

# GENERAL INDEX

1891-1904

## I. AUTHORS

- ABBE, C. See HERRMANN, E.  
— See REVIEWS under Chree, C.
- AMES, J. S. See REVIEWS under Weber, H.
- AMES, L. D. On the theorem of analysis situs relating to the division of the plane or of space by a closed curve or surface, (2) x, 301.
- BAILEY, W. B. See REVIEWS under Cantor, M.
- BEMAN, W. W. Euler's use of  $i$  to represent an imaginary, (2) iv, 274, 551.  
— See WEBER, H.
- BERRY, A. See REVIEWS under Picard, E.
- BLAKE, E. M. Report of the Brooklyn meeting of the American Association for the Advancement of Science, (2) i, 16.  
— See REVIEWS under Marie, A.; Verzeichniss.
- BLICHFELDT, H. F. Note on a property of the conic sections, (2) ix, 306.
- BLISS, G. A. The exterior and interior of a plane curve, (2) x, 398.
- BÔCHER, M. Collineation as a mode of motion, i, 225.  
— A bit of mathematical history, ii, 107.  
— Gauss's third proof of the fundamental theorem of algebra, (2) i, 205.  
— On Cauchy's theorem concerning complex integrals, (2) ii, 146.  
— On certain methods of Sturm and their application to the roots of Bessel's functions, (2) iii, 205.  
— The roots of polynomials which satisfy certain linear differential equations of the second order, (2) iv, 256.  
— The theorems of oscillation of Sturm and Klein, (2) iv, 295, 365; (2) v, 22.  
— Note on Poisson's integral, (2) iv, 424.  
— On singular points of linear differential equations with real coefficients, (2) v, 275.  
— An elementary proof that Bessel's functions of the zeroth order have an infinite number of real roots, (2) v, 385.  
— Some theorems concerning linear differential equations of the second order, (2) vi, 279.

- On linear dependence of functions of one variable, (2) VII, 120, 234.
- Green's functions in space of one dimension, (2) VII, 297.
- Non-oscillatory linear differential equations of the second order, (2) VII, 333.
- On Wronskians of functions of a real variable, (2) VIII, 53.
- Singular points of functions which satisfy partial differential equations of the elliptic type, (2) IX, 455.
- See REVIEWS under Bailey, F. H.; Burkhardt, H.; Gauss, K. F.; Gray, A.; Hayward, R. B.; Heffter, L.; Niewenglowski, B.; Picard, E.; Schlesinger, L.; Whittaker, E. T.
- BOLZA, O.** Some instructive examples in the calculus of variations, (2) IX, 1.
- The determination of the constants in the problem of the brachistochrone, (2) X, 185.
- See REVIEWS under Harkness, J.; Netto, E.
- BOUTON, C. L.** Some examples of differential invariants, (2) IV, 313.
- BROMWICH, T. J. P.A.** The infinitesimal generators of parameter groups, (2) VIII, 375.
- On the parabolas (or paraboloids) through the points common to two given conics (or quadrics), (2) VIII, 386.
- See REVIEWS under Muth, P.
- BROOKS, J. M.** See REVIEWS under Lie, S.
- BROWN, E. W.** Modern methods of treating dynamical problems and in particular the problem of three bodies, (2) VIII, 103.
- See REVIEWS under Adams, J. C.; Annuaire; Astronomical; Berry, A.; Clerke, A. M.; Darwin, G. H.; Green, G.; Gundelfinger, S.; Kepler; Kirchhoff, G.; Lamb, H.; Lévy, M.; Mendizábal y Tamborrel, J. de; Merriman, M.; Peirce, B. O.; Poincaré, H.; Rajna, M.; Rice, H. L.; Schubert, H.; Suter, H.; Tisserand, F.; Villié, E.
- BROWN, G. L.** Note on Hölder's theorem concerning the constancy of factor groups, (2) I, 232.
- CAJORI, F.** Multiplication of series, I, 184.
- Evolution of criteria of convergence, II, 1.
- Was the binomial theorem engraven on Newton's monument? (2) I, 52.
- The multiplication of semiconvergent series, (2) I, 180.
- The application of the fundamental laws of algebra to the multiplication of infinite series, (2) VIII, 231.
- Series whose product is absolutely convergent, (2) IX, 188.
- See REVIEWS under Boyer, J.; Braunmühl, A. von; Laisant, C. A.; Maupin, G.
- CAMPBELL, J. E.** Note on the theory of continuous groups, (2) IV, 407.
- CAYLEY, A.** Note on a memoir in Smith's Collected papers, (2) I, 94.

