

THE ANNALS *of* STATISTICS

AN OFFICIAL JOURNAL OF THE
INSTITUTE OF MATHEMATICAL STATISTICS

Functional data analysis by matrix completion MARIE-HÉLÈNE DESCARY AND VICTOR M. PANARETOS	1
Bayesian fractional posteriors ANIRBAN BHATTACHARYA, DEBDEEP PATI AND YUN YANG	39
Distribution theory for hierarchical processes FEDERICO CAMERLENGHI, ANTONIO LIJOL, PETER ORBANZ AND IGOR PRÜNSTER	67
Adaptive estimation of the sparsity in the Gaussian vector model ALEXANDRA CARPENTIER AND NICOLAS VERZELEN	93
Approximate optimal designs for multivariate polynomial regression YOHANN DE CASTRO, FABRICE GAMBOA, DIDIER HENRION, ROXANA HESS AND JEAN-BERNARD LASSERRE	127
Efficient estimation of integrated volatility functionals via multiscale jackknife JIA LI, YUNXIAO LIU AND DACHENG XIU	156
Nonasymptotic rates for manifold, tangent space and curvature estimation EDDIE AAMARI AND CLÉMENT LEVRARD	177
Nonparametric testing for multiple survival functions with noninferiority margins HSIN-WEN CHANG AND IAN W. MCKEAGUE	205
Oracle inequalities and adaptive estimation in the convolution structure density model O. V. LEPSKI AND T. WILLER	233
Efficient multivariate entropy estimation via k -nearest neighbour distances THOMAS B. BERRETT, RICHARD J. SAMWORTH AND MING YUAN	288
Posterior graph selection and estimation consistency for high-dimensional Bayesian DAG models XUAN CAO, KSHITIJ KHARE AND MALAY GHOSH	319
Locally adaptive confidence bands TIM PATSCHKOWSKI AND ANGELIKA ROHDE	349
Asymptotic distribution-free change-point detection for multivariate and non-Euclidean data LYNNA CHU AND HAO CHEN	382
Statistics on the Stiefel manifold: Theory and applications RUDRASIS CHAKRABORTY AND BABA C. VEMURI	415
Goodness-of-fit tests for the functional linear model based on randomly projected empirical processes JUAN A. CUESTA-ALBERTOS, EDUARDO GARCÍA-PORTUGUÉS, MANUEL FEBRERO-BANDE AND WENCESLAO GONZÁLEZ-MANTEIGA	439
Convolved subsampling estimation with applications to block bootstrap JOHANNES TEWES, DIMITRIS N. POLITIS AND DANIEL J. NORDMAN	468
Feature elimination in kernel machines in moderately high dimensions SAYAN DASGUPTA, YAIR GOLDBERG AND MICHAEL R. KOSOROK	497
High-dimensional covariance matrices in elliptical distributions with application to spherical test JIANG HU, WEIMING LI, ZHI LIU AND WANG ZHOU	527
A critical threshold for design effects in network sampling KARL ROHE	556
Permutation p -value approximation via generalized Stolarsky invariance HERA Y. HE, KINJAL BASU, QINGYUAN ZHAO AND ART B. OWEN	583
Canonical correlation coefficients of high-dimensional Gaussian vectors: Finite rank case ZHIGANG BAO, JIANG HU, GUANGMING PAN AND WANG ZHOU	612
Uniform projection designs FASHENG SUN, YAPING WANG AND HONGQUAN XU	641
