THE ANNALS of STATISTICS

An Official Journal of
The Institute of Mathematical Statistics

Invited Paper

Influence functionals for time series . . . . . R. Douglas Martin and Victor J. Yohai 781
Discussion . . . . . David R. Brillinger 819
Discussion . . . . . J. Franke and E. J. Hannan 822
Discussion . . . . . Hans R. Künsch 824
Discussion . . . . . Robert B. Miller and Jae June Lee 827
Discussion . . . . . H. Vincent Poor 829
Discussion . . . . . P. M. Robinson 832
Discussion . . . . . Ruey S. Tsay 835
Discussion . . . . . Edward J. Wegman 836
Discussion . . . . . Mike West 838
Rejoinder . . . . . R. Douglas Martin and Victor J. Yohai 840

Articles

Likelihood and observed geometries . . . . . O. E. Barndorff-Nielsen 856
Rectangular lattice designs: Efficiency factors and analysis
R. A. Bailey and T. P. Speed 874
Conservative confidence bands in curvilinear regression . . . . . Daniel Q. Naiman 896
Spherical regression . . . . . Ted Chang 907
Asymptotic conditional inference for the offspring mean of a supercritical Galton–Watson process . . . . . T. J. Sweeting 925
Nonparametric Bayesian regression . . . . . Daniel Barry 934
Bayes rules for a clinical-trials model with dichotomous responses . . . . . Gordon Simons 954
An extreme value theory for sequence matching
Richard Arratia, Louis Gordon and Michael Waterman 971
Skewness and asymmetry: Measures and orderings . . . . . H. L. MacGillivray 994
On the asymptotic formula for the probability of a Type I error of mixture type power one tests . . . . . Moshe Pollak 1012
The shape of Bayes tests of power one . . . . . Hans Rudolf Lerche 1030
Very weak expansions for sequential confidence levels . . . . . Michael Woodroofe 1049
Asymptotic properties of Neyman–Pearson tests for infinite Kullback–Leibler information . . . . . Arnold Janssen 1068
Stochastic complexity and modeling . . . . . Jorma Rissanen 1080
Asymptotic optimality of C_L and generalized cross-validation in ridge regression with application to spline smoothing . . . . . Ker-Chau Li 1101
Asymptotically minimax estimators for distributions with increasing failure rate . . . . . Jane-Ling Wang 1113
Estimation of a unimodal distribution function . . . . . Shaw-Hwa Lo 1132
On asymptotically efficient estimation in semiparametric models . . . . . Anton Schick 1139
Asymptotic behavior of the empiric distribution of M-estimated residuals from a regression model with many parameters . . . . . Stephen Portnoy 1152
The use of subseries values for estimating the variance of a general statistic from a stationary sequence . . . . . Edward Carlstein 1171
A minimum distance estimator for first-order autoregressive processes . . . . . Chamont W. H. Wang 1180
Minimum distance estimation and goodness-of-fit tests in first-order autoregression . . . . . Hira L. Koul 1194
Second-order risk structure of GLSE and MLE in a regression with a linear process . . . . . Yasuyuki Toyooka 1214
Bayesian statistical inference for sampling a finite population . . . . . Albert Y. Lo 1226

Short Communications

The total time on test plot and the cumulative total time on test statistic for a counting process . . . . . Richard D. Gill 1234
Local convergence of empirical measures in the random censorship situation with application to density and rate estimators . . . . . Helmut Schäfer 1240
Bahadur representations for robust scale estimators based on regression residuals . . . . . A. H. Welsh 1246
On a converse to Scheffé's theorem . . . . . T. J. Sweeting 1252
The efficiency of Good's nonparametric coverage estimator . . . . . Warren W. Esty 1257

Vol. 14, No. 3—September 1986

Institute of Mathematical Statistics is collaborating with JSTOR to digitize, preserve, and extend access to *The Annals of Statistics.* www.jstor.org

INSTITUTE OF MATHEMATICAL STATISTICS

(Organized September 12, 1935)

The purpose of the Institute of Mathematical Statistics is to encourage the development, dissemination, and application of mathematical statistics.

