

JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

TRANSLATION JOURNALS

Soviet Mathematics–Doklady is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences in the USSR. DOKLADY publishes 500 articles a year, each about four pages long.

Mathematics of the USSR–Izvestiya, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA, published by the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

Mathematics of the USSR–Sbornik is a bimonthly journal and is a cover-to-cover translation of MATEMATICHESKII SBORNIK (NOVAYA SERIYA), published by the Moscow Mathematical Society and the Academy of Sciences of the USSR. This is a journal of current research in all fields of pure mathematics.

Theory of Probability and Mathematical Statistics is the cover-to-cover translation into English of the TEORIYA VEROYATNOSTEĬ I MATEMATICHESKAYA STATISTIKA published by Kiev University, beginning with the 1970 Soviet publication.

Transactions of the Moscow Mathematical Society is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA which contains the results of original research in pure mathematics.

Proceedings of the Steklov Institute of Mathematics is a translation of the AKADEMIYA NAUK SSSR TRUDY ORDENA LENINA MATEMATICHESKOGO INSTITUTA IMENI V. A. STEKLOVA. Issues contain book-length articles or collections of articles pertaining to the same topic.

CONTENT AND SUBMISSION INFORMATION FOR RESEARCH JOURNALS

Bulletin (New Series) of the American Mathematical Society contains Research-Expository Papers, Research Announcements and Reviews of Books on Advanced Mathematics. See inside front cover for submission information.

Journal of the American Mathematical Society is devoted to research articles of the highest quality in all areas of pure and applied mathematics.

Mathematics of Computation is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation. In addition, reviews and notes in these and related fields are published. Prospective publications should be sent to the Editor, WALTER GAUTSCHI, Computer Sciences Department, Purdue University, West Lafayette, Indiana 47907.

Memoirs of the American Mathematical Society is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS. An issue of the MEMOIRS is made up of one or more numbers; a number contains either a single monograph or a group of cognate papers. Copy is supplied by the author; information on preparation of camera copy may be obtained by writing to the Editorial Department of the American Mathematical Society. Papers should be sent to the appropriate editor of TRANSACTIONS.

Proceedings of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet. Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classifications from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

Logic and foundations (03 04) to ANDREAS R. BLASS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

Combinatorics and discrete mathematics (05 15) to THOMAS H. BRYLAWSKI, University of North Carolina, Chapel Hill, NC 27514

Combinatorics, computer science, and information theory (05 68 94) to ANDREW ODLYZKO, Room 2C-370, Bell Laboratories, Murray Hill, NJ 07974

Commutative algebra (06 12 13 14 15 18) to LOUIS J. RATLIFF, JR., Department of Mathematics, University of California, Riverside, CA 92502

General algebra (16 17 18 08) to DONALD PASSMAN, University of Wisconsin, Madison, WI 53706

Group theory (20) to WARREN J. WONG, University of Notre Dame, Notre Dame, IN 46556

Algebraic and differential topology (55 57 58) to FREDERICK R. COHEN, University of Kentucky, Lexington, KY 40506

Real variables (26 28 40) to R. DANIEL MAULDIN, Department of Mathematics, North Texas State University, Denton, TX 76203

Complex variables (30 31 32) to IRWIN KRA, State University of New York at Stony Brook, Stony Brook, NY 11794

Number theory (11) to WILLIAM ADAMS, 11520 Lockhart Place, Silver Spring, MD 20902

Ordinary differential equations and dynamical systems (33 34 39 49 58) to KENNETH R. MEYER, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, OH 45221-0025

Partial differential equations (35 49) to BARBARA L. KEYFITZ, University of Houston—University Park, Houston, TX 77004

General analysis (41 42 43 44 45) to J. MARSHALL ASH, DePaul University, Chicago, IL 60614

Functional analysis and operator theory (46 47) to JOHN B. CONWAY, Department of Mathematics, Indiana University, Bloomington, IN 47405

