**“When I made us a two-paycheck family, we decided to get extra protection with IMS Members’ Life Insurance...”**

“...To do all that we wanted to do, and live the way we like, we had to become a two-paycheck family. Now we’ve made sure that our family’s lifestyle will be maintained even if one of us is no longer here.”

How much insurance should you have? Today, many financial advisors suggest a minimum of four to five times your annual salary in life insurance.

With our low group rates, there should be no question where to get this extra life insurance to keep pace with your growing needs.

And our members have the extra advantage of having life insurance that goes

with them if they change jobs, as long as they remain members.

If you are a two-paycheck family, take the time to see how your insurance portfolio is standing up to your needs. Then, for extra insurance protection, call or write the Administrator.

**UP TO \$195,000 IN  
TERM LIFE INSURANCE PROTECTION IS  
AVAILABLE TO IMS MEMBERS.**

# TURN YOUR IBM PC® INTO AN EXPERIENCED TECHNICAL TYPIST WITH SUPERSCRIPT™

$$F(x) = \frac{1}{\sqrt{2\pi}} \int_{-\infty}^x e^{-\frac{1}{2}y^2} dy$$

SuperScript software lets you type any mathematical expression—at any size—and insert it anywhere in your text.

Create your own special characters and symbols using SuperScript.

You see on your screen exactly what will be printed—displayed in large, easily read characters.

Works on a standard IBM PC with graphics adapter, standard dot matrix printer and your existing word processing software. SuperScript requires no added hardware or boards.

Power. Flexibility. Affordability. Check out SuperScript. It doesn't just make technical typing possible. It makes it fast and easy.

Write or call Technical Support Software, Inc., P.O. Box 289, Chestnut Hill, MA 02167, 617-734-4130

# The Writings of Leonard Jimmie Savage —A Memorial Selection

The American Statistical Association and  
The Institute of Mathematical Statistics  
announce publication of the selected works of Jimmie Savage

## Contents include:

- 45 selected reprints of papers published between 1940–1977, photographed from the original sources
- Biographical sketches and personal insights by W. Allen Wallis, Frederick Mosteller, Francis Anscombe, and William and Esther Sleator
- Scholarly essay, "L.J. Savage—His Work in Probability and Statistics," by D. V. Lindley
- Complete bibliography of all published papers, books, reviews, and discussions by Savage

736 pages, bound in blue kidskin

## Papers included:

A Dynamic Problem in Duopoly  
On the Crossing of Extremals at Focal Points  
Unbiased Estimates for Certain Binomial Sampling Problems with Applications  
The Application of Vectorial Methods to Metric Geometry  
A Uniqueness Theorem for Unbiased Sequential Binomial Estimation  
Abandoning an Experiment Prior to Completion  
Planning Experiments Seeking Maxima  
Samuelson's Foundations: Its Mathematics  
The Utility Analysis of Choices Involving Risk  
Application of the Radon-Nikodym Theorem to the Theory of Sufficient Statistics  
Bayes and Minimax Estimates for Quadratic Loss Functions  
The Theory of Statistical Decision  
On the Set of Values of a Nonatomic, Finitely Additive, Finite Measure  
The Expected-Utility Hypothesis and the Measurability of Utility  
\* Une Axiomatisation de Comportement Raisonnable Face à l'Incertain  
Three Problems in Rationing Capital  
Symmetric Measures on Cartesian Products

\* Reprinted in original language

The Nonexistence of Certain Statistical Procedures in Nonparametric Problems When Different Pairs of Hypotheses Have the Same Family of Likelihood-Ratio Test Regions  
Recent Tendencies in the Foundations of Statistics  
Optimal Gambling Systems  
The Foundations of Statistics Reconsidered  
\* Sul Modo di Scegliere le Probabilità Iniziali

The Annual Index to the Statistical  
Literature of the World

# CURRENT INDEX TO STATISTICS APPLICATIONS, METHODS AND THEORY VOLUME 8 (1982) NOW AVAILABLE

- Nearly 6900 articles from "core" and "related" journals indexed for 1982.
- Complete coverage of 59 journals in statistics and related fields.
- Statistics articles selected and indexed from over 400 other journals.
- Subject index lists each article alphabetically according to each *important word* in its title.
- Subject index also lists articles alphabetically according to *key words* not appearing in the title.
- Author index lists each article under the name of each author.
- Reasonable prices:
  - IMS/ASA Members — \$13
  - Other individuals — \$18
  - Other institutions — \$26

