THE NEW ERA PRINTING COMPANY

LANCASTER, PA.

Is prepared to execute in first-class and satisfactory manner all kinds of printing and electrotyping. Particular attention given to the work of Schools, Colleges, Universities, and Public Institutions.

Books, Periodicals

Technical and Scientific Publications

Monographs, Theses, Catalogues

Announcements, Reports, etc.

All Kinds of Commercial Work

(*Printers of the Bulletin and Transactions of the American Mathematical Society, etc., etc.*)

Publishers will find our product ranking with the best in workmanship and material, at satisfactory prices. Our imprint may be found on a number of high-class Technical and Scientific Books and Periodicals. Correspondence solicited. Estimates furnished.

THE NEW ERA PRINTING COMPANY

JOURNAL DE MATHÉMATIQUES PURES ET APPLIQUÉES

Founded in 1836 by Joseph Liouville

EDITED BY

CAMILLE JORDAN

WITH THE ASSISTANCE OF

R. DE MONTESSUS DE BALLORE, E. PICARD, H. VILLAT

This Journal, which has been among the foremost exponents of mathematics for nearly a century, was in danger of discontinuance owing to the changed financial situation caused by the war. By prompt action of a group of French mathematicians, its publication has been assured for the immediate present. This group contains, in addition to the editors, such eminent men as Appell, Borel, Boussinesq, Boutroux, Brillouin, Cartan, Drach, Goursat, Guichard, Hadamard, Koenigs, Lebesgue, Montel, Painlevé, Vesiot.

To insure the permanence of the Journal, subscriptions are invited. The present price is 90 francs, now equivalent to about $6.50.

Subscriptions should be sent to H. Villat, 11 rue de Maréchal Pétain, Strasbourg, France.

REQUEST FOR BACK NUMBERS

Owing chiefly to a disastrous fire several years ago, the stock of certain volumes of this BULLETIN is seriously depleted. Of many volumes there is a sufficient stock for present needs, but full sets cannot be made up to fill orders.

Members are requested to donate back numbers or volumes needed, or complete sets, if they do not care to keep them permanently; or to will them to the Society at their death.

The volumes needed particularly are:—

No stock on hand: vols. 2, 3, New York Math. Soc.; vols. 1, 2, 3, 4, 5, 9, 10, Amer. Math. Soc.
Stock only 1 copy: vol. 8. (We have 20 copies of Nos. 2, 3, 4, 5.)
Stock only 8 copies: vol. 7. (We have 16 copies of all but No. 5.)
We need also vol. 6, No. 6; vol. 14, No. 3; vol. 17, No. 2.

There are outstanding orders for complete sets which cannot be filled. Members who can supply missing numbers will aid the Society in this critical financial period by facilitating such sales.

Committee on Sales of Publications.

A. B. COBLE, E. R. HEDRICK, W. R. LONGLEY (Chairman)

ADVERTISE YOUR BOOKS IN THE BULLETIN

Advertising space is available in the BULLETIN at $16 per page, $9 per half page, and $5 per quarter page, per issue.

We easily forget—tell us again in the BULLETIN how good they are.

MATHEMATICS OF FINANCE

by

H. L. RIETZ, Ph.D., *Professor of Mathematics, University of Iowa.*

A. R. CRATHORNE, Ph.D., *Assistant Professor of Mathematics, University of Illinois.*

J. C. RIETZ, A.B., *Actuary of the Midland Mutual Life Insurance Company and Assistant Professor of Mathematics, Ohio State University.*

It is the main purpose of this book to present a teachable elementary course in the application of mathematics to a broad class of financial problems. In particular the book treats the relation of interest to the amortization of debts, to the creation of sinking funds, to the treatment of depreciation, to the valuation of bonds, to the accumulation of funds in building and loan associations and to the elements of life insurance.

Three chapters are devoted to the subject of insurance. This is not a technical actuarial treatment, but simply a sufficient introduction to the mathematics of insurance to give a proper quantitative knowledge of the subject and an appreciation of the beautiful system of long time finance involved in legal reserve life insurance.

The material of the book has been obtained from many sources and tested in teaching such courses at three large universities. For the study of the book no mathematical preparation, except that usually included in the high-school course, is absolutely necessary.

OFFICIAL COMMUNICATIONS

At the meeting of the Council in connection with the summer meeting the following votes were passed:—

1) In view of the serious financial problems confronting the Society, to authorize a campaign for new members. In this connection to recommend to the Society that By-Law 1 be suspended during the months November, 1921, to February, 1922, inclusive.

2) To proceed with incorporation, by special act of Congress, in the District of Columbia.

3) To request the Committee of Publication to begin the new volume of the Bulletin with the January number, so that the Bulletin, continuing henceforth as before as a journal of ten numbers yearly, shall begin its volume in January instead of October.

4) To hold the April meeting in Chicago on April 14–15 or such other date as the Secretary of the Society and the Secretary of the Chicago Section may determine.

The following dates have been fixed for meetings of the Society:

NEW YORK—October 29, 1921; February 25, 1921.

ST. LOUIS—Washington University, November 26, 1921.

SAN FRANCISCO—University of California, October 22, 1921; April 8, 1921.

TORONTO—December 28–29, 1921.

CHICAGO—April 14–15, 1921.

R. G. D. RICHARDSON,
Secretary.

Articles for insertion in the BULLETIN should be addressed to E. R. HEDRICK, Editor of the BULLETIN, 304 Hicks Ave., Columbia, Mo. Reviews should be sent to J. W. YOUNG, Dartmouth College, Hanover, N. H. Notes should be sent to W. A. HURWITZ, No. 8 White Hall, Ithaca, N. Y.

Subscriptions to the BULLETIN, orders for back numbers, and inquiries in regard to non-delivery of current numbers should be addressed to The American Mathematical Society, 501 West 116th Street, New York.

Changes of address of members, exchanges, and subscribers should be communicated at once to the Secretary of the American Mathematical Society, R. G. D. RICHARDSON, 501 West 116th Street, New York.

The initiation fees and annual dues of members of the American Mathematical Society are payable to the Treasurer of the American Mathematical Society, W. B. FITE, 501 West 116th Street, New York.
