

# BAYESIAN ANALYSIS

Big Data Bayesian Linear Regression and Variable Selection by Normal-Inverse-Gamma Summation .....	H. Qian	1011
Designing Simple and Efficient Markov Chain Monte Carlo Proposal Kernels .....	Y. Thawornwattana, D. Dalquen, and Z. Yang	1037
Nonparametric Bayesian Negative Binomial Factor Analysis .....	M. Zhou	1065
Reciprocal Graphical Models for Integrative Gene Regulatory Network Analysis .....	Y. Ni, Y. Ji, and P. Müller	1095
Bayesian Model Selection of Regular Vine Copulas ..	L. F. Gruber and C. Czado	1111
Sequential Monte Carlo Smoothing with Parameter Estimation .....	B. Yang, J. R. Stroud, and G. Huerta	1137
A General Method for Robust Bayesian Modeling .....	C. Wang and D. M. Blei	1163
The Matrix- $F$ Prior for Estimating and Testing Covariance Matrices .....	J. Mulder and L. R. Pericchi	1193
Optimal Bayesian Minimax Rates for Unconstrained Large Covariance Matrices .....	K. Lee and J. Lee	1215
Learning Markov Equivalence Classes of Directed Acyclic Graphs: An Objective Bayes Approach .....	F. Castelletti, G. Consonni, M. L. Della Vedova, and S. Peluso	1235
Bayesian Spatiotemporal Modeling Using Hierarchical Spatial Priors, with Applications to Functional Magnetic Resonance Imaging (with Discussion) .....	M. Bezener, J. Hughes, and G. Jones	1261
