

# THE ANNALS of PROBABILITY

ISSN (0091-1798)

AN OFFICIAL JOURNAL OF THE  
INSTITUTE OF MATHEMATICAL STATISTICS

## Special Invited Paper

Self-intersection gauge for random walks and for Brownian motion . . . . . E. B. DYNKIN 1

## Articles

Regularized self-intersection local times of planar Brownian motion . . . . .	E. B. DYNKIN	58
Continuity and singularity of the intersection local time of stable processes in $\mathbb{R}^2$ . . . . .	JAY ROSEN	75
Unique characterization of conditional distributions in nonlinear filtering T. G. KURTZ AND D. I. OCONE		80
Strong bounds for weighted empirical distribution functions based on uniform spacings . . . . .	JOHN H. J. EINMAHL AND MARTIEN C. A. VAN ZUIJLEN	108
Laws of the iterated logarithm in the tails for weighted uniform empirical processes . . . . .	JOHN H. J. EINMAHL AND DAVID M. MASON	126
On the distributions of $L_p$ norms of weighted uniform empirical and quantile processes . . . . .	MIKLÓS CSÓRGÓ AND LAJOS HORVÁTH	142
Strong laws for quantiles corresponding to moving blocks of random variables RALPH P. RUSSO		162
The structure of sign-invariant GB-sets and of certain Gaussian measures MICHEL TALAGRAND		172
Gaussian processes and almost spherical sections of convex bodies . . . . .	YEHOAM GORDON	180
Covering problems for Brownian motion on spheres . . . . .	PETER MATTHEWS	189
On the supports of measure-valued critical branching Brownian motion . . . . .	I. ISCOE	200
A generalization of Kolmogorov's extension theorem and an application to the construction of stochastic processes with random time domains . . . . .	K. Y. HU	222
A Malliavin-type anticipative stochastic calculus . . . . .	MARC A. BERGER	231
Weak convergence of the variations, iterated integrals and Doléans-Dade exponentials of sequences of semimartingales . . . . .	FLORIN AVRAM	246
Probability estimates for multiparameter Brownian processes . . . . .	RICHARD F. BASS	251
A martingale approach to point processes in the plane ELY MERZBACH AND DAVID NUALART		265
On the rate of convergence in the central limit theorem for martingales with discrete and continuous time . . . . .	ERICH HAEUSLER	275
The central limit theorem and Poincaré-type inequalities . . . . .	LOUIS H. Y. CHEN	300
Normal convergence by higher seminvariants with applications to sums of dependent random variables and random graphs . . . . .	SVANTE JANSON	305
A central limit theorem for stationary $\rho$ -mixing sequences with infinite variance RICHARD C. BRADLEY		313
Almost sure continuity of stable moving average processes with index less than one . . . . .	A. A. BALKEMA AND L. DE HAAN	333
A de Finetti theorem for a class of pairwise independent stationary processes JAMES B. ROBERTSON AND STEPHEN SIMONS		344
Approximation of the finite prediction for a weakly stationary process . . . . .	AKIO ARIMOTO	355
Extreme sojourns of diffusion processes . . . . .	SIMEON M. BERMAN	361
Boundary crossing problems for sample means . . . . .	TZE LEUNG LAI	375
DFR property of first-passage times and its preservation under geometric compounding . . . . .	J. GEORGE SHANTHIKUMAR	397
Moment and geometric probability inequalities arising from arrangement increasing functions . . . . .	PHILIP J. BOLAND, FRANK PROSCHAN AND Y. L. TONG	407
Tight bounds on the exponential approximation of some aging distributions . . . . .	D. J. DALEY	414

## Book Review

Review of *Ergodic Theorems* by Ulrich Krengel . . . . . ROBERT SINE 424

## Correction

Compound Poisson approximations for sums of random variables . . . RICHARD F. SERFOZO 429

