$  d'une martingale par des maximums de temps locaux  
CHRISTOPHE LEURIDAN 1289
- Asymptotic laws for one-dimensional diffusions conditioned to nonabsorption  
PIERRE COLLET, SERVET MARTÍNEZ AND JAIME SAN MARTÍN 1300
- Large deviations for independent random walks on the line . . . . . TZONG-YOW LEE 1315
- Martin capacity for Markov chains  
ITAI BENJAMINI, ROBIN PEMANTLE AND YUVAL PERES 1332
- Total variation asymptotics for Poisson process approximations of logarithmic  
combinatorial assemblies . . . . RICHARD ARRATIA, DUDLEY STARK AND SIMON TAVARÉ 1347
- Conditional propagation of chaos and a class of quasilinear PDE's . . . . WEIAN ZHENG 1389
- The rate function for some measure-valued jump processes  
BOUALEM DJEHICHE AND INGEMAR KAJ 1414
- Symmetric two-particle exclusion-eating processes . . . . . XIJIAN LIU 1439

## Book Review

- Review of *Lectures on the Coupling Method* by Torgny Lindvall . . . . NEIL O'CONNELL 1456

Vol. 23, No. 3—July 1995

# INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

*The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.*

---

## OFFICERS AND EDITORS

- President:** James O. Berger, Department of Statistics, Purdue University, West Lafayette, Indiana 47907-1399
- President-Elect:** Nancy Reid, Department of Statistics, University of Toronto, 100 St. George Street, Toronto, Ontario M5S 1A1, Canada
- Past President:** David R. Brillinger, Department of Statistics, University of California, Berkeley, California 94720-0001
- Executive Secretary:** Hari G. Mukerjee, Department of Mathematics and Statistics, Wichita State University, Wichita, Kansas 67208-0033
- Treasurer:** Miriam Gasko Donoho, Department of Marketing and Quantitative Studies, College of Business, San Jose State University, 1 Washington Square, San Jose, California 95192-0069
- Program Secretary:** Jon A. Wellner, Department of Statistics GN-22, University of Washington, Seattle, Washington 98195
- Editors, *The Annals of Statistics*:** Lawrence D. Brown, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302; John Rice, Department of Statistics, Evans Hall, University of California, Berkeley, California 94720
- Editor, *The Annals of Probability*:** James W. Pitman, Department of Statistics, University of California, Berkeley, California 94720-0001
- Editor, *The Annals of Applied Probability*:** Richard L. Tweedie, Department of Statistics, Colorado State University, Fort Collins, Colorado 80523
- Executive Editor, *Statistical Science*:** Paul Switzer, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305
- Editor, *The IMS Bulletin*:** Susan R. Wilson, Centre for Mathematics and its Applications, School of Mathematical Sciences, Australian National University, Canberra ACT 0200, Australia
- Editor, *IMS Lecture Notes—Monograph Series*:** David Ruppert, School of Operations Research and Industrial Engineering, E & TC Building, Cornell University, Ithaca, New York 14853-7501
- Managing Editor:** John R. Collins, Department of Mathematics and Statistics, University of Calgary, 2500 University Drive NW, Calgary, Alberta, Canada T2N 1N4
- Managing Editor:** Paul J. Smith, Director, Statistics Laboratory, Department of Mathematics, University of Maryland, College Park, Maryland 20742

---

**Journals.** The scientific journals of the Institute are *The Annals of Applied Probability*, *The Annals of Probability*, *The Annals of Statistics* and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

**Individual and Organizational Memberships.** All individual members pay basic membership dues of \$60. Each individual member must elect to receive at least one scientific journal for an additional amount, as follows: *The Annals of Applied Probability* (\$15), *The Annals of Probability* (\$20), *The Annals of Statistics* (\$25) or *Statistical Science* (\$10). Of the total dues paid, \$29 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Reduced membership dues are available to full-time students, permanent residents of countries designated by the IMS Council and retired members. Retired members may elect to receive the *Bulletin* only for \$24. Organizational memberships are available to nonprofit organizations at \$450 per year and to for-profit organizations at \$750 per year. Organizational memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

**Individual and General Subscriptions.** Subscriptions are available on a calendar-year basis. Individual subscriptions are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1995 are available to *The Annals of Applied Probability* (\$80), *The Annals of Probability* (\$85), *The Annals of Statistics* (\$90), *The IMS Bulletin* (\$50) and *Statistical Science* (\$75). General subscriptions are for libraries, institutions and any multiple-readership use. General subscriptions for 1995 are available to *The Annals of Applied Probability* (\$90), *The Annals of Probability* (\$130), *The Annals of Statistics* (\$150), *The IMS Bulletin* (\$50) and *Statistical Science* (\$75). Air mail rates for delivery outside North America are \$80 per title (excluding *The IMS Bulletin*).

