

THE ANNALS of STATISTICS

ISSN (0090-5364)

AN OFFICIAL JOURNAL OF
THE INSTITUTE OF MATHEMATICAL STATISTICS

Memorial Articles

Jack Carl Kiefer 1924-1981	JEROME SACKS	403
The research of Jack Kiefer outside the area of experimental design	LAWRENCE D. BROWN	406*
Jack Kiefer's contributions to experimental design	HENRY P. WYNN	416
The publications and writings of Jack Kiefer		424

Articles

Optimum and minimax exact treatment designs for one-dimensional auto-regressive error processes	JACK KIEFER AND HENRY P. WYNN	431
An alternative to Student's <i>t</i> -test for problems with indifference zones	LAWRENCE D. BROWN AND HAROLD SACKROWITZ	451
Asymptotic normality and the bootstrap in stratified sampling	PETER J. BICKEL AND D. A. FREEDMAN	470
Invariance principle for symmetric statistics	AVI MANDELBAUM AND MURAD S. TAQQU	483
Estimation for the multivariate errors-in-variables model with estimated error covariance matrix	YASUO AMEMIYA AND WAYNE A. FULLER	497
Second order efficiency in the sequential design of experiments	ROBERT W. KEENER	510
Sequential determination of estimator as well as sample size	ADAM T. MARTINSEK	533
Sequential linear rank tests for two-sample censored survival data	ERIC V. SLUD	551
Asymptotic behavior of two-sample rank tests in the presence of random censoring	SUE LEURGANS	572
Consistency results for linear regression with censored data	I. R. JAMES AND P. J. SMITH	590
Regression models with infinitely many parameters: Consistency of bounded linear functionals	KER-CHAU LI	601
Uniform consistency of a class of regression function estimators	W. HÄRDLE AND S. LUCKHAUS	612
A law of the iterated logarithm for nonparametric regression function estimators	WOLFGANG HÄRDLE	624
Bayesian nonparametric inference for quantal response data	LARRY P. AMMANN	636
Signal extraction for nonstationary time series	WILLIAM BELL	646
On the sinusoidal limit of stationary time series	BENJAMIN KEDEM	665
Admissible estimators for the total of a stratified population that employ prior information	STEPHEN VARDEMAN AND GLEN MEEDEN	675
Bounds on AREs for restricted classes of distributions defined via tail-orderings	WEI-YIN LOH	685
Optimal simultaneous confidence bounds	DANIEL Q. NAIMAN	702
A robustification of the sign test under mixing conditions	M. FALK AND W. KOHNE	716

Short Communications

Asymptotic equivalence between the Cox estimator and the general ML estimators of regression and survival parameters in the Cox model	KENT R. BAILEY	730
The likelihood ratio detector for non-Gaussian infinitely divisible, and linear stochastic processes	PATRICK L. BROCKETT	737
A conditional property of invariant confidence and prediction regions	PETER M. HOOPER	745
A note on selecting parametric models in Bayesian inference	WILLIAM S. KRASKER	751
Asymptotic properties of criteria for selection of variables in multiple regression	RYUEI NISHII	758
Smooth optimum kernel estimators of densities, regression curves and modes	HANS-GEORG MÜLLER	766
A note on nonparametric trend conformity	FRIEDRICH PUKELSHEIM	775
Comments on a paper by T. Amemiya on estimation in a dichotomous logit regression model	LINDA DAVIS	778

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS

President:

Ingram Olkin, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

President-Elect:

Oscar Kempthorne, Department of Statistics, Iowa State University, Ames, Iowa 50011

Past President:

Patrick Billingsley, Department of Statistics, University of Chicago, Chicago, Illinois 60637

Executive Secretary:

Kjell Doksum, Department of Statistics, University of California, Berkeley, California 94720

Treasurer:

Bruce E. Trumbo, Department of Statistics, California State University, Hayward, California 94542. *Send correspondence to:* IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545

Program Secretary:

Richard A. Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706

Editor: *The Annals of Statistics*

Michael D. Perlman, Department of Statistics, GN-22, University of Washington, Seattle, Washington 98195

Editor: *The Annals of Probability*

Harry Kesten, Department of Mathematics, Cornell University, Ithaca, N.Y. 14853

Editor: *The IMS Bulletin*

William C. Guenther, Department of Statistics, University of Wyoming. *Send correspondence to:* Box 3332, University Station, Laramie, Wyoming 82071.