Published jointly by the Institute of Mathematical Statistics and the American Statistical Association. Volumes 2–8 are available now at the above prices. Publication of Volume 9 (1983) is expected late in 1984. Orders for Volume 9 are now being accepted at the above prices, with shipping upon availability. Please specify applicable rate and volume number(s) desired. Order prepaid from:

*Empirical Processes* by Peter Gaenssler

This volume is mainly concerned with Glivenko-Cantelli results for empirical measures and with functional Central Limit Theorems for empirical  $C$ -processes. Specifically, the functional Central Limit Theorems assume independent, identically distributed observations in arbitrary sample spaces and are derived using a general theory of weak convergence for non-Borel measures on a metric space. This theory, initiated by R.M. Dudley and further studied by M.J. Wichura, is developed here in full and in a context that leads to a broad unification and simplification of previous methods for obtaining functional Central Limit Theorems. The approach applies to results beginning with Donsker's famous theorem for the uniform empirical process up to the most general cases known today.

The basic point of view of this volume is probabilistic, but it is hoped that the presentation, with its set-indexed context, might also lead to new approaches to inference for spatial data.

The main topics covered are as follows:

**Glivenko-Cantelli convergence**

The Vapnik-Chervonenkis Theory with some extensions

**Weak convergence of non-Borel measures on a metric space**

Portmanteau Theorem

Continuous mapping theorems

Product spaces

Sequential compactness

Skorokhod-Dudley-Wichura Representation Theorem

The space  $D[0, 1]$

Random change of time

**Functional Central Limit Theorems**

For empirical  $C$ -processes

For weighted empirical processes

List price . . . . . \$20.00

***Zonal Polynomials*** by Akimichi Takemura

This monograph is a self-contained development of zonal polynomials in the framework of standard multivariate analysis. Except for the usual tools of multivariate normal distribution theory and linear algebra, no extensive mathematical background is assumed. This contrasts with earlier treatments of the theory of zonal polynomials. It is hoped that the present approach will make zonal polynomials and the theory of noncentral distributions in multivariate analysis accessible to a much wider audience.

**CONTENTS**

1. Introduction
  2. Preliminaries on partitions and homogeneous symmetric polynomials
    - Partitions
    - Homogeneous symmetric polynomials
  3. Derivation and some basic properties of zonal polynomials
    - Definition of zonal polynomials
    - Integral identities involving zonal polynomials
    - An integral representation of zonal polynomials
    - A generating function of zonal polynomials
  4. More properties of zonal polynomials
    - Majorization ordering
    - Evaluation at identity matrices
    - Coefficients of elementary symmetric functions
    - Coefficients of monomial symmetric functions
    - Coefficients of power sums
    - Variations of the integral representation of zonal polynomials
  5. Complex zonal polynomials
    - The complex normal and the complex Wishart distributions
    - Derivation and properties of complex zonal polynomials
    - Schur functions
    - Relation between the real and the complex zonal polynomials
- References

List price . . . . . \$15.00

IMS member price . . . . \$ 9.00

***Inequalities in Statistics and Probability*** edited by Y.L. Tong,  
with the cooperation of I. Olkin, M.D. Perlman, F. Proschan and C.R. Rao

This volume comprises the proceedings of the Symposium on Inequalities in Statistics and Probability held in Lincoln, Nebraska during October 1982. (The Symposium was sponsored by the National Science Foundation, the Office of Naval Research, and the University of Nebraska. Typesetting of the volume was supported by the University of Nebraska.)

