

THE ANNALS *of* STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Articles

Adaptive estimation under single-index constraint in a regression model OLEG LEPSKI AND NORA SERDYUKOVA	1
Co-clustering separately exchangeable network data DAVID CHOI AND PATRICK J. WOLFE	29
Asymptotic theory of cepstral random fields TUCKER S. MCELROY AND SCOTT H. HOLAN	64
Inference of weighted V -statistics for nonstationary time series and its applications ZHOU ZHOU	87
Twisted particle filters NICK WHITELEY AND ANTHONY LEE	115
Theory and methods of panel data models with interactive effects JUSHAN BAI AND KUNPENG LI	142
Second-order asymptotics for quantum hypothesis testing KE LI	171
Statistical inference based on robust low-rank data matrix approximation XINGDONG FENG AND XUMING HE	190
Optimal learning with Q -aggregation . . . GUILLAUME LECUÉ AND PHILIPPE RIGOLLET	211
Signal detection in high dimension: The multispiked case ALEXEI ONATSKI, MARCELO J. MOREIRA AND MARC HALLIN	225
On Poincaré cone property ALEJANDRO CHOLAQUIDIS, ANTONIO CUEVAS AND RICARDO FRAIMAN	255
Adaptive piecewise polynomial estimation via trend filtering RYAN J. TIBSHIRANI	285
Adaptive robust variable selection JIANQING FAN, YINGYING FAN AND EMRE BARUT	324
Anisotropic function estimation using multi-bandwidth Gaussian processes ANIRBAN BHATTACHARYA, DEBDEEP PATI AND DAVID DUNSON	352
On efficient dimension reduction with respect to a statistical functional of interest WEI LUO, BING LI AND XIANGRONG YIN	382