Functional analysis and convexity (46 52) to WILLIAM J. DAVIS, Ohio State University, Columbus, OH 43210

Complex variables, functional analysis, and operator theory (30 46 47) to PAUL S. MUHLY, University of Iowa, Iowa City, IA 52242

Lie groups and geometry (22 51 53) to JONATHAN M. ROSENBERG, University of Maryland, College Park, MD 20742

General topology (54) to DENNIS BURKE, Miami University of Ohio, Oxford, OH 45056, or JAMES E. WEST, Cornell University, Ithaca, NY 14853

Probability and certain other fields (60–99 inclusive) to WILLIAM D. SUDDERTH, Department of Statistics, University of Minnesota, Minneapolis, MN 55455, or GEORGE C. PAPANICOLAOU, Applied Mathematics Division, New York University—Courant Institute, 251 Mercer Street, New York, NY 10012

All other communications should be addressed to the Managing Editor, WILLIAM J. DAVIS, at the above address.

Transactions of the American Mathematical Society is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS. Two copies of the manuscript should be submitted to one of the following editors.

Ordinary differential equations, partial differential equations and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Complex and harmonic analysis to ROBERT J. ZIMMER, Department of Mathematics, University of Chicago, Chicago, IL 60637

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Classical analysis to EUGENE FABES, Department of Mathematics, University of Minnesota, Minneapolis, MN 55455

Algebra, algebraic geometry and number theory to DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to RONALD K. GETTOR, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory and general topology to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

Automorphic and modular functions and forms, geometry of numbers, multiplicative theory of numbers, zeta and L -functions of number fields and algebras to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

All other communications to the editors should be addressed to the Managing Editor, RONALD L. GRAHAM, Mathematical Sciences Research Center, AT&T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

OTHER JOURNALS

Abstracts of Papers Presented to the American Mathematical Society contains abstracts of invited hour addresses, of papers presented in special sessions or in sessions for contributed papers, and of papers presented to the Society "by title".

Current Mathematical Publications, issued triweekly, contains a subject-classified index of papers and books being published currently in mathematics.

Mathematical Reviews is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Abstracts and reviews are grouped according to the 1980 Mathematics Subject Classification scheme (1985 Revision). The subscription includes an annual author and subject index.

Notices of the American Mathematical Society, published ten times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

BOOK REVIEWS EDITOR: Edgar Lee Stout

MANAGING EDITOR: Morris W. Hirsch

MANUSCRIPT, PROOF, AND COPYING INFORMATION

MANUSCRIPT

Articles submitted for publication should be typewritten and double-spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand-drawn symbols are satisfactory if clearly done; special instructions for the typesetter, when necessary, should be included on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification (1985 Revision) can be found in the annual subject index volumes of *Mathematical Reviews*.

To encourage the submission of manuscripts in electronic form using $\text{T}_{\text{E}}\text{X}$ and the $\mathcal{A}\mathcal{M}\mathcal{S}\text{-T}_{\text{E}}\text{X}$ macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the

Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

OFFPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the author upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, a copy is sent to each author. Authors are urged to return the form immediately to prevent delays in processing and publishing the manuscript. The 1984 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

PUBLICATION CHARGES

There are no page charges assessed on papers published in the BULLETIN.

REMARKS ON RESEARCH ANNOUNCEMENTS

The BULLETIN of the American Mathematical Society is the only research mathematical journal received as a privilege of membership in the Society. Its circulation is larger, by an order of magnitude, than that of most journals, in particular specialized journals. Thus, a BULLETIN Research Announcement should contain results of sufficient depth and import to be of interest to a wide mathematical audience. And, consequently, beyond basic mathematical standards, Research Announcements should meet high standards for style.

Beyond general exhortations to write clearly and precisely, the following more specific suggestions are offered.

