

# THE ANNALS *of* STATISTICS

AN OFFICIAL JOURNAL OF  
THE INSTITUTE OF MATHEMATICAL STATISTICS

	PAGE
<b>Articles</b>	
A quadratic measure of deviation of two-dimensional density estimates and a test of independence.....	M. ROSENBLATT 1
Optimal convergence properties of variable knot, kernel, and orthogonal series methods for density estimation.....	GRACE WAHBA 15
Interpolating spline methods for density estimation. I. Equi-spaced knots.....	GRACE WAHBA 30
On asymptotic distribution theory in segmented regression problems—identified case.....	PAUL I. FEDER 49
The log likelihood ratio in segmented regression.....	PAUL I. FEDER 84
On tests for detecting change in mean.....	ASHISH SEN AND MUNI S. SRIVASTAVA 98
Balanced block designs and generalized Youden designs, I. Construction (patchwork).....	J. KIEFER 109
Statistical inference using extreme order statistics.....	JAMES PICKANDS, III 119
Invariant normal models.....	STEEN ANDERSSON 132
Rates of convergence in empirical Bayes estimation problems: Continuous case.....	PI-ERH LIN 155
Central limit theorems for multinomial sums.....	CARL MORRIS 165
A conjecture of Berry regarding a Bernoulli two-armed bandit.....	V. M. JOSHI 189
<b>Short Communications</b>	
A modified form of the iterative method of undiscounted dynamic programming.....	ARIE HORDIJK AND HENK TIJMS 203
Minimax estimators of the mean of a multivariate normal distribution.....	M. E. BOCK 209
On a criterion for extrapolation in normal regression.....	FEDERICO J. O'REILLY 219
Asymptotic normality of the posterior distribution for exponential models.....	BRADFORD R. CRAIN AND RONNIE L. MORGAN 223
On a lower bound for moments of point estimators.....	R. Z. HASMINSKII AND I. A. IBRAGIMOV 228
The rate of convergence of consistent point estimators.....	JAMES C. FU 234
Locally most powerful rank tests for independence with censored data.....	SHINGO SHIRAHATA 241
The Bayes factor against equiprobability of a multinomial population assuming a symmetric Dirichlet prior.....	I. J. GOOD 246
Special case of the distribution of the median.....	S. R. PARANJPE AND HERMAN RUBIN 251
Testing hypotheses in unbalance variance components models for two-way layouts.....	IB THOMSEN 257

Vol. 3, No. 1—January 1975

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

*The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.*

---

## OFFICERS

**President:**

Frederick Mosteller, Department of Statistics, Science Center, Room 603, Harvard University, One Oxford Street, Cambridge, Mass. 02138

**President-Elect:**

Donald L. Burkholder, Department of Mathematics, University of Illinois, Urbana, Illinois 61801

**Executive Secretary:**

George J. Resnikoff, Dean of Graduate Studies, California State University, 25800 Hillary St., Hayward, California 94542

**Program Secretary:**

William L. Harkness, Pennsylvania State University, University Park, Pennsylvania 16801

**Treasurer:**

Robert Elashoff, IMS Business Office, 1367 Laurel Street, San Carlos, California 94070

**Editor: *Annals of Statistics***

I. Richard Savage, Department of Statistics, P.O. Box 2179, Yale Station, New Haven, Connecticut 06520

**Editor: *Annals of Probability***

Ronald Pyke, Department of Mathematics, University of Washington, Seattle, Washington 98195

**Managing Editor:**

Donald R. Truax, Department of Mathematics, University of Oregon, Eugene, Oregon 97403

---

**Membership.** Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$18.00 per year for residents of the United States or Canada and \$12.00 per year for residents of other countries. Special rates of \$9.00 per year are available to students. Rates in each category are one-third higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer of the Institute.

**Subscription Rates.** Current volumes (six issues per calendar year) of the *Annals of Probability* and the *Annals of Statistics* are each \$25.00. Members of the Institute of Mathematical Statistics pay different rates (see above). Single issues are \$5.00. Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volume 1 through 43) may be purchased from the Treasurer.

**The Annals of Statistics**, Volume 3, Number 1, January 1975. Published bimonthly in January, March, May, July, September, and November by The Institute of Mathematical Statistics, IMS Business Office, 1367 Laurel Street, San Carlos, California 94070.

---

Mail to the *Annals of Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer as described above. It should *not* be addressed to Waverly Press.

