

The Annals of Probability

Vol. 14

October 1986

No. 4

Memorial Articles

- Mark Kac 1914–1984
The influence of Mark Kac on probability theory HARRY KESTEN
The contributions of Mark Kac to mathematical physics COLIN J. THOMPSON
A life of the immeasurable mind. A review of *Enigmas of Chance*,
An Autobiography by Mark Kac JOEL E. COHEN
Publications of Mark Kac

Articles

- Isotropic stochastic flows PETER BAKENDALE AND THEODORE E. HARRIS
A spectral criterion for the finiteness or infiniteness of stopped Feynman–Kac
functionals of diffusion processes ROSS PINSKY
Time reversal of diffusions U. G. HAUSSMANN AND E. PARDOUX
A one-dimensional diffusion process in a Wiener medium TH. BROX
Sur la saucisse de Wiener et les points multiples du mouvement Brownien
JEAN-FRANÇOIS LE GALL
Tanaka's formula and renormalization for intersections of planar
Brownian motion JAY ROSEN
Answers to some questions about increments of a Wiener process
CHEN GUIJING, KONG FANCHAO AND LIN ZHENGYAN
Regenerative representation for one-dimensional Gibbs states S. P. LALLEY
A sufficient condition for association of a renewal process
ROBERT M. BURTON, JR. AND ED WAYMIRE
The simple exclusion process as seen from a tagged particle PABLO A. FERRARI
Central limit theorem for the contact process ROBERTO HENRIQUE SCHONMANN
Converse results for existence of moments and uniform integrability
for stopped random walks ALLAN GUT AND SVANTE JANSON
The spectral radius of large random matrices STUART GEMAN
Empirical processes indexed by Lipschitz functions EVARIST GINÉ AND JOEL ZINN
On the rate at which the sample extremes become independent .. M. FALK AND W. KOHNE
Limit theorems for a triangular scheme of U -statistics with applications
to inter-point distances S. RAO JAMMALAMADAKA AND SVANTE JANSON
Central limit theorems for mixing sequences of random variables under minimal
conditions HEROLD DEHLING, MANFRED DENKER AND WALTER PHILIPP
Asymptotic normality for a general statistic from a stationary sequence
EDWARD CARLSTEIN
A characterization of the spatial Poisson process and changing time
ELY MERZBACH AND DAVID NUALART
Compound Poisson approximations for sums of random variables .. RICHARD F. SERFOZO
On a lower bound for the multivariate normal Mills' ratio SATISH IYENGAR
Stochastic determination of moduli of annular regions and tori ... HIROSHI YANAGIHARA
Recurrence of random walks on completely simple semigroups P. B. CERRITO
A finite form of de Finetti's theorem for stationary Markov exchangeability .. ARIF ZAMAN

Book Review

- Two books on large deviations: *Entropy, Large Deviations, and Statistical Mechanics*
by Richard S. Ellis and *An Introduction to the Theory of Large Deviations*
by D. W. Stroock PETER NEY

“When we read what their college will cost...we bought the maximum life insurance available in the IMS Members’ Insurance Program...”

“... Oh, we expect to be there—proud as can be—when they enter college. But, just in case one of us isn’t... the insurance coverage will be.”

If a breadwinner is no longer around to provide for family shelter and the children’s college education... life insurance had better be.

Our group term life insurance can supplement your insurance portfolio so that your family has the protection it needs now—and for the future.

As a member, you can fill your insurance needs at low group rates. You can get family coverage, too. And if you change jobs, your group insurance automatically goes with you, so there’s no lapse in your insurance coverage.

Check your insurance portfolio. Will it meet your family’s future needs? If not, call or write the Administrator.

**UP TO \$240,000 IN
TERM LIFE INSURANCE PROTECTION
IS AVAILABLE TO IMS MEMBERS.**