1. Keep in mind that you are writing for as wide an audience as possible. Avoid the shorthand and jargon of your area as much as you can. Carefully introduce the terminology needed to understand the main results. If space considerations prevent a full development of the concepts, delineate clearly what you are not explaining and provide references to it in the literature. Consider an Announcement an opportunity to explain your area of research to the world at large.

2. Do not confuse a graceful style with a sloppy style. Although a light touch or a colorful phrase can relieve the tedium of definitions, excessive breeziness and imprecision confuse readers who have only a casual knowledge of the subject. We say this not to encourage pedantic writing but to discourage obscure writing. Your results should be stated precisely with all important concepts and notations made clear.

3. Ask a colleague to review your manuscript before you submit it. Even better, ask two colleagues, one whose work is very close to yours, one whose work is farther away. (If you can't get two people you know to read your work before it is published, how many will want to read it after?) Ask for suggestions on how to improve the readability.

 Yorke, James A. *See* Hammel, Stephen M.

BOOK REVIEWS

- Anderson, Ian. *Combinatorics of finite sets*, reviewed by West, Douglas B., 515
 Apanasov, B. N. *See* Krushkal', S. L.
 Bingham, N. H., Goldie, C. M. and Teugels, J. L. *Regular variation*, reviewed by de Haan, L., 329
 Blass, Andreas R. *Set theory*, Vol. V, reviewed by Barwise, K. Jon, 524
 Burde, Gerhard and Zieschang, Heiner. *Knots*, reviewed by Birman, Joan S., 550
 Curtis, Charles W. and Reiner, Irving. *Methods of representation theory with applications to finite groups and orders*, vol. II, reviewed by Carlson, Jon F., 484
 Daverman, Robert J. *Decompositions of manifolds*, reviewed by Armentrout, Steve, 562
 Dezin, Aleksei A. *Partial differential equations: An introduction to a general theory of linear boundary value problems*, reviewed by Schechter, Martin, 508
 Ditzian, Z. and Totik, V. *Moduli of smoothness*, reviewed by Butzer, Paul L. and van Wickeren, Erich., 568
 Dubinskij, Julij A. *Sobolev spaces of infinite order and differential equations*, reviewed by Kufner, Alois, 352
 Ebbinghaus, Heinz-Dieter. *Model theory*, vol. III, reviewed by Barwise, K. Jon, 524
 Eisenbud, David and Neumann, Walter. *Three-dimensional link theory and invariants of plane curve singularities*, reviewed by Durfee, Alan H., 481
 Faddeev, L. D. and Takhtajan, L. A. *Hamiltonian methods in the theory of solitons*, reviewed by Dodd, Roger, 565
 Fomenko, A. T. *Differential geometry and topology*, reviewed by Kirwan, Frances C., 340
 Fushchich, W. I. and Nikitin, A. G. *Symmetries of Maxwell's equations*, reviewed by Olver, Peter J., 545
 Gardiner, Frederick P. *Teichmüller theory and quadratic differentials*, reviewed by Kra, Irwin, 494
 Goldie, C. M. *See* Bingham, N. H.
 Griffiths, Phillip A. and Jensen, Gary R. *Differential systems and isometric embeddings*, reviewed by Jacobowitz, Howard, 498
 Gross, Jonathan L. and Tucker, Thomas W. *Topological graph theory*, reviewed by Thomassen, Carsten, 560
 Grubb, Gerd. *Functional calculus of pseudo-differential problems*, reviewed by Eskin, Gregory, 349
 Guseviskii, N. A. *See* Krushkal', S. L.