Vol. 16, No. 1—January 1988

# INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

*The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.*

---

## OFFICERS AND EDITORS

- President:** Bradley Efron, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305
- President-Elect:** Ram Gnanadesikan, Morris Research and Engineering Center, Bell Communications Research, 435 South Street, Morristown, New Jersey 07960-1961
- Past President:** Ronald Pyke, Department of Mathematics GN-50, University of Washington, Seattle, Washington 98195
- Executive Secretary:** Peter Purdue, Department of Operations Research, Code 55, Naval Postgraduate School, Monterey, California 93943
- Treasurer:** Nicholas P. Jewell, Group in Biostatistics, University of California, Berkeley. *Please send correspondence to:* IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545
- Program Secretary:** Lynne Billard, Department of Statistics, University of Georgia, Athens, Georgia 30602
- Editor, *The Annals of Statistics*:** Willem R. van Zwet, Department of Mathematics, University of Leiden, P.O. Box 9512, 2300 RA Leiden, The Netherlands
- Editor, *The Annals of Probability*:** Peter Ney, Department of Mathematics, Van Vleck Hall, University of Wisconsin, 480 Lincoln Drive, Madison, Wisconsin 53706
- Executive Editor, *Statistical Science*:** Morris H. DeGroot, Department of Statistics, Carnegie Mellon University, Pittsburgh, Pennsylvania 15213
- Editor, *The IMS Bulletin*:** George P. H. Styan, Department of Mathematics and Statistics, Burnside Hall, McGill University, 805 Sherbrooke Street West, Montreal PQ, Canada H3A 2K6
- Editor, *The IMS Lecture Notes—Monograph Series*:** Robert J. Serfling, Department of Mathematical Sciences, Johns Hopkins University, Baltimore, Maryland 21218
- Managing Editor:** Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104

---

**Journals.** The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability* and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

**Individual, Institutional and Corporate Memberships.** All individual members receive *The IMS Bulletin* for a basic annual dues rate of \$30. Each member must elect to receive at least one scientific journal for an additional amount, as follows: *Statistical Science* (\$5), one *Annals* (\$15) or both *Annals* (\$25). Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$12 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Memberships are available at a reduced rate (40% of regular rates) for full-time students, permanent residents of developing countries and retired members. Retired members may also elect to receive the *Bulletin* only for \$12. *Institutional memberships* are available to nonprofit organizations at \$255 per year and *corporate memberships* are available to other organizations at \$550 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

**Individual and General Subscriptions.** Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by and mailed to an individual. Individual subscriptions for 1988 are available to both *Annals* and *Statistical Science* (\$96), one *Annals* and *Statistical Science* (\$60), both *Annals* (\$72), one *Annals* (\$45), *Statistical Science* (\$30) and *The IMS Bulletin* (\$20). *General subscriptions* are for libraries, institutions and any multiple-readership use. For 1988, all general subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. General subscriptions for 1988 are available to both *Annals* and *Statistical Science* (\$170), one *Annals* and *Statistical Science* (\$100), *Statistical Science* only (\$45) and *The IMS Bulletin* (\$25). Air mail rates for overseas delivery of general subscriptions are \$40 per title.

**Permissions policy.** Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$5.00 per copy, plus \$.00 per page is paid directly to the Copyright Clearance Center, 27 Congress Street, Salem, Massachusetts 01970. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is: 0091-1798/88 \$5.00 + .00.

**Correspondence.** Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content) or the Managing Editor (production).

***The Annals of Probability* (ISSN 0091-1798)**, Volume 16, Number 1, January 1988. Published in January, April, July and October by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster:** Send address changes to *The Annals of Probability*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545.

## EDITORIAL POLICY

The main purpose of *The Annals of Probability* and *The Annals of Statistics* is to publish contributions to the theory of probability and statistics and to their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

# THE ANNALS OF PROBABILITY

## INSTRUCTIONS FOR AUTHORS

**Submission of Papers.** Papers to be submitted for publication should be sent to the Editor of *The Annals of Probability*. (For current address, see the latest issue of the *Annals*.) Three copies should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

**Preparation of Manuscripts.** Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

**Submission of Reference Papers.** Two copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

**Title.** The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

**Abbreviated Title.** An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters. For example, an article with the title "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law" could have the running head, "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law," depending on the emphasis to be conveyed.

**Affiliation.** Indicate your present institutional affiliation as you would like it to appear. List your permanent mailing address after the references.

**Summary.** Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

**Footnotes.** Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

**Title Page Footnotes.** Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.  
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

**Identification of Symbols.** Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

**Figures and Tables.** Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

**Formulas.** Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$  is preferred to  $\frac{a + b}{c + d}$ , and  $(2\pi)^{-1}$

or  $1/(2\pi)$  to  $\frac{1}{2\pi}$ . Also,  $a^{b(c)}$  and  $a_{b(c)}$  are preferred

to  $a^{b^c}$  and  $a_{b^c}$ , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

**References.** References should be typed double-spaced and should follow the style:

Révész, P. (1982). On the increments of Wiener and related processes. *Ann. Probab.* **10** 613–622.

In textual material, the format "... Révész (1982)..." should be used. Multiple references can be distinguished as "... Révész (1982a)..." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

**Galley Proofs.** The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to: AOP Redactory, Science Typographers, Inc., 15 Industrial Boulevard, Medford, NY 11763.
