JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

TRANSLATION JOURNALS

Soviet Mathematics–Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR.

Mathematics of the USSR–Izvestija, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA.

Mathematics of the USSR–Sbornik is a monthly journal and is a cover-to-cover translation of MATEMATICHSKIĬ SBORNIK (NOVAYA SERIYA).

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of TEORIYA VEROYATNOSTEĬ I MATEMATICHESKAYA STATISTIKA.

Vestnik Leningrad University (Mathematics) is the complete translation into English of the mathematics section of the VESTNIK LENINGRADSKOGO UNIVERSITETA.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA.

Proceedings of the Steklov Institute of Mathematics is a translation of the PROCEEDINGS OF THE STEKLOV INSTITUTE OF MATHEMATICS IN THE ACADEMY OF SCIENCES OF THE USSR.

RESEARCH JOURNALS

Submission information for these journals is included in the May and September issues of this *Bulletin*.

Bulletin (New Series) of the American Mathematical Society is a bimonthly journal which contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS.

OTHER JOURNALS

Abstracts of Papers Presented to the American Mathematical Society contains abstracts of invited hour addresses of papers presented in special sessions or in sessions for contributed papers and of papers presented to the Society "by title".

Current Mathematical Publications, issued biweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and review of the current mathematical literature of the world. Each volume consists of six regular issues plus an index issue. Starting in 1979 the second volume index each year is the author and subject index for the entire year. Abstracts and reviews are grouped under subject headings.

Notices of the American Mathematical Society, published eight times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classifications from the 1980 Mathematics Subject Classification and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)

Thomas J. Jech, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

COMBINATORICS AND DISCRETE MATHEMATICS (05 15)

Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)

William C. Waterhouse, Department of Mathematics, Pennsylvania State University, University Park, Pennsylvania 16802

GENERAL ALGEBRA (16 17 18 08)

Donald Passman, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

GROUP THEORY (20)

David M. Goldschmidt, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)

Reinhard E. Schultz, Department of Mathematics, Purdue University, West Lafayette, Indiana 47907

REAL VARIABLES (26 28 40)

J. Jerry Uhl, Jr., Department of Mathematics, University of Illinois, Urbana, Illinois 61801

COMPLEX VARIABLES (30 31 32)

W. E. Kirwan, Department of Mathematics, University of Maryland, College Park, Maryland 20742

NUMBER THEORY (10)

Larry J. Goldstein, Department of Mathematics, University of Maryland, College Park, Maryland 20742

DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 35 39 49 58)

George R. Sell, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

GENERAL ANALYSIS (41 42 43 44 45)

Richard R. Goldberg, Department of Mathematics, Vanderbilt University, Nashville, Tennessee 37235

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)

Catherine L. Olsen, Department of Mathematics, State University of New York at Buffalo, Buffalo, New York 14214

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)

William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)

Donald E. Sarason, Department of Mathematics, University of California at Berkeley, Berkeley, California 94720

LIE GROUPS AND GEOMETRY (22 51 53)

Jeff Cheeger, Department of Mathematics, State University of New York at Stony Brook, Stony Brook, New York 11794

GENERAL TOPOLOGY (54)

David J. Lutzer, Department of Mathematics and Statistics, Miami University, Oxford, Ohio 45056

Doug W. Curtis, Department of Mathematics, Louisiana State University, Baton Rouge, Louisiana 70803

PROBABILITY AND OTHER FIELDS (60–99 inclusive)

Bert E. Fristedt, School of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

All other communications should be addressed to the Managing Editor, Richard R. Goldberg, at the above address.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Manuscripts should be submitted to one of the following editors.

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow:

Real analysis (excluding harmonic analysis) and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Harmonic and complex analysis to LINDA PREISS ROTHSCHILD, Department of Mathematics, University of Wisconsin, Madison, WI 53706

Abstract analysis to WILLIAM B. JOHNSON, Department of Mathematics, Ohio State University, Columbus, OH 43210

Algebra and number theory (excluding universal algebras) to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Logic, foundations, universal algebras and combinatorics to JAN MYCIELSKI, Department of Mathematics, University of Colorado, Boulder, CO 80309.

Topology to WALTER D. NEUMANN, Department of Mathematics, University of Maryland, College Park, MD 20742

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903

Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801

All other communications to the editors should be addressed to the Managing Editor, R. O. WELLS, JR., Department of Mathematics, Rice University, Houston, TX 77251

BOOK REVIEW EDITOR: Meyer Jerison
MANAGING EDITOR: Calvin C. Moore

MANUSCRIPT, PROOF AND COPYING INFORMATION

SUBMISSION OF MANUSCRIPT

Articles submitted for publication should be typewritten and double spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification can be found in the December index volumes of Mathematical Reviews.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the authors upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, copies are sent to the author who is designated to receive galley proof. Authors are urged to return the form immediately to prevent delays in processing and publishing of the manuscript. The 1978 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

Research Announcements carry a page charge of $40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

REPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (For details write Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970.)

ABCDEFGHIJ–CM–89876543

(*Continued from back cover*)

Function theory of several complex variables *by Steven G. Krantz*—**Reviewed by** *Eric Bedford* 500

Hardy spaces on homogeneous groups *by G. B. Folland and E. M. Stein*—**Reviewed by** *Roe Goodman* 505

Group analysis of differential equations *by L. V. Ovsiannikov*—**Reviewed by** *Robert Hermann* 508

Subnormal operators *by John B. Conway*—**Reviewed by** *Paul S. Muhly* 511

CONTENTS May 1983

Research — Expository Papers

Periodic solutions of nonlinear vibrating strings and duality principles *by Haïm Brezis* 409

Physical space-time and nonrealizable CR-structures *by Roger Penrose* 427

Research Announcements

Universal knots *by Hugh M. Hilden, M. T. Lozano and José María Montesinos* 449

On fixed points of automorphisms of finitely generated free groups *by S. M. Gersten* 451

Real and complex Chebyshev approximation on the unit disk and interval *by Martin H. Gutknecht and Lloyd N. Trefethen* 455

Some problems in potential theory and the notion of harmonic entropy *by Boris Korenblum* 459

On the construction of infinitely many, mutually noncongruent, examples of minimal imbeddings of S^{2n-1} into CP^n, $n \geq 2$ *by W. T. Hsiang, W. Y. Hsiang and P. Tomter* 463

Nowhere solvable homogeneous partial differential equations *by Howard Jacobowitz and François Treves* 467

Book Reviews

Quantum fields in curved space *by N. D. Birrell and P. C. W. Davies*—**Reviewed by** *Bent Ørsted* 471

Non-relativistic quantum dynamics *by W. O. Amrein*—**Reviewed by** *Karl Gustafson* 477

Solvability of nonlinear equations and boundary value problems *by Svatopluk Fučík*—**Reviewed by** *Alan C. Lazer* 482

Applications of number theory to numerical analysis *by Loo Keng Hua and Yuan Wang*—**Reviewed by** *Emil Grosswald* 489

Rational homotopy theory and differential forms *by Phillip A. Griffiths and John W. Morgan*—**Reviewed by** *K.-T. Chen* 496

Real variable methods in Fourier analysis *by M. de Guzman*; **Interpolation of operators and singular integrals, an introduction to harmonic analysis** *by Cora Sadosky*—**Reviewed by** *William Connett and Grant Welland* 498

(*Continued on inside back cover*)