Editor: *IMS Lecture Notes-Monograph Series*

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:

Prem K. Goel, Department of Statistics, The Ohio State University, Columbus, Ohio 43210

Official Journals. The official journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *The Institute of Mathematical Statistics Bulletin*.

Individual and Institutional Memberships. All *individual members* receive the *Bulletin*. Annual dues for individual membership depend upon the journals selected (\$52 for both *Annals*/ \$40 for one *Annals*). Dues allocations to each journal are set by Council resolution for regular members at \$6 for *The IMS Bulletin* and \$34 for one *Annals* or \$23 for each *Annals*. Subject to some restrictions, memberships are available at reduced rates for students (\$21/\$17), residents of developing countries (\$35/\$28), and retired members (\$11/\$6/\$1 for the *Bulletin* only). *Institutional memberships* are available at \$200 per year and include two copies for multiple readership of all three journals.

Individual and General Subscriptions. Subscriptions are available on a calendar year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1984 are available to *The Annals of Statistics* (\$45), *The Annals of Probability* (\$45), and *The IMS Bulletin* (\$11).

General subscriptions are for libraries, institutions, and any multiple-readership use. General subscriptions for 1984 are available to *The Annals of Statistics* (\$66), *The Annals of Probability* (\$62), and *The IMS Bulletin* (\$20). Air mail rates for overseas delivery of general subscriptions are quoted upon request.

Correspondence. Mail to IMS should be sent to the Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production), and *not* to Waverly Press.

The Annals of Statistics, (ISSN 0090-5364), Volume 12, Number 2, June, 1984. Published in March, June, September and December by the Institute of Mathematical Statistics, 3401 Investment Blvd, #6, Hayward, California 94545. Printed at the Waverly Press, Inc., Baltimore, Maryland 21202. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster.** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Blvd, #6, Hayward, California 94545.

EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of the *Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to the *Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) The original (or xerox copy) should be submitted with three additional copies on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. Dittoed or mimeographed papers are acceptable only if completely legible; xerox copies are preferable. When technical reports are submitted, all extraneous sheets and covers should be removed.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title and Abbreviated Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent. An abbreviated title to be used as a running head is also required, and should be given below the main title. This should normally not exceed 35 characters. For example, a title might be "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," with the running head "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Summary. Each manuscript is required to contain a summary, which will be printed immediately after the title, clearly separated from the rest of the paper. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. It should be typed on a separate page, under the heading "Summary," followed by the title of the paper. Formulas should be used as sparingly as possible. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should be reduced to a minimum and, where possible, should be replaced by remarks in the text or in the references; formulas in footnotes should be avoided. Footnotes in the text should be identified by superscript numbers and typed together, double-spaced, on a separate page.

Key Words. Included as the first footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; Secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero", "ell" and "one"; "epsilon" and "element of"; "kappa" and "kay," etc. Indicate also when special type is required (Greek, German, script, bold-face, etc.); other letters will be set in italics. Acronyms should be introduced sparingly.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions in the text are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and $(2\pi)^{-1}$ or

$1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred to a^{bc}

and a_{bc} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Doob, J.L. (1944). The elementary Gaussian processes. *Ann. Math. Statist.* **15** 229–282.

In textual material, the format "... Doob (1944) ..." should be used. Multiple references can be distinguished as "... Doob (1944a) ...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Proofs. Author will ordinarily receive galley proofs. Corrected galley proofs should be sent to the Managing Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.)

The Annual Index to the Statistical
Literature of the World

CURRENT INDEX TO STATISTICS APPLICATIONS, METHODS AND THEORY VOLUME 8 (1982) NOW AVAILABLE

- Nearly 6900 articles from "core" and "related" journals indexed for 1982.
- Complete coverage of 59 journals in statistics and related fields.
- Statistics articles selected and indexed from over 400 other journals.
- Subject index lists each article alphabetically according to each *important word* in its title.
- Subject index also lists articles alphabetically according to *key words* not appearing in the title.
- Author index lists each article under the name of each author.
- Reasonable prices:
 - IMS/ASA Members — \$13
 - Other individuals — \$18
 - Other institutions — \$26

Published jointly by the Institute of Mathematical Statistics and the American Statistical Association. Volumes 2–8 are available now at the above prices. Publication of Volume 9 (1983) is expected late in 1984. Orders for Volume 9 are now being accepted at the above prices, with shipping upon availability. Please specify applicable rate and volume number(s) desired. Order prepaid from:
