

**JOURNALS PUBLISHED BY
THE AMERICAN MATHEMATICAL SOCIETY
TRANSLATION JOURNALS**

Soviet Mathematics–Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR.

Mathematics of the USSR–Izvestiya, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA.

Mathematics of the USSR–Sbornik is a bimonthly journal and is a cover-to-cover translation of MATEMATICHESKIĬ SBORNIK (NOVAYA SERIYA).

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIYA VEROYATNOSTEĬ I MATEMATICHESKAYA STATISTIKA.

Vestnik of the Leningrad University (Mathematics) is the complete translation into English of the mathematics section of the VESTNIK LENINGRADSKOGO UNIVER-SITETA.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA.

Proceedings of the Steklov Institute of Mathematics is a translation of AKADE-MIYA NAUK SSSR TRUDY ORDENA LENINA MATEMATICHESKOGO INSTI-TUTA IMENI V. A. STEKLOVA.

RESEARCH JOURNALS

Submission information for these journals is included in the April and October issues of this BULLETIN.

Bulletin (New Series) of the American Mathematical Society is a quarterly journal which contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS.

OTHER JOURNALS

Abstracts of Papers Presented to the American Mathematical Society contains abstracts of invited hour addresses, of papers presented in special sessions or in sessions for contributed papers, and of papers presented to the Society “by title”.

Current Mathematical Publications, issued triweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Abstracts and reviews are grouped according to the 1980 Mathematics Subject Classification scheme. The subscription includes an annual author and subject index.

Notices of the American Mathematical Society, published eight times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

BULLETIN (New Series) of the American Mathematical Society

EDITORS

EDITORIAL BOARD FOR RESEARCH-EXPOSITORY ARTICLES

Hyman Bass Chairman	Benedict Gross Irving Kaplansky
Felix Browder	John W. Milnor
S. S. Chern	Gian-Carlo Rota
Frederick W. Gehring	Wilfred Schmid

EDITORIAL BOARD FOR RESEARCH ANNOUNCEMENTS

Spencer Bloch	Richard Melrose
Charles L. Fefferman	Calvin C. Moore Chairman
Ronald L. Graham	Yiannis Moschovakis
Henry P. McKean, Jr.	Harold M. Stark

BOOK REVIEW EDITOR: Meyer Jerison

MANAGING EDITOR: Meyer Jerison

MANUSCRIPT, PROOF AND COPYING INFORMATION

SUBMISSION OF MANUSCRIPT

Articles submitted for publication should be typewritten and double spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory if clearly done; directions to the printer should be included where necessary on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification can be found in the December index volumes of *Mathematical Reviews*.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the authors upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, copies are sent to the author who is designated to receive galley proof. Authors are urged to return the form immediately to prevent delays in processing and publishing the manuscript. The 1984 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

Research Announcements carry a page charge of \$50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

REPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc. 21, Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works or for resale.

(Continued from back cover)

Theory of charges, a study of finitely additive measures by <i>K. P. S. Bhaskara Rao and M. Bhaskara Rao</i> —Reviewed by <i>John C. Oxtoby</i>	221
A problem seminar by <i>Donald J. Newman</i> —Reviewed by <i>Bruce Reznick</i>	223
Clifford analysis by <i>F. Brackx, R. Delanghe and F. Sommen</i> —Reviewed by <i>Richard D. Carmichael</i>	227
Cohomology of groups by <i>Kenneth S. Brown</i> —Reviewed by <i>Karl W. Gruenberg</i>	240
Schauder bases in Banach spaces of continuous functions by <i>Zbigniew Semadeni</i> —Reviewed by <i>Stanislaw J. Szarek</i>	244

Research — Expository Papers

The dynamical systems approach to differential equations by <i>Morris W. Hirsch</i>	1
The heat equation in several complex variables by <i>Nancy K. Stanton</i>	65
Complex analytic dynamics on the Riemann sphere by <i>Paul Blanchard</i>	85

Research Announcements

Singular minimizers for regular one-dimensional problems in the calculus of variations by <i>John M. Ball and Victor J. Mizel</i>	143
Some results on box splines by <i>Wolfgang Dahmen and Charles A. Micchelli</i> ...	147
Asymptotic properties of normal and nonnormal holomorphic mappings by <i>Kyong T. Hahn</i>	151
Prime values of polynomials and irreducibility testing by <i>Kevin S. McCurley</i>	155
Definable sets in ordered structures by <i>Anand Pillay and Charles Steinhorn</i> .	159
Imbedding estimates involving new norms and applications by <i>Martin Schechter</i>	163
Julia sets and bifurcation diagrams for exponential maps by <i>Robert L. Devaney</i>	167
Singular asymptotics approach to partial differential equations with isolated singularities in the coefficients by <i>Constantine J. Callias and Gunther A. Uhlmann</i>	172
Modular forms associated to closed geodesics and arithmetic applications by <i>Svetlana Katok</i>	177
The strong multiplicity one theorem for GL_n by <i>Carlos J. Moreno</i>	180
The spherical Bernstein problem in even dimensions by <i>Per Tomter</i>	183
The asymptotic behavior of nonlinear Schrödinger equations by <i>Yoshio Tsutsumi and Kenji Yajima</i>	186
The geometry of the moduli space of Riemann surfaces by <i>Scott A. Wolpert</i>	189

Book Reviews

Riemannian geometry by <i>Wilhelm Klingenberg</i> —Reviewed by <i>Robert E. Greene</i>	193
Semimartingales, a course on stochastic processes by <i>Michel Métivier</i> —Reviewed by <i>Bruce Hajek</i>	198
Shock waves and reaction-diffusion equations by <i>Joel Smoller</i> —Reviewed by <i>Ronald J. DiPerna</i>	204
A concrete approach to division rings by <i>John Dauns</i> ; Skew fields by <i>P. K. Draxl</i> —Reviewed by <i>David J. Saltman</i>	214