## EDITORIAL STAFF

### EDITOR

I. RICHARD SAVAGE

### ASSOCIATE EDITORS

ROBERT BERK	DAVID L. HANSON	J. N. K. RAO
PETER J. BICKEL	A. HEDAYAT	J. SETHURAMAN
DAVID R. BRILLINGER	PETER J. HUBER	GALEN R. SHORACK
L. BROWN	JOSEPH B. KADANE	HOWARD TAYLOR
MORRIS H. DEGROOT	JOHAN H. B. KEMPERMAN	CONSTANCE VAN EEDEN
ARTHUR DEMPSTER	CHARLES KRAFT	W. R. VAN ZWET
J. DURBIN	M. R. LEADBETTER	ARTHUR F. VEINOTT, JR.
ROGER H. FARRELL	ALBERT W. MARSHALL	GRACE WAHBA
PETER C. FISHBURN	MICHAEL D. PERLMAN	ROY E. WELSCH
J. K. GHOSH	JOHANN PFANZAGL	DONALD YLVISAKER

### MANAGING EDITOR

K. J. C. SMITH

### PAST EDITORS OF THE ANNALS OF MATHEMATICAL STATISTICS

H. C. CARVER, 1930-1938	WILLIAM KRUSKAL, 1958-1961
S. S. WILKS, 1938-1949	J. L. HODGES, JR., 1961-1964
T. W. ANDERSON, 1950-1952	D. L. BURKHOLDER, 1964-1967
E. L. LEHMANN, 1953-1955	Z. W. BIRNBAUM, 1967-1970
T. E. HARRIS, 1955-1958	INGRAM OLKIN, 1970-1972

### PAST EDITOR OF THE ANNALS OF STATISTICS

INGRAM OLKIN, 1972-1973

---

## EDITORIAL POLICY

The main aim of the *Annals of Statistics* and the *Annals of Probability* is to publish original contributions related to the theory of statistics and probability. The emphasis is on quality, importance and interest; formal novelty and mathematical correctness alone are not sufficient. Particularly appropriate for the *Annals* are important theoretical papers and applied contributions which either stimulate theoretical interest in important new problems or make substantial progress in existing applied areas. Of special interest are authoritative expository or survey articles, whether on theoretical areas of vigorous recent development, or on specific applications. All papers are refereed.

---

## CHANGE OF MANAGING EDITOR

Beginning with the July issue of the *Annals of Probability* and the August issue of the *Annals of Statistics*, the new Managing Editor will be Professor Donald R. Truax, Department of Mathematics, University of Oregon, Eugene, Oregon 97403. Correspondence about manuscripts to appear in issues prior to these should be directed to the current Managing Editor, Professor K. J. C. Smith.

# THE ANNALS OF STATISTICS

## INSTRUCTIONS FOR AUTHORS

**Submission of Papers.** Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with three additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

**Preparation of Manuscripts.** Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

**Submission of Reference Papers.** Copies (preferably two) of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

**Title and Abbreviated Title.** The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law," with the running head "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law", depending on the emphasis to be conveyed.

**Summary.** Each manuscript is required to contain a summary, which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary", followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

**Footnotes.** Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced, on a separate page.

**Key Words.** Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1970 subject classifications. Primary—; Secondary—.

Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use, as an Appendix to *Mathematical Reviews* Index to Volume 39, June 1970. (See, also, *The Notices of the American Mathematical Society*, June 1970, pp. 616–618, for more details.) The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

**List of Symbols.** A completely typewritten list of symbols, identified typographically, not mathematically, should be attached to the manuscript on a separate page. Distinguish between "oh" and "zero"; "ell" and "one"; "kappa" and "kay", etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); other letters will be set in italics.

**Figures and Tables.** Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

**Formulas.** Fractions in the text are preferably written with the solidus or negative exponent; thus,  $(a + b)/(c + d)$  is preferred to  $\frac{a + b}{c + d}$ , and  $(2\pi)^{-1}$  or  $1/(2\pi)$  to  $\frac{1}{2\pi}$ . Also,  $a^{b(c)}$  and  $a_{b(c)}$  are preferred to  $a^{bc}$  and  $a_{bc}$ , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

**References.** References should be typed double-spaced and should follow the style:

[5] Wilks, S. S. (1938). The large-sample distribution of the likelihood ratio for testing composite hypotheses. *Ann. Statist.* 1 60–62.

In textual material, the format "... Wilks (1938) ..." is normally preferred to "... Wilks [5] ...". Multiple references can be distinguished as "... Wilks (1938a) ...". Abbreviations for journals should be taken from *Mathematical Reviews* Index to Volume 40, 1970, pp. 1683–1702.

**Proofs.** Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.)
