

OFFICIAL COMMUNICATIONS

MEETINGS OF THE SOCIETY

NEW YORK CITY, October 30, 1948.

Abstracts must be in the hands of Associate Secretary T. R. Hollcroft, American Mathematical Society, 531 West 116th St., New York 27, N. Y., not later than September 18. By invitation of the Committee to Select Hour Speakers for Eastern Sectional Meetings, there will be an address by Professor Raphael Salem entitled *Convexity theorems*.

CHICAGO, ILLINOIS, November 26–27, 1948.

Abstracts must be in the hands of Associate Secretary J. W. T. Youngs, Indiana University, Bloomington, Ind., not later than October 15. By invitation of the Committee to Select Hour Speakers for Western Sectional Meetings, there will be an address by Professor P. R. Halmos entitled *Measurable transformations* and an address by Professor Saunders MacLane entitled *Duality for groups*.

LOS ANGELES, CALIFORNIA, November 27, 1948.

Abstracts must be in the hands of Associate Secretary J. W. Green, University of California at Los Angeles, Los Angeles 24, Calif., not later than October 16. By invitation of the Committee to Select Hour Speakers for Far Western Sectional Meetings, there will be an address by Professor Herbert Busemann entitled *The geometry of Finsler spaces*.

ANNUAL MEETING: COLUMBUS, OHIO, December 28–30, 1948.

Abstracts must be in the hands of Associate Secretary J. W. T. Youngs, Indiana University, Bloomington, Ind., not later than November 16. The annual Gibbs Lecture, entitled *Ramifications, old and new, of the eigenvalue problem*, will be delivered by Professor Hermann Weyl. By invitation of the Committee to Select Hour Speakers for Annual and Summer Meetings, there will be an address by Professor Mark Kac entitled *Probability methods in some problems of analysis and theory of numbers*, an address by Professor A. S. Besicovitch entitled *Parametric surfaces*, and an address by Professor Lamberto Cesari entitled *Area and representation of surfaces*. Professor Einar Hille will deliver his retiring presidential address entitled *Lie theory of semi-groups of linear transformations*.

NEW YORK CITY, February 26, 1949.

CHICAGO, ILLINOIS, February 26, 1949.

INTERNATIONAL CONGRESS OF MATHEMATICIANS, August 30–September 6, 1950.

By invitation of the American Mathematical Society, an International Congress will be held in Cambridge, Massachusetts, with Harvard University as principal host. In addition to sectional meetings for contributed papers, there will be Conferences in Algebra, Analysis, Applied Mathematics, and Topology. Communications should be addressed to the American Mathematical Society, 531 West 116th Street, New York 27, N. Y., U.S.A.

J. R. KLINE, *Secretary of the Society*.

CONTENTS

Vol. 54, No. 10 OCTOBER, 1948 Whole No. 589

	Page
On the difference of consecutive primes. By P. ERDÖS.	885
Note on a problem in number theory. By H. N. SHAPIRO.	890
A note on Hilbert's nullstellensatz. By RICHARD BRAUER.	894
A nonassociative method for associative algebras. By SAUNDERS MACLANE.	897
Universal quaternary quadratic forms. By D. C. MORROW.	903
Some analogs of the generalized principal axis transformation. By N. A. WIEGMANN.	905
Polynomials in topological fields. By IRVING KAPLANSKY.	909
A note on the singular manifolds of a difference polynomial. By R. M. COHN.	917
Distinct representatives of subsets. By MARSHALL HALL.	922
Existence theorems connected with the Picard-Vessiot theory of homogeneous linear ordinary differential equations. By E. R. KOLCHIN.	927
On some examples in the theory of power series. By P. TURÁN.	932
A generalization of a theorem on linear differential equations. By A. S. AMITSUR.	937
On the location of the zeros of the derivatives of a polynomial symmetric in the origin. By J. L. WALSH.	942
On polynomials and Lagrange's form of the general mean-value theorem. By V. RAMASWAMI.	946
Proof of a theorem of Saks and Sierpinski. By CASPER GOFFMAN.	950
A ratio test. By ORRIN FRINK.	953
The structure of minimal sets. By MARIANO GARCIA and G. A. HEDLUND.	954
A zero-dimensional topological group with a one-dimensional factor group. By SAMUEL KAPLAN.	964
Topological groups and generalized manifolds. By E. G. BEGLE	969
Paracompactness and product spaces. By A. H. STONE.	977
Transitivity and equicontinuity. By W. H. GOTTSCHALK.	982
Correction to my paper "Note on affinely connected manifolds." By S. S. CHERN.	985
Recursion and double recursion. By R. M. ROBINSON.	987
On the reliability of the membrane theory of shells of revolution. By C. TRUESDELL.	994
On the existence of steady gas flow in plane isothermal streamline patterns. By R. C. PRIM.	1009

Articles for insertion in the BULLETIN should be typewritten, double spaced, and the author should keep a complete copy. Papers in algebra and theory of numbers should be sent to NATHAN JACOBSON, Leet Oliver Memorial Hall, Yale University, New Haven, Conn.; in analysis to R. E. LANGER, North Hall, University of Wisconsin, Madison 6, Wis.; in other fields to DEANE MONTGOMERY, Institute for Advanced Study, Princeton, N. J. Reviews should be sent to E. R. LORCH, Milbank Hall, Columbia University, New York 27, N. Y., and items for Notes to BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY, 531 West 116th St., New York 27, N. Y. All communications relating to the odd-numbered issues of the BULLETIN should be sent to E. B. STOFFER, University of Kansas, Lawrence, Kan., and all other communications to the editors should be addressed to the Managing Editor, R. E. LANGER, North Hall, University of Wisconsin, Madison 6, Wis.

The initial fees and annual dues of members of the Society (see this BULLETIN November, 1946, Part 2, p. 105; and May, 1947, p. 459) are payable to the Treasurer of the Society, B. P. GILL, 531 West 116th St., New York 27, N. Y.