- CHAPMAN, C. H. Weierstrass and Dedekind on general complex numbers, I, 150.
- See REVIEWS under Briot, C. A.; Lie, S.; Macfarlane, A.
- CHESSIN, A. S. On divergent series, (2) II, 72.
- Additional note on divergent series, (2) II, 177.
- On the motion of a homogeneous sphere or spherical shell on an inclined plane, taking into account the rotation of the earth, (2) II, 302.
- Note on hyperelliptic integrals, (2) IV, 93.
- Note on the periodic developments of the equation of the center and of the logarithm of the radius vector, (2) V, 18.
- See REVIEWS under Painlevé, P.
- CHITTENDEN, J. B. See REVIEWS under Willson, F. N.
- CHREE, C. See REVIEWS under Ewing, J. A.
- COLE, F. N. Note on the substitution groups of six, seven, and eight letters, II, 184.
- The transitive substitution groups of nine letters, II, 250.
- On the factoring of large numbers, (2) X, 134, 362.
- See REVIEWS under Klein, F.; Scott, C. A.
- Reports of meetings of the American Mathematical Society, (2) III, 1; (2) IV, 1, 87, 175, 291, 415; (2) V, 1, 113, 217, 325, 423; (2) VI, 95, 177, 267, 365; (2) VII, 1, 113, 199, 289; (2) VIII, 1, 183, 367; (2) IX, 183, 281, 393, 525; (2) X, 53, 119, 171, 221, 373, 485.
- CONANT, L. L. See REVIEWS under Memoirs.
- Report of the Springfield meeting of the American Association for the Advancement of Science, (2) II, 7.
- COOLIDGE, J. L. See REVIEWS under Hill, M. J. M.; Manning, H. P.; Simon, M.
- CRAIG, T. Some of the developments in the theory of ordinary differential equations between 1878 and 1893, II, 119.
- Note on monogenic functions of a single variable, III, 78.
- See REVIEWS under PICARD, E.
- CRAWLEY, E. S. Report of the Pittsburgh meeting of the American Association for the Advancement of Science, (2) IX, 94.
- CURTISS, D. R. Note on the sufficient conditions for an analytic function, (2) VIII, 329.
- DARBOUX, G. Sophus Lie, translated by E. O. LOVETT, (2) V, 367.
- DAVIES, J. E. See REVIEWS under Preston, T.
- DAVIS, E. W. Note on special regular reticulations, (2) IV, 529.
- Some groups in logic, (2) IX, 346.
- See REVIEWS under Bertrand, J.; Dupuis, N. F.; Halsted, G. B.; Hopkins, G. I.; Kiepert, L.; Smith, W. B.

- DICKSON, L. E. On the number of inscriptible regular polygons, III, 123.
- Gergonne's pile problem, (2) I, 184.
- Systems of continuous and discontinuous simple groups, (2) III, 265.
- Higher irreducible congruences, (2) III, 381.
- Orthogonal group in a Galois field, (2) IV, 196.
- Systems of simple groups derived from the orthogonal group, (2) IV, 382.
- The structure of the hypoabelian groups, (2) IV, 495.
- Concerning a linear homogeneous group in  $C_{m,q}$  variables isomorphic to the general linear homogeneous group in  $m$  variables, (2) V, 120.
- The largest linear homogeneous group with an invariant Pfaffian, (2) V, 338.
- The known finite simple groups, (2) V, 470.
- Report on the recent progress in the theory of linear groups, (2) VI, 13.
- Proof of the existence of the Galois field of order  $p^r$  for every integer  $r$  and prime number  $p$ , (2) VI, 203.
- Isomorphism between certain systems of simple linear groups, (2) VI, 323.
- Concerning real and complex continuous groups, (2) VII, 340.
- The configurations of the 27 lines on a cubic surface and the 28 bitangents to a quartic curve, (2) VIII, 63.
- Three sets of generational relations defining the abstract simple
- A class of simply transitive linear groups, (2) VIII, 394.
- group of order 504, (2) IX, 194.
- Generational relations defining the abstract simple group of order 660, (2) IX, 204.
- The abstract group  $G$  simply isomorphic with the alternating group on six letters, (2) IX, 303.
- Fields whose elements are linear differential expressions, (2) X, 30.
- Two systems of subgroups of the quaternary abelian group in a general Galois field, (2) X, 178, 362.
- On the subgroups of order a power of  $p$  in the linear homogeneous and fractional groups in the  $GF[p^n]$ , (2) X, 385.
- See REVIEWS under Bachmann, P.; Bauer, G.; Burkhardt, H.; Cahen, E.; Dedekind, R.; Page, J. M.; Young, J. W. A.; Zindler, K.
- DUHEM, P. Emile Mathieu, his life and works, translated by A. ZIWET, I, 156.
- DUNKEL, O. Some applications of Green's theorem in one dimension, (2) VIII, 288.
- EASTON, B. S. See REVIEWS under Burnside, W. S.; Le Vavasseur, R.

