Memorial Article

Julius R. Blum 1922-1982 M. ROSENBLATT AND F. J. SAMANIEGO 1

The 1983 Rietz Memorial Lecture

The analysis of cross-classified data having ordered and/or unordered categories:
Association models, correlation models, and asymmetry models
for contingency tables with or without missing entries LEO A. GOODMAN 10

Articles

- The dip test of unimodality J. A. HARTIGAN AND P. M. HARTIGAN 70
Asymptotic properties of \bar{w} , an estimator of the ED50 suggested for use in
up-and-down experiments in bio-assay CHRISTOPHER D. KERSHAW 85
Bootstrap tests and confidence regions for functions of a covariance matrix
RUDOLF BERAN AND MUNI S. SRIVASTAVA 95
Edgeworth corrected pivotal statistics and the bootstrap
LAVY ABRAMOVITCH AND KESAR SINGH 116
Asymptotic properties of censored linear rank tests JACK CUZICK 133
A combinatoric approach to the Kaplan-Meier estimator DAVID MAURO 142
A heavy censoring limit theorem for the product limit estimator JON A. WELLNER 150⁷
Estimating a distribution function with truncated data MICHAEL WOODROOFE 163
Empirical distributions in selection bias models Y. VARDI 178
Discussion on Vardi's paper C. L. MALLOWS 204
Optimal detection of a change in distribution MOSHE POLLAK 206
Sequential nonparametric fixed-width confidence intervals for U -statistics
RAYMOND N. SPROULE 228
A Newton-Raphson version of the multivariate Robbins-Monro procedure
DAVID RUPPERT 236
Adaptive estimators for simultaneous estimation of Poisson means H. M. HUDSON 246
The admissibility of the empirical distribution function
MICHAEL P. COHEN AND LYNN KUO 262
On some shrinkage estimators of multivariate location
PRANAB KUMAR SEN AND A. K. MD. EHSANES SALEH 272
All admissible linear estimators of a multivariate Poisson mean
L. D. BROWN AND R. H. FARRELL 282
Universal domination and stochastic domination: Estimation
simultaneously under a broad class of loss functions JIUNN TZON HWANG 295
Optimal goodness-of-fit tests for location/scale families of distributions
based on the sum of squares of L -statistics
VINCENT N. LARICCIA AND DAVID M. MASON 315
Adaptive estimates of parameters of regular variation
PETER HALL AND A. H. WELSH 331
Consistency and asymptotic normality of the maximum likelihood estimator
in generalized linear models LUDWIG FAHRMEIR AND HEINZ KAUFMANN 342
Asymptotic properties of minimization estimators for time series
parameters DANIEL MACRAE KEENAN 369
Optimal designs for trigonometric and polynomial regression using
canonical moments TAI-SHING LAU AND W. J. STUDDEN 383
Proper action in steps, with application to density ratios of maximal
invariants ROBERT A. WIJSMAN 395
On the asymptotic behaviour of empirical Bayes tests for the continuous
one-parameter exponential family THEO STIJNEN 403

Short Communications

- Inconsistency of the maximum likelihood estimator of a distribution having
increasing failure rate average
R. A. BOYLES, A. W. MARSHALL AND F. PROSCHAN 413
Further contributions to the "two-armed bandit" problem ROBERT KEENER 418
A converse to Scheffé's theorem DENNIS D. BOOS 423
Asymptotic normality of the kernel quantile estimator MICHAEL FALK 428

Vol. 13, No. 1—March 1985

50th Anniversary Year

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS AND EDITORS

President:

Oscar Kempthorne, Department of Statistics, 111B Snedecor Hall, Iowa State University, Ames, Iowa 50011

President-Elect:

Paul Meier, Department of Statistics, University of Chicago, 5734 University Avenue, Chicago, Illinois 60637

Past President:

Ingram Olkin, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

Executive Secretary:

Francisco J. Samaniego, Division of Statistics, 469 Kerr Hall, University of California, Davis, California 95616

Treasurer:

Bruce E. Trumbo, Department of Statistics, California State University, Hayward. *Send correspondence to: IMS Business Office, 3401 Investment Blvd., Suite 6, Hayward, California 94545*

Program Secretary:

Richard A. Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton St., Madison, Wisconsin 53706

Editor: *The Annals of Statistics*

Michael D. Perlman, Department of Statistics GN-22, University of Washington, Seattle, Washington 98195

Editor: *The Annals of Probability*

Thomas M. Liggett, Department of Mathematics, University of California, Los Angeles, California 90024

Executive Editor: *Statistical Science*

Morris H. DeGroot, Department of Statistics, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213

Editor: *The IMS Bulletin*

William C. Guenther, Department of Statistics, University of Wyoming, Laramie. *Send correspondence to: Box 3332 University Station, Laramie, Wyoming 82071.*

Editor: *IMS Lecture Notes-Monograph Series*

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:

Prem K. Goel, Department of Statistics, 1958 Neil Avenue, The Ohio State University, Columbus, Ohio 43210

Official Journals. The official journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *The Institute of Mathematical Statistics Bulletin*.

Individual, Institutional and Corporate Memberships. All individual members receive the *Bulletin*. Annual dues for individual membership depend upon the journals selected (\$52 for both *Annals*/\$40 for one *Annals*). Dues allocations to each journal are set by Council resolution for regular members at \$6 for *The IMS Bulletin* and \$34 for one *Annals* or \$23 for each *Annals*. Subject to some restrictions, memberships are available at reduced rates for students (\$21/\$17), residents of developing countries (\$35/\$28), and retired members (\$11/\$6/\$1 for the *Bulletin* only). *Institutional memberships* are available to nonprofit organizations at \$215 per year and *Corporate memberships* are available to other organizations at \$500 per year. Institutional and corporate memberships include two multiple-readership copies of all three journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar year basis. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1985 are available to *The Annals of Statistics* (\$45), *The Annals of Probability* (\$45), and *The IMS Bulletin* (\$11).

General subscriptions are for libraries, institutions, and any multiple-readership use. General subscriptions for 1985 are available to *The Annals of Statistics* (\$75), *The Annals of Probability* (\$70), both *Annals* (\$140), and *The IMS Bulletin* (\$20). Air mail rates for overseas delivery of general subscriptions are \$40 per subscription.

Correspondence. Mail to IMS should be sent to the Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production).

***The Annals of Statistics*, (ISSN 0090-5364)**, Volume 13, Number 1, March, 1985. Published in March, June, September and December by the Institute of Mathematical Statistics, 3401 Investment Blvd, #7, Hayward, California 94545. Printed at the Waverly Press, Inc., Baltimore, Maryland 21202. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster.** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Blvd, #7, Hayward, California 94545.

EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of the *Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to the *Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of the *Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) **Four copies** should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also **required**. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head. "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; Secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical*

Reviews Annual Subject Index-1980. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$$(a + b)/(c + d) \text{ is preferred to } \frac{a + b}{c + d}, \text{ and } (2\pi)^{-1} \text{ or}$$

$$1/(2\pi) \text{ to } \frac{1}{2\pi}. \text{ Also, } a^{b(c)} \text{ and } a_{b(c)} \text{ are preferred to } a^{bc}$$

and a_{bc} , respectively. Complicated exponentials should be represented with the symbol *exp*. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836–865.

In textual material, the format "... Kiefer (1976) ..." should be used. Multiple references can be distinguished as "... Kiefer (1976a) ...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Addresses. The permanent address of each author should be typed following the references.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Waverly Press, Inc., Mt. Royal and Guilford Aves., Baltimore, MD 21202.

Correspondence. All correspondence with the editor must refer to the manuscript number of the paper. This number will be on the card sent to the author acknowledging receipt of the article.