OFFICERS AND EDITORS

President:
Ronald Pyke, Department of Mathematics GN-50, University of Washington, Seattle, Washington 98195

President-Elect:
Bradley Efron, Department of Statistics, Sequoia Hall, Stanford University, Stanford, California 94305

Past President:
Paul Meier, Department of Statistics, University of Chicago, 5734 University Avenue, Chicago, Illinois 60637

Executive Secretary:
Francisco J. Samaniego, Division of Statistics, 469 Kerr Hall, University of California, Davis, California 95616

Treasurer:
Nicholas P. Jewell, Group in Biostatistics, University of California, Berkeley. *Please send correspondence to*: IMS Business Office, 3401 Investment Boulevard #7, Hayward, California 94545

Program Secretary:
Lynne Billard, Department of Statistics and Computer Science, University of Georgia, Athens, Georgia 30602

Editor: *The Annals of Statistics*
Willem R. van Zwet, Department of Mathematics, University of Leiden, P.O. Box 9512, 2300 RA Leiden, The Netherlands

Editor: *The Annals of Probability*
Thomas M. Liggett, Department of Mathematics, University of California, Los Angeles, California 90024

Executive Editor: *Statistical Science*
Morris H. DeGroot, Department of Statistics, Carnegie-Mellon University, Pittsburgh, Pennsylvania 15213

Editor: *The IMS Bulletin*
George P. H. Styan, Department of Mathematics and Statistics, Burnside Hall, McGill University, 805 Sherbrooke Street West, Montreal PQ, Canada H3A 2K6

Editor: *The IMS Lecture Notes—Monograph Series*
Shanti S. Gupta, Department of Statistics, Purdue University, West Lafayette, Indiana 47907

Managing Editor:
Paul Shaman, Department of Statistics, University of Pennsylvania, Philadelphia, Pennsylvania 19104

Journals. The scientific journals of the Institute are *The Annals of Statistics*, *The Annals of Probability*, and *Statistical Science*. The news organ of the Institute is *The Institute of Mathematical Statistics Bulletin*.

Individual, Institutional, and Corporate Memberships. All *individual members* receive *Statistical Science* and *The IMS Bulletin* for a basic annual dues rate of $30. Individual members may elect to receive one *Annals* for an additional $10 or both *Annals* for an additional $20. Dues allocations to each journal are set by Council resolution. Of the total dues paid, $8 is allocated to *The IMS Bulletin* and the remaining amount is allocated equally among the scientific journals received. Memberships are available at a reduced rate (40% of regular rates) for full-time students, permanent residents of developing countries, and retired members. Retired members may also elect to receive the *Bulletin* only for $10. *Institutional memberships* are available to nonprofit organizations at $225 per year and *corporate memberships* are available to other organizations at $500 per year. Institutional and corporate memberships include two multiple-readership copies of all IMS journals in addition to other benefits specified for each category (details available from the IMS Business Office).

Individual and General Subscriptions. Subscriptions are available on a calendar-year basis. For 1986, all subscriptions to one or both *Annals* automatically include one subscription to *Statistical Science*. *Individual subscriptions* are for the personal use of the subscriber and must be in the name of, paid directly by, and mailed to an individual. Individual subscriptions for 1986 are available to both *Annals* and *Statistical Science* ($79), one *Annals* and *Statistical Science* ($52), *Statistical Science* only ($25), and *The IMS Bulletin* ($15). *General subscriptions* are for libraries, institutions, and any multiple-readership use. General subscriptions for 1986 are available to both *Annals* and *Statistical Science* ($155), *The Annals of Statistics* and *Statistical Science* ($85), *The Annals of Probability* and *Statistical Science* ($80), *Statistical Science* only ($40), and *The IMS Bulletin* ($20). Air mail rates for overseas delivery of general subscriptions are $40 per title.

Correspondence. Mail to IMS should be sent to the IMS Business Office (membership, subscriptions, claims, copyright permissions, advertising, back issues), the Editor of the appropriate journal (submissions, editorial content), or the Managing Editor (production).

***The Annals of Statistics* (ISSN 0090-5364),** Volume 14, Number 3, September 1986. Published in March, June, September, and December by the Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545. Second-class postage paid at Hayward, California and at additional mailing offices. **Postmaster:** Send address changes to *The Annals of Statistics*, Institute of Mathematical Statistics, 3401 Investment Boulevard #7, Hayward, California 94545.

PATRICK BILLINGSLEY, 1976–1978
R. M. DUDLEY, 1979–1981
HARRY KESTEN, 1982–1984

EDITORIAL POLICY

The main purpose of *The Annals of Statistics* and *The Annals of Probability* is to publish significant contributions to the theory of statistics and probability and their applications. The emphasis is on importance and interest; formal novelty and mathematical correctness alone are not sufficient for publication. Especially appropriate are authoritative expository papers and surveys of areas in vigorous development. Because statistics is an evolving discipline, the Editors of *The Annals of Statistics* take a broad view of its domain and welcome papers in interface areas. Contributors to *The Annals of Statistics* should review the editorial in the January 1980 issue. All papers are refereed.

