

# THE ANNALS of PROBABILITY

AN OFFICIAL JOURNAL OF  
THE INSTITUTE OF MATHEMATICAL STATISTICS

## Articles

Reflected diffusion processes with jumps . . . . .	JOSÉ-LUIS MENALDI AND MAURICE ROBIN	319
On evaluating the Donsker-Varadhan $I$ -function . . . . .	ROSS PINSKY	342
On the convergence of diffusion processes conditioned to remain in a bounded region for large time to limiting positive recurrent diffusion processes . . . . .	ROSS PINSKY	363
Some examples of nonlinear diffusion processes having a time- periodic law . . . . .	MICHAEL SCHEUTZOW	379
A central limit theorem for diffusions with periodic coefficients . . . . .	RABI BHATTACHARYA	385
A limit theorem for nonnegative additive functionals of storage processes . . . . .	KEIGO YAMADA	397
Asymptotical growth of a class of random trees . . . . .	B. PITTEL	414
Noncentral limit theorems for quadratic forms in random variables having long-range dependence . . . . .	ROBERT FOX AND MURAD S. TAQQU	428
Characterization and domains of attraction of $p$ -stable random compact sets . . . . .	EVARIST GINÉ AND MARJORIE G. HAHN	447
Limiting multivariate distributions of intermediate order statistics . . . . .	BRUCE COOIL	469
An upper bound on the critical percolation probability for the three-dimensional cubic lattice . . . . .	M. CAMPANINO AND L. RUSSO	478
Excursion laws of Markov processes in classical duality . . . . .	H. KASPI	492
Volterra equations driven by semimartingales . . . . .	PHILIP PROTTER	519
A stochastic integral representation for random evolutions . . . . .	JOSEPH C. WATKINS	531
A sample path proof of the duality for stochastically monotone Markov processes . . . . .	PETER CLIFFORD AND AIDAN SUDBURY	558
Optimal stopping of independent random variables and maxi- mizing prophets . . . . .	D. P. KENNEDY	566
Dependence by total positivity . . . . .	MEI-LING TING LEE	572
Dependence by reverse regular rule . . . . .	MEI-LING TING LEE	583
Relations between the $s$ -selfdecomposable and selfdecom- posable measures . . . . .	ZBIGNIEW J. JUREK	592
Malliavin derivatives and derivatives of functionals of the Wiener process with respect to a scale parameter . . . . .	MOSHE ZAKAI	609
Local laws of the iterated logarithm for diffusions . . . . .	R. F. BASS AND K. B. ERICKSON	616
A local limit theorem for associated sequences . . . . .	THOMAS E. WOOD	625
Mutual dependence of random variables and maximum discretized entropy . . . . .	CARLO BERTOLUZZA AND BRUNO FORTE	630

50th Anniversary Year

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

*The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.*

---

## OFFICERS AND EDITORS

**President:**

Oscar Kempthorne, Department of Statistics, 111B Snedecor Hall, Iowa State University, Ames, Iowa 50011

**President-Elect:**

Paul Meier, Department of Statistics, University of Chicago, 5734 University Avenue, Chicago, Illinois 60637

**Past-President:**

Ingram Olkin, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

**Executive Secretary:**

Francisco J. Samaniego, Division of Statistics, 469 Kerr Hall, University of California, Davis, California 95616

**Treasurer:**

Bruce E. Trumbo, Department of Statistics, California State University, Hayward. *Please send correspondence to: IMS Business Office, 3401 Investment Blvd., Suite 7, Hayward, California 94545*

**Program Secretary:**

Richard A. Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706

**Editor: *The Annals of Statistics***

Michael D. Perlman, Department of Statistics GN-22, University of Washington, Seattle, Washington 98195

**Editor: *The Annals of Probability***

Thomas M. Liggett, Department of Mathematics, University of California, Los Angeles, California 90024

**Executive Editor: *Statistical Science***

Morris H. DeGroot, Department of Statistics, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213

**Editor: *The IMS Bulletin***

William C. Guenther, Department of Statistics, University of Wyoming, Laramie. *Please send correspondence to: Box 3332 University Station, Laramie, Wyoming 82071*

**Editor: *The IMS Lecture Notes—Monograph Series***

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

**Managing Editor:**

Prem K. Goel, Department of Statistics, 1958 Neil Avenue, The Ohio State University, Columbus, Ohio 43210

---

**Official Journals.** The official journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *The Institute of Mathematical Statistics Bulletin*.

