

# THE ANNALS of STATISTICS

AN OFFICIAL JOURNAL OF  
THE INSTITUTE OF MATHEMATICAL STATISTICS

## Memorial Article

- L. J. Savage—his work in probability and statistics ..... DENNIS V. LINDLEY 1

## Articles

- Invariant tests for means with covariates. . . . JOHN MARDEN AND MICHAEL D. PERLMAN 25  
 Adaptive multivariate ridge regression . . . . . P. J. BROWN AND J. V. ZIDEK 64  
 ( $k-1$ )-mean significance levels of nonparametric multiple comparisons  
 procedures . . . . . JAN H. OUDE VOSHAAR 75  
 Estimation of quantiles in certain nonparametric models . . . . . R.-D. REISS 87  
 Estimates derived from robust tests . . . . . HELMUT RIEDER 106  
 On efficiency and optimality of quadratic tests . . . . . GAVIN G. GREGORY 116  
 On the asymptotic properties of least-squares estimators in autoregression  
 . . . . . MARTIN J. CROWDER 132  
 Asymptotically efficient selection of the order of the model for estimating  
 parameters of a linear process . . . . . RITEI SHIBATA 147  
 Asymptotic distribution of symmetric statistics . . . . . H. RUBIN AND R. A. VITALE 165  
 Dynkin's identity applied to Bayes sequential estimation of a Poisson  
 process rate . . . . . C. P. SHAPIRO AND ROBERT L. WARDROP 171  
 A new characterization of the Dirichlet distribution through neutrality  
 . . . . . IAN R. JAMES AND JAMES E. MOSIMANN 183  
 A stochastic ordering induced by a concept of positive dependence and  
 monotonicity of asymptotic test sizes . . . . . JOSEF RINOTT AND MOSHE POLLAK 190  
 Ratios of off-diagonal  $C$ -Wishart . . . . . S. SAMN 199  
 Estimation of a common mean and recovery of interblock information  
 . . . . . C. G. BHATTACHARYA 205

## Short Communications

- Distribution of an estimator of the common mean of two normal  
 populations . . . . . K. AIYAPPAN NAIR 212  
 A characterization of the exponential and related distributions by  
 linear regression . . . . . Y. H. WANG AND R. C. SRIVASTAVA 217  
 Sequential point estimation of the difference of two normal means  
 . . . . . MALAY GHOSH AND NITIS MUKHOPADHYAY 221  
 A note on empirical Bayes estimation of a distribution function based on  
 censored data . . . . . E. G. PHADIA 226

Vol. 8, No. 1—January 1980

# THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

*The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.*

---

## OFFICERS

**President:**

George E. P. Box, Department of Statistics, University of Wisconsin, 1210 W. Dayton St., Madison, Wisconsin 53706

**President-Elect:**

Peter Bickel, Department of Statistics, University of California, Berkeley, California 94720

**Past President:**

Samuel Karlin, Department of Mathematics, Stanford University, Stanford, California 94305

**Executive Secretary:**

Martin Fox, Department of Statistics and Probability, Michigan State University, East Lansing, Michigan 48824

**Treasurer:**

Heebok Park, Department of Statistics, California State University, Hayward, California 94542

IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545

**Program Secretary:**

William L. Harkness, Pennsylvania State University, University Park, Pennsylvania 16801

**Editor: *Annals of Statistics***

David V. Hinkley, Department of Applied Statistics, University of Minnesota, St. Paul Campus, St. Paul, Minnesota 55108

**Editor: *Annals of Probability***

Richard M. Dudley, Room 2-245, Massachusetts Institute of Technology, Cambridge, MA 02139

**Managing Editor:**

Donald R. Truax, Department of Mathematics, University of Oregon, Eugene, Oregon 97403

---

**Membership.** Membership dues including a subscription to one *Annals* and *The Institute of Mathematical Statistics Bulletin* are \$32.00 per year for all members. Special rates of \$15.00 per year are available to students. Rates in each category are one-fourth higher for members who wish both *Annals* as well as the *Bulletin*. Inquiries regarding membership in the Institute should be sent to the Treasurer at the Business Office.

**Subscription Rates.** Current volumes (six issues per calendar year) of the *Annals of Probability* are \$40.00. Current volumes (six issues per calendar year) of the *Annals of Statistics* are \$45.00. Members of the Institute of Mathematical Statistics pay different rates (see above). Single issues are \$8.00. Back numbers of both *Annals* and the *Annals of Mathematical Statistics* (Volume 1 through 43) may be purchased from the Treasurer.

**The Annals of Statistics.** Volume 8, Number 1, January 1980. Published bimonthly in January, March, May, July, September, and November by The Institute of Mathematical Statistics, IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545.

---

Mail to the *Annals of Statistics* should be addressed to either the Editor, Managing Editor or the Treasurer, as described above. It should not be addressed to Waverly Press.

## EDITORIAL POLICY

The main purpose of the *Annals of Statistics* and the *Annals of Probability* is to publish contributions to the theory of statistics and probability and to their applications. The emphasis is on importance and interest, not formal novelty and correctness. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. All papers are refereed.

# THE ANNALS OF STATISTICS

## INSTRUCTIONS FOR AUTHORS

**Submission of Papers.** Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with three additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

**Preparation of Manuscripts.** Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

**Submission of Reference Papers.** Copies (preferably two) of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

**Title and Abbreviated Title.** The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "A Limit Theorem for Conditioned Recurrent Random Walk Attracted to a Stable Law," with the running head "Limit Theorem for Recurrent Random Walk" or possibly "Recurrent Random Walk Attracted to a Stable Law," depending on the emphasis to be conveyed.

**Summary.** Each manuscript is required to contain a summary, which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary," followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

**Footnotes:** Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced, on a separate page.

**Key Words.** Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1970 subject classifications. Primary—; Secondary—.  
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use, as an Appendix to *Mathematical Reviews* Index to Volume 39, June 1970. (See, also, *The Notices of the American Mathematical Society*, June 1970, *Bulletin of the Institute of Mathematical Statistics*, September 1974; or a current index issue of *Mathematical Reviews*.) The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

**Identification of Symbols.** Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "kappa" and "kay," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); other letters will be set in italics. Acronyms should be introduced sparingly.

**Figures and Tables.** Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

**Formulas.** Fractions in the text are preferably written with the solidus or negative exponent; thus,  $(a + b)/(c + d)$  is preferred to  $\frac{a + b}{c + d}$ , and  $(2\pi)^{-1}$  or  $1/(2\pi)$  to  $\frac{1}{2\pi}$ . Also,  $a^{b(c)}$  and  $a_{b(c)}$  are preferred to  $a^{bc}$  and  $a_{bc}$ , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

**References.** References should be typed double-spaced and should follow the style:

- [5] Wilks, S. S. (1938). The large-sample distribution of the likelihood ratio for testing composite hypotheses. *Ann. Statist.* 1 60–62.

In textual material, the format ". . . Wilks (1938) . . ." is normally preferred to ". . . Wilks [5] . . ." Multiple references can be distinguished as ". . . Wilks (1938a) . . ." Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

**Proofs.** Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.)
