

THE ANNALS of STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Asymptotic Theory

- Martingale expansions and second order inference PER ASLAK MYKLAND 707
Exact computation of the asymptotic efficiency of maximum likelihood estimators of a
discontinuous signal in a Gaussian white noise
HERMAN RUBIN AND KAI-SHENG SONG 732

Bayesian Inference

- Rates of convergence for Gibbs sampling for variance component models
JEFFREY S. ROSENTHAL 740
Exact multivariate Bayesian bootstrap distributions of moments . . . MAURO GASPARINI 762

Censored Data

- A note on a characterization of the exponential distribution based on a type II
censored sample JIAN-LUN XU AND GRACE L. YANG 769
Coarsening at random in general sample spaces and random censoring in
continuous time MARTIN JACOBSEN AND NIELS KEIDING 774
An approach to nonparametric regression for life history data using local
linear fitting GANG LI AND HANI DOSS 787

Curve Estimation

- Bias-variance tradeoffs in functional estimation problems MARK G. LOW 824
Deficiency of the sample quantile estimator with respect to kernel quantile
estimators for censored data XIAOJING XIANG 836
Measuring mass concentrations and estimating density contour clusters—An
excess mass approach WOLFGANG POLONIK 855
Nonparametric density estimation with a parametric start
NILS LID HJORT AND INGRID K. GLAD 882
Formulae for mean integrated squared error of nonlinear wavelet-based density
estimators PETER HALL AND PRAKASH PATIL 905

Semi-parametric Inference

- On estimating mixing densities in discrete exponential family models . CUN-HUI ZHANG 929
On a semiparametric variance function model and a test for heteroscedasticity
HANS-GEORG MÜLLER AND PENG-LIANG ZHAO 946
On optimal B-robust influence functions in semiparametric models . . . LARRY Z. SHEN 968

Time Series

- Density estimation under long-range dependence. SÁNDOR CSÖRGÓ AND JAN MIELNICZUK 990
Nonparametric regression under long-range dependent normal errors
SÁNDOR CSÖRGÓ AND JAN MIELNICZUK 1000
Testing a time series for difference stationarity. . B. P. M. McCABE AND A. R. TREMAYNE 1015
Efficient location and regression estimation for long range dependent regression
models. RAINER DAHLHAUS 1029
Log-periodogram regression of time series with long range dependence. P. M. ROBINSON 1048

Vol. 23, No. 3—June 1995

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute is to foster the development and dissemination of the theory and applications of statistics and probability.

OFFICERS AND EDITORS

- President:** David R. Brillinger, Department of Statistics, University of California, Berkeley, California 94720-0001
- President-Elect:** James O. Berger, Department of Statistics, Purdue University, West Lafayette, Indiana 47907-1399
- Past President:** Stephen M. Stigler, Department of Statistics, University of Chicago, 5734 University Avenue, Chicago, Illinois 60637
- Executive Secretary:** Hari G. Mukerjee, Department of Mathematics and Statistics, Wichita State University, Wichita, Kansas 67208-0033
- Treasurer:** Miriam Gasko Donoho, Department of Marketing and Quantitative Studies, College of Business, San Jose State University, 1 Washington Square, San Jose, California 95192-0069
- Program Secretary:** Jon A. Wellner, Department of Statistics GN-22, University of Washington, Seattle, Washington 98195
- Editors, *The Annals of Statistics*:** Lawrence D. Brown, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302; John Rice, Department of Statistics, Evans Hall, University of California, Berkeley, California 94720
- Editor, *The Annals of Probability*:** James W. Pitman, Department of Statistics, University of California, Berkeley, California 94720-0001
- Editor, *The Annals of Applied Probability*:** Richard L. Tweedie, Department of Statistics, Colorado State University, Fort Collins, Colorado 80523
- Executive Editor, *Statistical Science*:** Paul Switzer, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305
- Editor, *The IMS Bulletin*:** Susan R. Wilson, Centre for Mathematics and its Applications, School of Mathematical Sciences, Australian National University, Canberra ACT 0200, Australia
- Editor, *IMS Lecture Notes—Monograph Series*:** David Ruppert, School of Operations Research and Industrial Engineering, E & TC Building, Cornell University, Ithaca, New York 14853-7501
- Managing Editor:** John R. Collins, Department of Mathematics and Statistics, University of Calgary, 2500 University Drive NW, Calgary, Alberta, Canada T2N 1N4
- Managing Editor:** Paul J. Smith, Director, Statistics Laboratory, Department of Mathematics, University of Maryland, College Park, Maryland 20742