INDEX TO VOLUME 19

- Hinman, Peter G. *Recursion theory*, vol. IV, reviewed by Barwise, K. Jon, 524
- Holzapfel, R.-P. *Geometry and arithmetic around Euler partial differential equations*, reviewed by Stiller, Peter, 356
- Jensen, Gary R. See Griffiths, Phillip A.
- Kauffman, Louis H. *On knots*, reviewed by Birman, Joan S., 550
- Kendall, W. S. See Stoyan, D.
- Kister, Jane E. *Proof theory and constructive mathematics*, reviewed by Barwise, K. Jon, 524
- Kobayashi, Shoshichi. *Differential geometry of complex vector bundles*, reviewed by Okonek, Christian, 528
- Kolchin, Valentin F. *Random mappings*, reviewed by Takács, Lajos, 511
- Krushkal', S. L., Apanasov, B. N. and Guseviskiĭ, N. A. *Kleinian groups and uniformization in examples and problems*, reviewed by Harvey, W. J., 490
- Lavrent'ev, M. M., Romanov, V. G. and Shishatskiĭ, S. P. *Ill-posed problems of mathematical physics and analysis*, reviewed by Knops, R. J., 332
- Lehto, Olli. *Univalent functions and Teichmüller spaces*, reviewed by Earle, Clifford J., 488
- Mackenzie, Kirill. *Lie groupoids and Lie algebroids in differential geometry*, reviewed by Kumpera, Antonio, 358
- Manocha, H. L. See Srivastava, H. M.
- Mecke J. See Stoyan, D.
- Müller, Gert H. Ω -*bibliography of mathematical logic*, reviewed by Barwise, K. Jon, 524
- Neumann, Walter. See Eisenbud, David
- Nikitin, A. G. See Fushchich, W. I.
- Pietsch, Albrecht. *Eigenvalues and s-numbers*, reviewed by Retherford, J. R., 531
- Pöschel, Jürgen and Trubowitz, Eugene. *Inverse spectral theory*, reviewed by Sachs, Robert L., 366
- Ramanujan, Srinivasa. *The lost notebook and other unpublished papers*, reviewed by Askey, Richard, 558
- Rautenberg, Wolfgang. *Classical logic*, vol. I, reviewed by Barwise, K. Jon, 524
- Rautenberg, Wolfgang. *Non-classical logics*, vol. II, reviewed by Barwise, K. Jon, 524
- Reiner, Irving. See Curtis, Charles W.
- Romanov, V. G. See Lavrent'ev, M. M.
- Schofield, A. H. *Representations of rings over skew fields*, reviewed by Malcolmson, Peter, 504
- Shishatskiĭ, S. P. See Lavrent'ev, M. M.
- Shubin, M. A. *Pseudodifferential operators and spectral theory*, reviewed by Treves, François, 343
- Srivastava, H. M. and Manocha, H. L. *A treatise on generating functions*, reviewed by Karlsson, Per W., 346
- Stoyan, D., Kendall, W. S. and Mecke J. *Stochastic geometry and its applications*, reviewed by Ambartzumian, R. V., 520
- Takhtajan, L. A. See Faddeev, L. D.
- Teugels, J. L. See Bingham, N. H.
- Totik, V. See Ditzian, Z.
- Trubowitz, Eugene. See Pöschel, Jürgen
- Tucker, Thomas W. See Gross, Jonathan L.
- von Wahl, Wolf. *The equations of Navier-Stokes and abstract parabolic equations*, reviewed by Giga, Yoshikazu, 337
- Wermer, John. *Selected papers of Errett Bishop*, reviewed by Rossi, Hugo, 538
- Wloka, J. *Partial differential equations*, reviewed by Schechter, Martin, 508
- Zieschang, Heiner. See Burde, Gerhard

(Continued from back cover)

