

The Institute of Mathematical Statistics

announces the publication of

Directions in Time Series

Table of Contents

Keynote Address

Can We Predict Where "Time Series" Should Go Next? John W. Tukey

Time Series Models

Parametric Time Series with Some Applications George E. P. Box

Maximum Likelihood Estimation for Vector Autoregressive Moving Average Models T. W. Anderson

Computer Packages and Graphics

What Will Your Time Series Analysis Computer Package Do? David J. Pack

Time Series Modeling, Spectral Analysis, and Forecasting Emanuel Parzen

Some Remarks on Time Series Graphics William S. Cleveland and Douglas M. Dunn

Econometric Models

Some Recent Developments in Seasonal Adjustment David A. Pierce

Comments. John Geweke

On the Synthesis of Time Series and Econometric Models C. W. J. Granger

Comments. John Geweke

Comments. Kenneth F. Wallis

Control Theory and Engineering Applications

On the Identification of State Space Models and Their Use in Control

Hirotsugu Akaike

System Identification, Kalman Filtering, and Stochastic Control M. B. Priestley

Self-Tuning Algorithms for Control, Prediction and Smoothing Bjorn Wit-tenmark

Robust Methods

Robust Estimation of Autoregressive Models R. Douglas Martin

Comments. Robert B. Miller

Continuous Processes and Periodic Models

Continuous Model Fitting from Discrete Data P. M. Robinson

Comments. David A. Dickey

Some Recent Advances in Autoregressive Processes Marcello Pagano

Comments. Herbert T. Davis

List Price \$20.00

(Members) \$15.00

The Writings of Leonard Jimmie Savage —A Memorial Selection

The American Statistical Association and
The Institute of Mathematical Statistics
announce publication of the selected works of Jimmie Savage

Contents include:

- 45 selected reprints of papers published between 1940–1977, photographed from the original sources
- Biographical sketches and personal insights by W. Allen Wallis, Frederick Mosteller, Francis Anscombe, and William and Esther Sleator
- Scholarly essay, "L.J. Savage—His Work in Probability and Statistics," by D. V. Lindley
- Complete bibliography of all published papers, books, reviews, and discussions by Savage

736 pages, bound in blue kidskin

Papers included:

A Dynamic Problem in Duopoly
On the Crossing of Extremals at Focal Points
Unbiased Estimates for Certain Binomial Sampling Problems with Applications
The Application of Vectorial Methods to Metric Geometry
A Uniqueness Theorem for Unbiased Sequential Binomial Estimation
Abandoning an Experiment Prior to Completion
Planning Experiments Seeking Maxima
Samuelson's Foundations: Its Mathematics
The Utility Analysis of Choices Involving Risk
Application of the Radon-Nikodym Theorem to the Theory of Sufficient Statistics
Bayes and Minimax Estimates for Quadratic Loss Functions
The Theory of Statistical Decision
On the Set of Values of a Nonatomic, Finitely Additive, Finite Measure
The Expected-Utility Hypothesis and the Measurability of Utility
* Une Axiomatisation de Comportement Raisonnable Face à l'Incertain
Three Problems in Rationing Capital
Symmetric Measures on Cartesian Products

* Reprinted in original language

The Nonexistence of Certain Statistical Procedures in Nonparametric Problems When Different Pairs of Hypotheses Have the Same Family of Likelihood-Ratio Test Regions
Recent Tendencies in the Foundations of Statistics
Optimal Gambling Systems
The Foundations of Statistics Reconsidered
* Sul Modo di Scegliere le Probabilità Iniziali
* Campi di Applicazione e Tecniche della Statistica
* Uno Sguardo Sulla Statistica di Oggi
* Il Problema delle Strategie Ottime di Gioco
Bayesian Statistics
Bayesian Statistical Inference for Psychological Research
A Tchebycheff-Like Inequality for Stochastic Processes
Finite Stopping Time and Finite Expected Stopping Time
Difficulties in the Theory of Personal Probability
Implications of Personal Probability for Induction
A Geometrical Approach to the Special Stable Distributions
Comments on a Weakened Principle of Conditionality
Reading Suggestions for the Foundations of Statistics
A Generalized Unimodality
* Die Bayessche Entwicklungsstufe der Statistischen Schlussweise
Elicitation of Personal Probabilities and Expectations
The Characteristic Function Characterized and the Momentousness of Moments
The Mathematics of Glottochronology Revisited
Diagnosis and the Bayesian Viewpoint
Inequalities on the Probability Content of Convex Regions for Elliptically Contoured Distributions
Probability in Science: A Personalistic Account
On Rereading R.A. Fisher
The Shifting Foundations of Statistics

Order through IMS.

