BOOKS AND PAMPHLETS FOR OUR LIBRARY.

Probably almost every mathematician has numerous mathematical books, pamphlets (not reprints), and periodicals (perhaps only single numbers) for which he no longer has use, or at least such as he would gladly place where they might be of service. The Librarian of the Society gives notice herewith that *all* publications of this kind, in pure and applied mathematics, and astronomy, would be most acceptable in assisting him to make the Library, not only more effective as a stimulus to higher research, but also a great historical collection which should, therefore, include even texts of the secondary and grammar schools.

Gifts should be sent addressed: Librarian, American Mathematical Society, 501 West 116th Street, New York, N. Y. Volumes sent in duplicate will be made a real asset to the Library through their exchange, in different parts of the world, for other works.

R. C. ARCHIBALD,
Librarian of the Society.
