Jack Carl Kiefer
Collected Papers

I and II: Statistical Inference and Probability
III: Design of Experiments

Edited by **L.D. Brown, I. Olkin, J. Sacks, and H.P. Wynn**
(Published in cooperation with the Institute of Mathematical Statistics)

Together, these three volumes contain all of Kiefer's scientific papers—more than 100 papers comprising 1,600 pages. They cover a broad range of statistical subjects, including sequential and nonparametric analysis, decision theory, multivariate analysis, inventory theory, stochastic processes, and design of experiments. Annotated commentaries on certain papers trace their historical impact and explain their relationship to subsequent work.

Also included are three lectures presented at a memorial session held at the 1982 meeting of the IMS and ASA, Kiefer's bibliography, and a number of general papers and book reviews, several of them devoted to his hobby, the classification of mushrooms.

Volume I and II not sold separately.
1985, 502 and 590 pp., 40 illus. (Vol. I),
hardcover \$84.00
ISBN 0-387-96003-1

Volume III
1985, 718 pp., 10 illus., hardcover \$39.00
ISBN 0-387-96004-X

Special IMS Member Prices:
Volume I and II: \$62.00
Volume III: \$30.00

IMS Members: please order discount copies from the IMS Business Office,

The Annual Index to the Statistical
Literature of the World

CURRENT INDEX TO STATISTICS

APPLICATIONS, METHODS AND THEORY

VOLUME 9 (1983)–NOW AVAILABLE

- Nearly 7200 articles from “core” and “related” journals and books indexed for 1983.
- Complete coverage of 59 journals in statistics and related fields.
- Statistics articles selected and indexed from over 300 other journals.
- Subject index lists each article alphabetically according to each *important word* in its title.
- Subject index also lists articles alphabetically according to *key words* not appearing in the title.
- Author index lists each article under the name of each author.
- Reasonable prices:

IMS/ASA Members	— \$15
Other individuals	— \$20
Other institutions	— \$40

Published jointly by the Institute of Mathematical Statistics and the American Statistical Association. Volumes 2-9 are available now at the above prices. Publication of Volume 10 (1984) is expected late in 1985. Orders for Volume 10 are now being accepted at the above prices, with shipping upon availability. Please specify applicable rate and volume number(s) desired. Order prepaid from:

Hayward, CA 94545 (USA)

THE ANNALS OF PROBABILITY

Vol. 13

August 1985

No. 3

Special Invited Paper

Limit theorems for large deviations and reaction-diffusion equations . . . MARK FREIDLIN

Articles

The I -function for diffusion processes with boundaries ROSS PINSKY
A classification of diffusion processes with boundaries by their invariant measures

ROSS PINSKY

Asymptotic behavior of elementary solutions of one-dimensional generalized equations
NARIYUKI MINAMI, YUKIO OGURA, AND MATSUYO TOMISAKI

Approximations of solutions of stochastic differential equations driven by
semimartingales PHILIP PROTTER

The stationary distribution of reflected Brownian motion in a planar region
J. M. HARRISON, H. J. LANDAU, AND L. A. SHEPP

Recurrence classification and invariant measure for reflected Brownian motion in a wedge
R. J. WILLIAMS

Brownian slow points: The critical case BURGESS DAVIS AND EDWIN PERKINS
Optimal prediction of level crossings in Gaussian processes and sequences

GEORGE LINDGREN

The LIL when X is in the domain of attraction of a Gaussian law J. KUELBS
The space $D(A)$ and weak convergence for set-indexed processes

RICHARD F. BASS AND RONALD PYKE

Convergence of quadratic forms in p -stable random variables and θ_p -radonifying operators
STAMATIS CAMBANIS, JAN ROSINSKI, AND WOJBOR A. WOYCZYNSKI

Critical branching processes with nonhomogenous migration
N. M. YANEV AND K. V. MITOV

De Finetti-type theorems: An analytical approach PAUL RESSEL
Invariance properties of the conditional independence relation

C. VAN PUTTEN AND J. H. VAN SCHUPPEN

On randomized tactics and optimal stopping in the plane ANNIE MILLET
On an inequality of Chernoff CHRIS A. J. KLAASSEN

An iterative procedure for obtaining I -projections onto the intersection of convex sets
RICHARD L. DYKSTRA

On regularity of Banach-valued processes NIKOS E. FRANGOS
On the coverage of k -dimensional space by k -dimensional spheres PETER HALL

Short Communications

The size of an analytic function as measured by Lévy's time change
TERRY R. MCCONNELL

Brownian paths and cones KRZYSZTOF BURDZY
On the range of Brownian motion and its inverse process J.-P. IMHOF

A Note on a limit theorem for differentiable mappings K. A. BOROVKOV
Bochner's theorem in measurable dual of type 2 Banach space YOSHIKI OKAZAKI

Rotational representations of stochastic matrices JOHN HAIGH
Two examples concerning a theorem of Burgess and Mauldin LUTZ W. WEIS

contents (continued)

A constrained formulation of maximum-likelihood estimation for normal mixture distributions	RICHARD J. HATHAWAY	795
Admissible and optimal confidence bands in simple linear regression	WALTER W. PIEGORSCH	801
Some admissible nonparametric and related finite population sampling estimators	GLEN MEEDEN, MALAY GHOSH, STEPHEN VARDEMAN	811
A note on data-adaptive kernel estimation of the hazard and density function in the random censorship situation	HELMUT SCHÄFER	818
A uniform bound for the tail probability of Kolmogorov-Smirnov statistics	INCHI HU	821
An error bound for an asymptotic expansion of the distribution function of an estimate in a multivariate linear model	YASUNORI FUJIKOSHI	827
A note on the characterization of optimal return functions and optimal strategies for gambling problems	R. VAN DAWEN	832
Corrections		
Correction to "Optimal Bayesian experimental design for linear models"	KATHRYN CHALONER	836
Correction to "Asymptotic expansions for the error probabilities of some repeated significance tests"	MICHAEL WOODROOFE AND HAJIME TAKAHASHI	837
Book Review		
A review of <i>Statistics on Spheres</i> by Geoffrey S. Watson.	CHRISTOPHER BINGHAM	838