\$39.00 (Nonmembers)

Essays on the Prediction Process by Frank Knight

This work concerns a new approach to continuous time random processes due originally to the author, but extended and consolidated by P. A. Meyer and others. It is a fluid and subjective approach, in distinction to the rigid and objective one prevalent in other treatments. This leads to a broad unification of method, and consequently to a setting of almost universal applicability. Each of the four essays contains a different aspect of the subject, without being exhaustive.

Essay I. Introduction, Construction, and Fundamental Properties. . . .

- 0. Introduction
- 1. The Prediction Process of a Right-Continuous Process with Left Limits
- 2. Prediction Spaces and Ray Topologies
- 3. A View Toward Applications
- References

Essay II. Continuation of an Example of C. Dellacherie

- 1. The Process R_t
- 2. The Prediction Process of R_t
- 3. Connections With the General Prediction Process
- References

Essay III. Construction of Stationary Strong-Markov Transition Probabilities

- References

Essay IV. Application of the Prediction Process to Martingales

- 0. Introduction
- 1. The Martingale Prediction Spaces
- 2. Transition to the Initial Setting: The Levy System of a Process
- 3. On Continuous Local Martingales
- References

List Price \$10.00
 IMS Member 8.00

ANNALS OF PROBABILITY

Vol. 11

May 1983

No. 2

Articles

- A conditioned limit theorem for random walk and Brownian local time on square root boundaries
PRISCILLA GREENWOOD AND EDWIN PERKINS
- Stable limits for partial sums of dependent random variables
RICHARD A. DAVIS
- A new proof of the Hartman-Wintner law of the iterated logarithm
ALEJANDRO DE ACOSTA
- Pointwise translation of the Radon transform and the general central limit problem M. G. HAHN, P. HAHN AND M. J. KLASS
- The behavior of asymmetric Cauchy processes for large time
WILLIAM E. PRUITT AND JAMES TAYLOR
- Asymptotic normality of statistics based on the convex minorants of empirical distribution functions
PIET GROENEBOOM AND RONALD PYKE
- On the order of magnitude of cumulants of Von Mises functionals and related statistics R. N. BHATTACHARYA AND M. L. PURI
- Sets which determine the rate of convergence in the central limit theorem PETER HALL
- The motion of a tagged particle in the simple symmetric exclusion system on Z RICHARD ARRATIA
- High density limit theorems for infinite systems of unscaled branching Brownian motions LUIS GOROSTIZA
- A simple criterion for transience of a reversible Markov chain
TERRY LYONS
- Exponential moments for hitting times of uniformly ergodic Markov processes RENÉ CARMONA AND ABEL KLEIN
- Minimization algorithms and random walk on the d -cube
DAVID ALDOUS
- A bound on the size of point clusters of a random walk with stationary increments HENRY BERBEE
- Stationarity on finite strings and shift register sequences
ARIF ZAMAN
- Approximating IMRL distributions by exponential distributions, with applications first passage times MARK BROWN
- On the distributions related to transitive closures of random finite mappings BORIS PITTEL
- The advantage of using non-measurable stop rules
THEODORE P. HILL AND VICTOR C. PESTIEN
- Rotational representations of stochastic matrices STEVE ALPERN

Short Communications

- Association of normal random variables and Slepian's inequality
KUMAR JOAG-DEV, MICHAEL PERLMAN, AND LOREN PITT
- Weak convergence to Brownian excursion R. M. BLUMENTHAL
- On the splicing of measures
G. KALLIANPUR AND D. RAMACHANDRAN
- An explicit formula for the C.D.F. of the L_1 norm of the Brownian bridge
B. MCK. JOHNSON AND T. KILLEEN

Corrections and Acknowledgements

- Erratum* "Laplace's Method for Gaussian Integrals with an Application to Statistical Mechanics" . . . RICHARD S. ELLIS AND JAY S. ROSEN
- Acknowledgment of priority S. S. MITRA

Contents (continued)

Short Communications

Consistency of the least squares estimator of the first order moving average parameter	BRIAN D. MACPHERSON AND WAYNE A. FULLER	326
Invariantly sufficient equivariant statistics and characterizations of normality in translation classes	W. EBERL, JR.	330
Covariance matrices characterization by a set of scalar partial autocorrelation coefficients	HIDEAKI SAKAI	337
Statistical and algebraic independence	JAMES D. MALLEY	341

Notes and Corrections

Correction to "Optimal strategies for a class of constrained sequential problems"	JOSEPH B. KADANE AND HERBERT A. SIMON	346
Correction to "Remarks on Bahadur efficiency of conditional tests"	I. V. BASAWA	347
Correction to "Asymptotic lognormality of P-values"	D. LAMBERT AND W. J. HALL	348
Correction to "Balanced repeated measurements designs"	CHING-SHUI CHENG AND CHIEN-FU WU	349