Journals. The scientific journals of the Institute are *The Annals of Applied Statistics*, *The Annals of Probability*, *The Annals of Statistics* and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual and Organizational Memberships. All individual members pay basic membership dues of \$60. Each individual member must elect to receive at least one scientific journal for an additional amount, as follows: *The Annals of Applied Probability* (\$15), *The Annals of Probability* (\$29), *The Annals of Statistics* (\$25) or *Statistical Science* (\$10). Of the total due dues paid, \$29 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journal(s) received. Reduced membership dues are available to full-time students, permanent residents of countries designated by the IMS Council and retired members. Retired members may elect to receive the *Bulletin* only for \$24. *Organizational memberships* are available to nonprofit organizations at \$450 per year and to for-profit organizations at \$750 per year. Organizational memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1995 are available to *The Annals of Applied Probability* (\$80), *The Annals of Probability* (\$85), *The Annals of Statistics* (\$90), *The IMS Bulletin* (\$50) and *Statistical Science* (\$75). *General subscriptions* are for libraries, institutions and any multiple-readership use. General subscriptions for 1995 are available to the *The Annals of Applied Probability* (\$90), *The Annals of Probability* (\$130), *The Annals of Statistics* (\$150), *The IMS Bulletin* (\$50) and *Statistical Science* (\$75). Air mail rates for delivery outside North America are \$80 per title (excluding the *The IMS Bulletin*).

Permissions policy. Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Institute of Mathematical Statistics, provided that the base fee of \$5.00 per copy, plus \$0.00 per page is paid directly to the Copyright Clearance Center, 222 Rosewood Drive, Danvers, Massachusetts 01923. For those organizations that have been granted a photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is 1050-5164/95 \$5.00 + 0.00.

Correspondence. Mail concerning membership, subscriptions, nonreceipt claims, copyright permissions, advertising or back issues should be sent to the IMS Business Office. Mail concerning submissions or editorial content should be sent to the Editor of the appropriate journal. Their addresses are listed above. Mail concerning the production of this journal should be sent to: Patrick Kelly, IMS Production Editor, Department of Statistics, 3000 Steinberg-Dietrich Hall, University of Pennsylvania, Philadelphia, Pennsylvania 19104-6302.

***The Annals of Statistics* (ISSN 0090-5364)**, Volume 23, Number 3, June 1995. Published bimonthly in February, April, June, August, October and December by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545-3819-18. Second-class postage paid at Hayward, California and at additional mailing offices.

POSTMASTER: Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545-3819-18.

EDITORIAL POLICY

As editors of *The Annals of Statistics*, it is our policy to publish research of the highest quality reflecting the many facets of contemporary statistics. Primary emphasis is placed on importance and originality.

The discipline of statistics has deep roots in classical mathematical analysis, from which it derives rigor, coherence, and clarity, and is also dependent on roots in substantive scientific areas for its historical foundation and continued vitality. In the last twenty years, computational developments have had profound consequences which should also be reflected in the *Annals*. Consequently, our policy is to continue to play a special role in presenting research at the forefront of mathematical statistics, especially the more important and deep advances in the theory underlying statistical science. At the same time, we also intend to publish papers relating to the role of statistics in interdisciplinary investigations of the major scientific and social problems of our time and to emphasize developments in computational methodology. Mathematical depth and difficulty will not be the principle criteria with respect to which submissions in the latter categories are evaluated. Fundamentally, we seek a broad spectrum of papers which intellectually enriches our profession.

Most papers should contain an introduction which presents a discussion of the context and importance of the issues they address and a clear, non-technical description of the main results. The introduction should be accessible to a wide range of readers. Thus, for example it may be appropriate in some papers to present special cases or examples prior to general, abstract formulations, while in other papers discussion of the general scientific context of a problem might be a helpful prelude to the body of the paper.

Manuscripts submitted to *The Annals of Statistics* should be sent to:

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) **Four copies** should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

Preparation of Manuscript. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Two copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also required. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head, "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

AMS 1991 subject classifications. Primary—;
secondary—.

Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1991*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero," "ell" and "one," "epsilon" and "element of," "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any hand-written symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus, $(a + b)/(c + d)$ is preferred to $\frac{a+b}{c+d}$, and $(2\pi)^{-1}$ or $1/2(\pi)$ to $\frac{2}{\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred to a^{bc} and a_{bc} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836-865.

In textual material; the format "... Kiefer (1976) ..." should be used. Multiple references can be distinguished as "... Kiefer (1976a) ...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Copyright, Page Charges and Offprints. Page charges are \$45 per printed page. Payment of some or all of the estimated page charges associated with articles is strongly encouraged. The editorial review of articles and administration of page charges are completely separate activities. Manuscripts are reviewed and accepted prior to determining whether page charges will be paid.

Corresponding authors receive 25 gratis offprints. Offprints of discussion articles include the main article(s), discussion(s) and rejoinder(s) as a package. Corresponding authors of main articles receive 25 gratis offprints; corresponding discussants receive 10 gratis offprints. Additional offprints may be purchased by using the IMS Offprint Purchase Order Form accompanying the galley.

Copyright transfer, page charges and offprints are the responsibility of the IMS Business Manager.

Galley Proofs. The corresponding author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Technical Typesetting Inc., 1510 Caton Center Drive, Suite E, Baltimore, MD 21227.

Correspondence. All correspondence with the editor must refer to the manuscript number of the paper. This number will be on the card sent to the author acknowledging receipt of the article.
