

# BAYESIAN ANALYSIS

Generalized Quantile Treatment Effect: A Flexible Bayesian Approach Using Quantile Ratio Smoothing . . . . .	S. Venturini, F. Dominici, and G. Parmigiani	523
Bayesian Tail Risk Interdependence Using Quantile Regression . . . . .	M. Bernardi, G. Gayraud, and L. Petrella	553
Bayesian Nonparametric Weighted Sampling Inference . . . . .	Y. Si, N. S. Pillai, and A. Gelman	605
Necessary and Sufficient Conditions for High-Dimensional Posterior Consistency under $g$ -Priors . . . . .	D. K. Sparks, K. Khare, and M. Ghosh	627
Finite Sample Bernstein – von Mises Theorem for Semiparametric Problems . . . . .	M. Panov and V. Spokoiny	665
Optimal Design in Geostatistics under Preferential Sampling . . . . .	G. S. Ferreira and D. Gamerman	711
Comment on Article by Ferreira and Gamerman . . . . .	M. Chipeta and P. J. Diggle	737
Comment on Article by Ferreira and Gamerman . . . . .	N. Cressie and R. L. Chambers	741
Comment on Article by Ferreira and Gamerman . . . . .	J. V. Zidek	749
Rejoinder . . . . .	G. S. Ferreira and D. Gamerman	753