**Individual, Institutional and Corporate Memberships.** All individual members receive the *Bulletin*. Annual dues for individual membership depend upon the journals selected (\$52 for both *Annals*/\$40 for one *Annals*). Dues allocations to each journal are set by Council resolution for regular members at \$6 for *The IMS Bulletin* and \$34 for one *Annals* or \$23 for each *Annals*. Subject to some restrictions, memberships are available at reduced rates for students (\$21/\$17), residents of developing countries (\$35/\$28), and retired members (\$11/\$6/\$1 for the *Bulletin* only). *Institutional memberships* are available to nonprofit organizations at \$215 per year and *Corporate memberships* are available to other organizations at \$500 per year. Institutional and corporate memberships include two multiple-readership copies of all three journals in addition to other benefits specified for each category (details available from the IMS Business Office).

**Individual and General Subscriptions.** Subscriptions are available on a calendar year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1985 are available to *The Annals of Statistics* (\$45), *The Annals of Probability* (\$45), and *The IMS Bulletin* (\$11).

*General subscriptions* are for libraries, institutions, and any multiple-readership use. General subscriptions for 1985 are available to *The Annals of Statistics* (\$75), *The Annals of Probability* (\$70), both *Annals* (\$140), and *The IMS Bulletin* (\$20). Air mail rates for overseas delivery of general subscriptions are \$40 per subscription.

**Correspondence.** Mail to IMS should be sent to the Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production).

***The Annals of Probability* (ISSN 0091-1798)**, Volume 13, Number 2, May, 1985. Published in February, May, August and November by the Institute of Mathematical Statistics, 3401 Investment Blvd., #7, Hayward, California 94545. Printed at the Waverly Press, Inc., Baltimore, Maryland 21202. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster.** Send address changes to *The Annals of Probability*, Institute of Mathematical Statistics, 3401 Investment Blvd., #7, Hayward, California 94545.

## EDITORIAL POLICY

The main purpose of the *Annals of Probability* and the *Annals of Statistics* is to publish contributions to the theory of probability and statistics and to their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

# THE ANNALS OF PROBABILITY

## INSTRUCTIONS FOR AUTHORS

**Submission of Papers.** Papers to be submitted for publication should be sent to the Editor of the *Annals of Probability*. (For current address, see the latest issue of the *Annals*.) Three copies should be submitted on paper that will take ink corrections. The manuscript will not normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

**Preparation of Manuscripts.** Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

**Submission of Reference Papers.** Two copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

**Title.** The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

**Abbreviated Title.** An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters. For example, an article with the title "A Limit Theorem for Conditional Recurrent Random Walk Attracted to a Stable Law" could have the running head, "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law" depending on the emphasis to be conveyed.

**Affiliation.** Indicate your present institutional affiliation as you would like it to appear. List your permanent mailing address after the references.

**Summary.** Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be selfcontained.

**Footnotes.** Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

**Title Page Footnotes.** Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—. Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

**Identification of Symbols.** Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one", "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

**Figures and Tables.** Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

**Formulas.** Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$  is preferred to  $\frac{a + b}{c + d}$ , and  $(2\pi)^{-1}$  or

$1/(2\pi)$  to  $\frac{1}{2\pi}$ . Also,  $a^{b(c)}$  and  $a_{b(c)}$  are preferred to  $a^{b^c}$

and  $a_{b^c}$ , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

**References.** References should be typed double-spaced and should follow the style:

Révész, P. (1982). Admissibility of conditional confidence procedures. *Ann. Probab.* **10** 613–622.

In textual material, the format "... Révész (1982) ..." should be used. Multiple references can be distinguished as "... Révész (1982a) ...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

**Galley Proofs.** The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to: AOP Redactory, Waverly Press, Inc., Mt. Royal & Guilford Aves., Baltimore, MD 21202.