NOTICE

Manuscripts submitted for *The Annals of Statistics* should be sent to the Editor at the following address:

THE ANNALS OF STATISTICS

INSTRUCTIONS FOR AUTHORS

Submission of Papers. Papers to be submitted for publication should be sent to the Editor of *The Annals of Statistics*. (For current address, see the latest issue of the *Annals*.) **Four copies** should be submitted on paper that will take ink corrections. The manuscript will *not* normally be returned to the author; when expressly requested by the author, one copy of the manuscript will be returned. All manuscripts should be accompanied by a cover letter.

Preparation of Manuscripts. Manuscripts should be typewritten, entirely double-spaced, including references, with wide margins at sides, top and bottom. All copies must be completely legible. When technical reports are submitted, all extraneous sheets and covers must be removed. Typists should check an issue of the *Annals* for style.

Submission of Reference Papers. Four copies of unpublished or not easily available papers cited in the manuscript should be submitted with the manuscript.

Title. The title should be descriptive and as concise as is feasible, i.e., it should indicate the topic of the paper as clearly as possible, but every word in it should be pertinent.

Abbreviated Title. An abbreviated title to be used as a running head is also **required**. This should normally not exceed 35 characters. For example, an article with the title "The Curvature of a Statistical Model, with Applications to Large-Sample Likelihood Methods," could have the running head, "Curvature of Statistical Model" or possibly "Asymptotics of Likelihood Methods," depending on the emphasis to be conveyed.

Affiliation. Indicate your present institutional affiliation as you would like it to appear.

Summary. Each manuscript is required to contain a summary, clearly separated from the rest of the paper, which will be printed immediately after the title. Its main purpose is to inform the reader quickly of the nature and results of the paper; it may also be used as an aid in retrieving information. The length of a summary will clearly depend on the length and difficulty of the paper, but in general it should not exceed 150 words. Formulas should be used as sparingly as possible within the summary. The summary should not make reference to results or formulas in the body of the paper—it should be self-contained.

Footnotes. Footnotes should not be used, except as described under Title Page Footnotes below. Such information should be included within the text.

Title Page Footnotes. Included as a footnote on page 1 should be the headings:

American Mathematical Society 1980 subject classifications. Primary—; secondary—.
Key words and phrases.

The classification numbers representing the primary and secondary subjects of the article may be found with instructions for its use in the *Mathematical Reviews Annual Subject Index*-1980. The key words and phrases should describe the subject matter of the article; generally they should be taken from the body of the paper.

Acknowledgment of support. Grants and contracts should also be included in this footnote.

Identification of Symbols. Manuscripts for publication should be clearly prepared to insure that all symbols are properly identified. Distinguish between "oh" and "zero"; "ell" and "one"; "epsilon" and "element of"; "summation" and "capital sigma," etc. Indicate also when special type is required (Greek, German, script, boldface, etc.); unless indicated otherwise formula letters will be set in italics. Acronyms should be introduced sparingly. Any handwritten symbols should be clearly identified.

Figures and Tables. Figures, charts, and diagrams should be prepared in a form suitable for photographic reproduction and should be professionally drawn twice the size they are to be printed. (These need not be submitted until the paper has been accepted for publication.) The printer does not improve upon the quality of the figures submitted. Tables should be typed or separate pages with accompanying footnotes immediately below the table.

Formulas. Fractions *in the text* are preferably written with the solidus or negative exponent; thus, $(a + b)/(c + d)$ is preferred to $\frac{a+b}{c+d}$, and $(2\pi)^{-}$ or $1/(2\pi)$ to $\frac{1}{2\pi}$. Also, $a^{b(c)}$ and $a_{b(c)}$ are preferre to a^{b_c} and a_{b_c}, respectively. Complicated exponential should be represented with the symbol exp. A fractional exponent is preferable to a radical sign.

References. References should be typed double-space and should follow the style:

Kiefer, J. C. (1976). Admissibility of conditional confidence procedures. *Ann. Statist.* **4** 836–865.

In textual material, the format "... Keife (1976)..." should be used. Multiple references can be distinguished as "... Kiefer (1976a)...". Abbreviations for journals should be taken from a current index issue of *Mathematical Reviews*.

Addresses. The permanent address of each author should be typed following the references.

Galley Proofs. The author will ordinarily receive galley proofs. Corrected galley proofs should be sent to AOS Redactory, Science Typographers, Inc., 1 Industrial Boulevard, Medford, NY 11763.

Correspondence. All correspondence with the Edit must refer to the manuscript number of the paper. The number will be on the card sent to the author acknow edging receipt of the article.
