The Annual Index to the Statistical
Literature of the World

CURRENT INDEX TO STATISTICS
APPLICATIONS, METHODS AND THEORY
VOLUME 10 (1984) – NOW AVAILABLE

- Nearly 8400 articles from "core" and "related" journals and books indexed for 1984.

- Complete coverage of 63 journals in statistics and related fields.

- Statistics articles selected and indexed from over 300 other journals.

- Subject index lists each article alphabetically according to each *important word* in its title.

- Subject index also lists articles alphabetically according to *key words* not appearing in the title.

- Author index lists each article under the name of each author.

- Reasonable prices:

IMS/ASA Members	—$15
Other individuals	—$20
Other institutions	—$40

Book Review

STATISTICAL SCIENCE

a review journal of the institute of mathematical statistics

EXECUTIVE EDITOR: **Morris H. DeGroot,** *Carnegie-Mellon University*

EDITORS: **David R. Brillinger,** *University of California, Berkeley*
J. A. Hartigan, *Yale University*
Paul Switzer, *Stanford University*

On the occasion of its fiftieth anniversary, the Institute of Mathematical Statistics announces publication of *Statistical Science,* a new quarterly review journal in statistics and probability. *Statistical Science* will present the full range of contemporary statistical thought at a modest technical level accessible to the broad community of practitioners, teachers, researchers, and students in statistics and probability.

Featuring in early issues

D.A. Freedman & W.C. Navidi, "Regression models for adjusting the 1980 census" with discussion by J.B. Kadane, E.P. Ericksen, A.P. Dempster, K.M. Wolter, A. Madansky, I.P. Fellegi, L.E. Moses, and G. Nathan

L. LeCam, "The central limit theorem around 1935" with discussion

B. Efron & R. Tibshirani, "The bootstrap method for assessing statistical accuracy" with discussion by J. A. Hartigan

R. A. Thisted, "Computing environments for data analysis" with discussion

P. C. Fishburn, "The axioms of subjective probability" with discussion

F. L. Bookstein, "Size and shape spaces for landmark data in two dimensions" with discussion by D. G. Kendall, N. Cressie, P. D. Sampson, G. Campbell, and C. Goodall

Interviews with David Blackwell, T. W. Anderson, Erich Lehmann, Persi Diaconis, and Charles Stein

- discussions of methodological and theoretical topics of current interest and importance,

- surveys of substantive research areas with promising statistical applications,

- evaluations of research papers in specific areas of statistics and probability,

- discussions of classic articles from the literature with commentary on their impact on contemporary thought and practice,

- comprehensive book reviews, and

- interviews with distinguished statisticians probabilists.

Statistical Science joins the Institute's distinguished journals, *The Annals of Statistics* and *The Annals of Probability,* in February 1986 and is included as a privilege of membership. Nonmember subscriptions are available to individuals and organizations. All subscriptions to the *Annals* include a subscription to *Statistical Science* for 1986. For additional information on how to receive *Statistical Science,* please write to the IMS Business Office.