- ECHOLS, W. H. On a general formula for the expansion of functions in series, II, 135.
- Wronski's expansion, II, 178.
- EISENHART, L. P. A demonstration of the impossibility of a triply asymptotic system of surfaces, (2) VII, 184.
- Possible triply asymptotic systems of surfaces, (2) VII, 303.
- Surfaces whose first and second fundamental forms are the second and first respectively of another surface, (2) VII, 417.
- Lines of length zero on surfaces, (2) VIII, 241.
- Note on isotropic congruences, (2) VIII, 301.
- Infinitesimal deformation of the skew helicoid, (2) IX, 148.
- Surfaces referred to their lines of length zero, (2) IX, 242.
- See REVIEWS under Tannenberg, W. de.
- ELLIOTT, E. B. See NASH, A. M.
- EMCH, A. Reciprocal transformations of projective coordinates and the theorems of Ceva and Menelaos, (2) V, 143.
- Note on the  $p$ -discriminant of ordinary linear differential equations, (2) X, 137.
- ENESTRÖM, G. Note upon the history of the rules of convergence in the eighteenth century, III, 186.
- See REVIEWS under Fine, H. B.
- EPSTEIN, S. Proof that the group of an irreducible linear differential equation is transitive, (2) VIII, 239.
- On integrability by quadratures, (2) IX, 152.
- On linear differential congruences, (2) X, 23.
- On linear homogeneous difference equations and continuous groups, (2) X, 499.
- FIELDS, J. C. See REVIEWS under Craig, T.
- FINE, H. B. Kronecker and his arithmetical theory of the algebraic equation, I, 173.
- See REVIEWS under Mathematical papers; Murray, D. A.
- FISKE, T. S. On the doubly infinite products, I, 61.
- Note on the integration of a uniformly convergent series through an infinite interval, (2) III, 223.
- See PICARD, E.
- See REVIEWS under Bass, E. W.; Briot, C. A.; Chapman, C. H.; Fisher, I.; Gould, E. S.; Hall, W. S.; Livret; Nicholson, J. W.; Perry, J.; Proctor, R. A.
- Reports of the Brooklyn and the Springfield meetings of the American Mathematical Society, (2) I, 1; (2) II, 1.
- Report of the Buffalo colloquium, (2) III, 49.
- FITE, W. B. Concerning the class of a group of order  $p^m$  that contains an operator of order  $p^{m-2}$  or  $p^{m-3}$ ,  $p$  being a prime, (2) VIII, 236.

- Concerning the commutator subgroups of groups whose orders are powers of primes, (2) IX, 139.
- On some properties of groups whose orders are powers of a prime, (2) X, 346.
- FORD, W. B. Dini's method of showing the convergence of Fourier's series and of other allied developments, (2) VII, 227.
- See REVIEWS under Frischauf, J.
- FRANKLIN, F. James Joseph Sylvester, (2) III, 299.
- See REVIEWS under Meyer, W. F.
- FRIZELL, A. B. See REVIEWS under Hatzidakis, J. N.
- GAINES, J. M. See REVIEWS under Hunter, A.; Virgilii, F.; Walsh, C. M.
- GALE, A. S. On three types of surfaces of the third order regarded as double surfaces of translation, (2) X, 188.
- See REVIEWS under Alexandroff, I.; Appell, P.; Doehlemann, K.
- HAGEN, J. G. On the history of the extensions of the calculus, (2) VI, 381.
- HALL, E. H. See REVIEWS under Buckingham, E.
- HALSTED, G. B. Lambert's non-euclidean geometry, III, 79.
- See REVIEWS under Cajori, F.
- HARDCASTLE, F. Some observations on the modern theory of point groups, (2) IV, 390.
- HARKNESS, J. See REVIEWS under Dini, U.; Greenhill, A. G.; Jordan, C.; Osgood, W. F.
- HASKELL, M. W. Note on resultants, I, 223.
- On the definition of logarithms, II, 164.
- On the introduction of the notion of hyperbolic functions, (2) I, 155.
- See KLEIN, F.
- HATHAWAY, A. S. Early history of the potential, I, 66.
- Elementary proof of the quaternion associative principle, (2) II, 43.
- Quaternions as numbers of four-dimensional space, (2) IV, 54.
- Pure mathematics for engineering students, (2) VII, 266.
- See REVIEWS under Beman, W. W.; Edwards, G. C.; McAulay, A.; Van Velzer, C. A.
- HAWKES, H. E.; Limitations of Greek arithmetic, (2) IV, 530.
- Note on Hamilton's determination of irrational numbers, (2) VII, 306.
- See REVIEWS under Mansion, P.
- HEDRICK, E. R. On the sufficient conditions in the calculus of variations, (2) IX, 11.
- Supplementary note on the calculus of variations, (2) IX, 245.

- See REVIEWS under Boehm, K.; Fricke, R.; Geissler, K.; Hilbert, D.
- HENDERSON, R. Moral values, (2) II, 46.