Introduction by Y.L. Tong

### **Inequalities via Partial Orderings**

*Stochastic Rearrangement Inequalities* by C. D'Abadie and F. Proschan

*On Group Induced Orderings* by M.L. Eaton

*Invariant Ordering* by D.R. Jensen

### **Convex and Matrix-related Inequalities**

*Inequalities for Random Evolutions* by J.E. Cohen

*On  $TP_2$  and Log-Concavity* by S. Das Gupta and S.K. Sarkar

*Generalized Holder's Inequality* by M. Freimer and G.S. Mudholkar

*Sampling and Majorization Inequalities* by S. Karlin and Y. Rinott

*Entropy and Diversity* by C.R. Rao

### **Probabilistic and Distribution-free Inequalities**

*Sharp Martingale Inequalities* by D.C. Cox

*Least Absolute Value and Median Polish* by J.H.B. Kemperman

*Markov's Inequality* by A.W. Marshall

*Isoperimetric Inequality* by R.A. Vitale

*Efron-Stein Inequality* by R.A. Vitale

### **Dependence-related Inequalities**

*Chebyshev's Other Inequality* by A.M. Fink and M. Jodeit, Jr.

*FKG Inequality* by K. Joag-Dev, L.A. Shepp, and R.A. Vitale

*Independence and Limit Theorems* by C.M. Newman

*Stochastic Ordering of Spacings* by M. Shaked and Y.L. Tong

### **Inequalities in Regression and Multivariate Analysis**

*Ordering of Scheffé Polyhedra* by R. Bohrer and H.P. Wynn

*Slepian's Theorem* by S.W. Dharmadhikari and K. Joag-Dev

*Moment Inequalities* by T.L. Lai and C.Z. Wei

*Log-Eigenvalues of a Wishart Matrix* by M.D. Perlman

### **Inequalities in Stochastic Optimization and Reliability**

*Stochastic Program Approximations* by J.R. Birge and R. J.-B. Wets

*Comparing Coherent Systems* by H.W. Block and W. de Souza Borges

*Multivariate Life Classes and Inequalities* by T.H. Savits

### **Inequalities in Selecting and Ordering Populations**

*Monotonicity in Selection* by R.L. Berger and F. Proschan

*Multinomial Selection* by P. Chen and M. Sobel

*Selection and Ranking Inequalities* by S.S. Gupta, D.-Y. Huang, and S. Panchapakesan

### **Trends and Order Restrictions**

*Dual Convex Cones* by R.L. Dykstra

*Trends in Poisson Intensities* by R. Magel and F.T. Wright

*Conformity to a Trend* by T. Robertson and F.T. Wright

Order prepaid from:

## IMS LECTURE NOTES – MONOGRAPH SERIES

This series provides an avenue for the rapid, but carefully refereed, publication of important research results in comprehensive form and expository style. These volumes should be of great value to researchers and advanced students in statistics, probability, and related fields. The series editor is Shanti S. Gupta, Purdue University.

### 3

#### **EMPIRICAL PROCESSES**

by Peter Gaenssler, University of Munich

A thorough and detailed description of topics in the timely and growing area of empirical processes.

This volume combines new and familiar results in a context that leads to broad unification and simplification of methods,

and to prospects for new kinds of applications.

This work is mainly concerned with limit theorems for empirical measures and C-processes.

179 pages

List price \$20

IMS members \$12

### 4

#### **ZONAL POLYNOMIALS**

by Akimichi Takemura, Purdue University

A self-contained development of zonal polynomials in the framework of standard multivariate analysis.

Zonal polynomials have been used extensively in the study of noncentral multivariate distributions.

This easily understood treatment uses

only the standard tools of linear algebra

and multivariate normal distribution theory.

110 pages

List price \$15

IMS members \$9

### 5

#### **INEQUALITIES IN STATISTICS AND PROBABILITY**

edited by Y.L. Tong, University of Nebraska

Proceedings of the Symposium on Inequalities in Statistics and Probability held in Lincoln, Nebraska during October 1982.

This volume reports on the recent rapid growth in the field of inequalities due, in part,

to widespread applications in reliability theory,

in multivariate nonnormal analysis,

and in optimization and constraint problems.

The volume contains thirty expository

and research papers by leaders in the field.

263 pages

List price \$25

IMS members \$15

### &

#### **ADDITIONAL TITLES**

Previously published: Volume 1, *Essays on the Prediction Process* by Frank Knight (\$10/members \$8); Volume 2, *Survival Analysis* edited by John Crowley and Richard A. Johnson (\$25/members \$15). Forthcoming: *The Likelihood Principle* by J. Berger and R. Wolpert, *Group Theory in Statistics* by P. Diaconis, *Approximate Computations of Expectations* by C. Stein, and *Foundations of Exponential Families* by L. Brown.

