

THE ANNALS *of* PROBABILITY

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

- Averaging of Hamiltonian flows with
an ergodic component DMITRY DOLGOPYAT AND LEONID KORALOV 1999
- Spectral gaps in Wasserstein distances and the 2D stochastic Navier–Stokes equations
MARTIN HAIRER AND JONATHAN C. MATTINGLY 2050
- Weak solutions for forward–backward SDEs—a martingale problem approach
JIN MA, JIANFENG ZHANG AND ZIYU ZHENG 2092
- Concentration inequalities for dependent random variables via the martingale method
LEONID (ARYEH) KONTOROVICH AND KAVITA RAMANAN 2126
- Asymptotic behavior of weighted quadratic and cubic variations
of fractional Brownian motion IVAN NOURDIN 2159
- Some local approximations of Dawson–Watanabe
superprocesses OLAV KALLENBERG 2176
- Trivial intersection of σ -fields
and Gibbs sampling PATRIZIA BERTI, LUCA PRATELLI AND PIETRO RIGO 2215
- A tree approach to p -variation and to integration JEAN PICARD 2235
- Hoeffding decompositions and
urn sequences OMAR EL-DAKKAK AND GIOVANNI PECCATI 2280
- On pathwise uniqueness for reflecting Brownian motion in $C^{1+\gamma}$ domains
RICHARD F. BASS AND KRZYSZTOF BURDZY 2311
- Existence, uniqueness and approximation of a stochastic
Schrödinger equation: The diffusive case CLÉMENT PELLEGRINI 2332
- Transient random walks on a strip in
a random environment ALEXANDER ROITERSHTEIN 2354
- Pinning and wetting transition for (1+1)-dimensional fields with Laplacian interaction
FRANCESCO CARAVENNA AND JEAN-DOMINIQUE DEUSCHEL 2388
