THE INSTITUTE OF MATHEMATICAL STATISTICS

Special Invited Paper

On the consistency of Bayes estimates	PERSI DIACONIS AND DAVID FREEDMAN	1
Discussion	ANDREW R. BARRON	26
Discussion	JAMES BERGER	30
Discussion	MURRAY K. CLAYTON	37
Discussion	A. P. DAWID	40
Discussion	KJELL A. DOKSUM AND ALBERT Y. LO	42
Discussion	HANI DOSS	45
Discussion	J. A. HARTIGAN	48
Discussion	NILS L. HJORT	49
Discussion	WILLIAM S. KRASKER AND JOHN W. PRATT	55
Discussion	L. LE CAM	59
Discussion	DENNIS V. LINDLEY	60
Rejoinder	P. DIACONIS AND D. FREEDMAN	63

Articles

On inconsistent Bayes estimates of location	P. DIACONIS AND D. FREEDMAN	68
Theory of partial likelihood	WING HUNG WONG	88
Exponential family mixture models (with least-squares estimators)	BRUCE G. LINDSAY	124
Gaussian Markov distributions over finite graphs	T. P. SPEED AND H. T. KIIVERI	138
Simulated power functions	RUDOLF BERAN	151
Asymptotics for configural location estimators	STEPHAN MORGENTHAUER	174
Minimax multiple shrinkage estimation	EDWARD I. GEORGE	188
Simultaneous estimation in the multiparameter gamma distribution under weighted quadratic losses	ANIRBAN DAS GUPTA	206
Admissibility and minimaxity results in the estimation problem of exponential quantiles	ANDREW L. RUKHIN	220
Estimation of survival curves from dependent censorship models via a generalized self-consistent property with nonparametric Bayesian estimation application	WEI-YANN TSAI	238
Rank tests for independence for bivariate censored data	DOROTA M. DABROWSKA	250
K -treatment comparisons with restricted randomization rules in clinical trials L. J. WEI, R. T. SMYTHE AND R. L. SMITH		265
Finite stopping in sequential sampling without recall from a Dirichlet process RONALD CHRISTENSEN		275
Bayesian multistage decision problems	JEFFREY A. WITMER	283
Optimal properties of the Bechhofer-Kulkarni Bernoulli selection procedure RADHIKA V. KULKARNI AND CHRISTOPHER JENNISON		298
Asymptotically efficient selection of the order by the criterion autoregressive transfer function	R. J. BHANSALI	315
Behaviour of third order terms in quadratic approximations of LR-statistics in multivariate generalized linear models	CHRISTIAN KREDLER	326
Finite sample properties and asymptotic efficiency of Monte Carlo tests KARL-HEINZ JÖCKEL		336
Maximum asymptotic variances of trimmed means under asymmetric contamination JOHN R. COLLINS		348
Pseudo maximum likelihood estimation: the asymptotic distribution WILLIAM R. PARKE		355

Corrections

Adjustment by minimum discriminant information	SHELBY J. HABERMAN	358
Second order approximation to the risk of a sequential procedure	ADAM T. MARTINSEK	359
Adaptive estimators for simultaneous estimation of Poisson means	H. M. HUDSON	360

Vol. 14, No. 1—March 1986

THE INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS AND EDITORS

President:

Paul Meier, Department of Statistics, University of Chicago, 5734 University Avenue, Chicago, Illinois 60637

President-Elect:

Ronald Pyke, Department of Mathematics GN-50, University of Washington, Seattle, Washington 98195

Past President:

Oscar Kempthorne, Department of Statistics, 111B Snedecor Hall, Iowa State University, Ames, Iowa 50011

Executive Secretary:

Francisco J. Samaniego, Division of Statistics, 469 Kerr Hall, University of California, Davis, California 95616

Treasurer:

Nicholas P. Jewell, Group in Biostatistics, University of California, Berkeley. *Please send correspondence to:* IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545

Program Secretary:

Richard A. Johnson, Department of Statistics, University of Wisconsin, 1210 West Dayton Street, Madison, Wisconsin 53706

Editor: *The Annals of Statistics*

Willem R. van Zwet, Department of Mathematics, University of Leiden, P.O. Box 9512, 2300 RA Leiden, The Netherlands

Editor: *The Annals of Probability*

Thomas M. Liggett, Department of Mathematics, University of California, Los Angeles, California 90024

Executive Editor: *Statistical Science*

Morris H. DeGroot, Department of Statistics, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213

Editor: *The IMS Bulletin*

William C. Guenther, Department of Statistics, University of Wyoming, Laramie. *Please send correspondence to:* Box 3332 University Station, Laramie, Wyoming 82071

Editor: *The IMS Lecture Notes—Monograph Series*

Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:

Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual, Institutional, and Corporate Memberships. All *individual members* receive *Statistical Science* and *The IMS Bulletin* for a basic annual dues rate of \$30. Individual members may elect to receive one *Annals* for an additional \$10 or both *Annals* for an additional \$20. Dues allocations to each journal are set by Council resolution. Of the total dues paid, \$8 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journals received. Memberships are available at a reduced rate (40% of regular rates) for full-time students, permanent residents of developing countries, and retired members. Retired members may also elect to receive the *Bulletin* only for \$10. *Institutional memberships* are available to nonprofit organizations at \$225 per year and *corporate memberships* are available to other organizations at \$500 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. For 1986, all subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1986 are available to both *Annals* and *Statistical Science* (\$79), one *Annals* and *Statistical Science* (\$52), *Statistical Science* only (\$25), and *The IMS Bulletin* (\$15). *General subscriptions* are for libraries, institutions, and any multiple-readership use. General subscriptions for 1986 are available to both *Annals* and *Statistical Science* (\$155), *The Annals of Statistics* and *Statistical Science* (\$85), *The Annals of Probability* and *Statistical Science* (\$80), *Statistical Science* only (\$40), and *The IMS Bulletin* (\$20). Air mail rates for overseas delivery of general subscriptions are \$40 per title.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production).

The Annals of Statistics (ISSN 0090-5364), Volume 14, Number 1, March 1986. Published in March, June, September, and December by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster:** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545.

R. M. DUDLEY, 1979–1981
HARRY KESTEN, 1982–1984

EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of *The Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to *The Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

NOTICE

Manuscripts submitted for *The Annals of Statistics* should be sent to the Editor at the following address:

Willem R. van Zwet

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of *The Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) **Four copies** should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also **required**. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head, "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be

found with instructions for its use in the *Mathematical Reviews Annual Subject Index-1980*. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise, formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed on separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus,

$(a + b)/(c + d)$ is preferred to $\frac{a + b}{c + d}$, and $(2\pi)^{-1}$

or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferred

to a^{bc} and a_{bc} , respectively. Complicated exponentials should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-spaced and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* 4 836-865.

In textual material, the format "... Keifer (1976) ..." should be used. Multiple references can be distinguished as "... Kiefer (1976a) ...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Addresses. The permanent address of each author should be typed following the references.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Science Typographers, Inc., 15 Industrial Boulevard, Medford, NY 11763.

Correspondence. All correspondence with the editor must refer to the manuscript number of the paper. This number will be on the card sent to the author acknowledging receipt of the article.