Prepaid orders for individual volumes and requests for standing order enrollments (eligible for 20% prepublication discounts from list prices) should be sent to

Institute of Mathematical Statistics  
3401 Investment Blvd., #6  
Hayward, CA 94545 (USA)

**THE ANNALS OF PROBABILITY**

**Vol. 12**

**November 1984**

**No. 4**

**Special Invited Paper**

- Some limit theorems for empirical processes . . . . . E. GINÉ AND J. ZINN  
Discussion on "Some limit theorems for empirical processes." Contributors:  
K. S. ALEXANDER, R. M. DUDLEY, P. GAENSSLER, W. PHILIPP,  
D. POLLARD, R. PYKE, W. STUTE  
Oriented percolation in two dimensions . . . . . RICHARD DURRETT

**Articles**

- Probability inequalities for empirical processes and a law of the iterated logarithm  
K. S. ALEXANDER  
A limit theorem for  $N_{0n}/n$  in first passage percolation . . . . . YU ZHANG AND YI CI ZHANG  
On diffusion processes and their semigroups in Hilbert spaces with an application to  
interacting stochastic systems . . . . . G. LEHA AND G. RITTER  
Conditional Markov renewal theory I. Finite and denumerable state space . . . . . S. P. LALLEY  
Strong approximation of extended renewal processes . . . . . LAJOS HORVÁTH  
Asymptotic normality, strong mixing and spectral density estimates . . . . . M. ROSENBLATT

10 Davis Drive, Belmont, CA 94002

**THE COLLECTED WORKS OF GEORGE E. P. BOX, Volumes I and II**  
*George C. Tiao, editor-in-chief*

The writings of George E. P. Box over the last 35 years have had a major impact on statistical theory and practice. The editors who have selected the papers for these two volumes and who have contributed introductory comments are C. W. J. Granger, I. Guttman, B. H. Margolin, R. D. Snee, S. M. Stigler, and G. C. Tiao. Volume I contains papers on (1) statistical inference, robustness, and modeling strategy, (2) experimental design and response surface methodology, and (3) time series. Volume II contains papers on (4) distribution theory, transformation of variables and nonlinear estimation, and (5) applications.

October 1984; Volume I, 688 pp., cloth, ISBN 0-534-03307-5, **\$42.95**;  
Volume II, 736 pp., cloth, ISBN 0-534-03308-3, **\$44.95**.

**THE COLLECTED WORKS OF JOHN W. TUKEY**

Volume I: Time Series, 1949-1964

Volume II: Time Series, 1965-1984

*David R. Brillinger, editor*

The first two volumes of John W. Tukey's collected works contain all of his important papers on time series, with introductory comments by John W. Tukey, David R. Brillinger, William S. Cleveland, and Frederick Mosteller. More than a third of the articles appear in published form for the first time. All of the original articles have been retypeset, and each volume contains an extensive bibliography and index.

Volume I, August 1984, 752 pp., cloth, ISBN 0-534-03303-2, **\$39.95**;  
Volume II, October 1984, 656 pp., cloth, ISBN 0-534-03304-0, **\$39.95**.

Also Available:

**BROWNIAN MOTION AND MARTINGALES IN ANALYSIS**

*Richard Durrett*

June 1984, 352 pp., cloth, ISBN 0-534-03065-3, **\$34.95**.

**CLASSIFICATION AND REGRESSION TREES**

*Leo Breiman, Jerome H. Friedman, Richard A. Olshen, and Charles J. Stone*

January 1984; 358 pp., cloth ISBN 0-534-98053-8, **\$23.95**;  
paper ISBN 0-534-98054-6, **\$14.95**.

**GRAPHICAL METHODS FOR DATA ANALYSIS**

*John M. Chambers, William S. Cleveland, Beat Kleiner, and Paul A. Tukey*

1983, 395 pp., cloth, ISBN 0-534-98052-X, **\$27.95**.

**S: AN INTERACTIVE ENVIRONMENT FOR DATA ANALYSIS AND GRAPHICS**

*Richard A. Becker and John M. Chambers*

1984, 576 pp., paper, ISBN 0-534-03313-X, **\$24.95**.