**Permissions policy.** Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$5.00 per copy, plus \$0.00 per page is paid directly to the Copyright Clearance Center, 222 Rosewood Drive, Danvers, Massachusetts 01923. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 1050-5164/95 \$5.00 + 0.00.

**Correspondence.** Mail concerning membership, subscriptions, nonreceipt claims, copyright permissions, advertising or back issues should be sent to the IMS Business Office. Mail concerning submissions or editorial content should be sent to the Editor of the appropriate journal. Their addresses are listed above. Mail concerning the production of this journal should be sent to: Linda A. Pratt, IMS Production Editor, P.O. Box 1302, Mattituck, New York 11952-0924.

***The Annals of Probability* (ISSN 0091-1798),** Volume 23, Number 3, July 1995. Published quarterly by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545-3819-18. Second-class postage paid at Hayward, California and at additional mailing offices.

**POSTMASTER:** Send address changes to *The Annals of Probability*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545-3819-18.

## EDITORIAL POLICY

The main purpose of *The Annals of Probability* and *The Annals of Statistics* is to publish contributions to the theory of probability and statistics and to their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient. Also appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

---

## NOTICE

Manuscripts submitted for publication in *The Annals of Probability* should be sent to the Editor at the following address:

Jim Pitman  
Department of Statistics  
367 Evans Hall #3860  
University of California  
Berkeley, California 94720-3860

# THE ANNALS OF PROBABILITY

## INSTRUCTIONS FOR AUTHORS

**Submission of Papers.** Papers to be submitted for publication should be sent to the Editor of the *Annals of Probability*. (For current address, see the latest issue of the *Annals*.) **Three copies** should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

**Preparation of Manuscript.** Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

**Electronic Submission of Accepted Papers.** You are encouraged to submit papers written in some form of  $\text{\TeX}$ . All forms of  $\text{\TeX}$  (e.g.  $\text{\LaTeX}$ ,  $\text{\AMS-TeX}$ , etc.) are acceptable. Please do not send a disk with your original submission. On acceptance of a paper written in  $\text{\TeX}$ , you will be asked to provide an electronic copy for the Production Editor, either on a 3½-inch disk or by e-mail.

**Submission of Reference Papers.** Two copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

**Title.** The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

**Abbreviated Title.** An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters.

**Affiliation and Addresses.** Indicate your present institutional affiliation as you would like it to appear. List the permanent mailing address of each author after the references.

**Summary.** Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

**Footnotes.** Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

**Title Page Footnotes.** Included as a footnote on page 1 should be the headings:

American Mathematical Society 1991 subject classifications. Primary—; secondary—.  
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical*

*Reviews Annual Subject Index-1991*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

**Identification of Symbols.** Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between “oh” and “zero,” “ell” and “one,” “epsilon” and “element of,” “summation” and “capital sigma,” etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

**Figures and Tables.** Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

**Formulas.** Fractions *in the text* are preferably written with the solidus or negative exponent; thus,  $(a + b)/(c + d)$  is preferred to  $\frac{a+b}{c+d}$ , and  $(2\pi)^{-1}$  or  $1/(2\pi)$  to  $\frac{1}{2\pi}$ . Also,  $a^{b(c)}$  and  $a_{b(c)}$  are preferred to  $a^{bc}$  and  $a_{bc}$ , respectively. Complicated exponentials should be represented with the symbol `exp`. A fractional exponent is preferable to a radical sign.

**References.** References should be typed double-spaced and should follow the style:

Révész, P. (1982). On the increments of Wiener and related processes. *Ann. Probab.* **10** 613–622.

In textual material; the format “...Révész (1982)...” should be used. Multiple references can be distinguished as “...Révész (1982a)...”. Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

**Copyright, Page Charges and Offprints.** Page charges are \$45 per printed page. Payment of some or all of the estimated page charges associated with articles is strongly encouraged. The editorial review of articles and administration of page charges are completely separate activities. Manuscripts are reviewed and accepted prior to determining whether page charges will be paid.

Corresponding authors receive 25 gratis offprints. Offprints of discussion articles include the main article(s), discussion(s) and rejoinder(s) as a package. Corresponding authors of main articles receive 25 gratis offprints; corresponding discussants receive 10 gratis offprints. Additional offprints may be purchased by using the IMS Offprint Purchase Order Form accompanying the galley.

Copyright transfer, page charges and offprints are the responsibility of the IMS Business Manager.

**Galley Proofs.** The corresponding author will ordinarily receive galley proofs. Corrected galley proofs should be sent to: AOP Redactory, Technical Typesetting Inc., 1510 Caton Center Drive, Suite E, Baltimore, MD 21227.