Differential systems and isometric embeddings by Phillip A. Griffiths and Gary R. Jensen—Reviewed by Howard Jacobowitz	498
Representations of rings over skew fields by A. H. Schofield—Reviewed by Peter Malcolmson	504
Partial differential equations: An introduction to a general theory of linear boundary value problems by Aleksei A. Dezin; Partial differential equations by J. Wloka—Reviewed by Martin Schechter	508
Random mappings by Valentin F. Kolchin—Reviewed by Lajos Takács .	511
Combinatorics of finite sets by Ian Anderson—Reviewed by Douglas B. West	515
Stochastic geometry and its applications by D. Stoyan, W. S. Kendall, and J. Mecke—Reviewed by R. V. Ambartzumian	520
Ω-bibliography of mathematical logic edited by Gert H. Müller; Vol I: Classical logic edited by Wolfgang Rautenberg; Vol. II: Non-classical logics edited by Wolfgang Rautenberg; Vol. III: Model theory edited by Heinz-Dieter Ebbinghaus; Vol. IV: Recursion theory edited by Peter G. Hinman; Vol. V: Set theory edited by Andreas R. Blass; Vol. VI: Proof theory and constructive mathematics edited by Jane E. Kister—Reviewed by K. Jon Barwise	524
Differential geometry of complex vector bundles by Shoshichi Kobayashi—Reviewed by Christian Okonek	528
Eigenvalues and s-numbers by Albrecht Pietsch—Reviewed by J. R. Retherford	531
Selected papers of Errett Bishop edited by John Wermer—Reviewed by Hugo Rossi	538
Symmetries of Maxwell's equations by W. I. Fushchich and A. G. Nikitin—Reviewed by Peter J. Olver	545
Knots by Gerhard Burde and Heiner Zieschang; On knots by Louis H. Kauffman—Reviewed by Joan S. Birman	550
The lost notebook and other unpublished papers by Srinivasa Ramanujan—Reviewed by Richard Askey	558
Topological graph theory by Jonathan L. Gross and Thomas W. Tucker—Reviewed by Carsten Thomassen	560
Decompositions of manifolds by Robert J. Daverman—Reviewed by Steve Armentrout	562
Hamiltonian methods in the theory of solitons by L. D. Faddeev and L. A. Takhtajan—Reviewed by Roger Dodd	565
Moduli of smoothness by Z. Ditzian and V. Totik—Reviewed by Paul L. Butzer and Erich van Wickeren	568

Research-Expository Papers

From vanishing theorems to estimating theorems: the Bochner technique revisited by *Pierre H. Bérard* 371

A critique of numerical analysis by *Peter Linz* 407

On the geometry and dynamics of diffeomorphisms of surfaces by *William P. Thurston* 417

Research Announcements

On problems of U. Simon concerning minimal submanifolds of the nearly Kaehler 6-sphere by *Franki Dillen, Leopold Verstraelen, and Luc Vrancken*..... 433

The simple-zero conjecture for support points in Σ by *Y. J. Leung and G. Schober* 439

Classification of invariant cones in Lie algebras by *Joachim Hilgert and Karl H. Hofmann* 441

Topological types and multiplicities of isolated quasi-homogeneous surface singularities by *Stephen S.-T. Yau* 447

Some local-global results in finite transformation groups by *Amir H. Assadi*..... 455

Varieties in finite transformation groups by *Amir H. Assadi* 459

Numerical orbits of chaotic processes represent true orbits by *Stephen M. Hammel, James A. Yorke, and Celso Grebogi*..... 465

Singular Sobolev connections with holonomy by *L. M. Sibner and R. J. Sibner* 471

The quantum mechanical spherical pendulum by *R. Cushman and J. J. Duistermaat* 475

Book Reviews

Three-dimensional link theory and invariants of plane curve singularities by *David Eisenbud and Walter Neumann*—Reviewed by *Alan H. Durfee* 481

Methods of representation theory with applications to finite groups and orders, vol. II by *Charles W. Curtis and Irving Reiner*—Reviewed by *Jon F. Carlson*..... 484

Univalent functions and Teichmüller spaces by *Olli Lehto*—Reviewed by *Clifford J. Earle*..... 488

Kleinian groups and uniformization in examples and problems by *S. L. Krushkal', B. N. Apanasov, and N. A. Gusevskii*—Reviewed by *W. J. Harvey* 490

Teichmüller theory and quadratic differentials by *Frederick P. Gardiner*—Reviewed by *Irwin Kra* 494

(Continued on inside back cover)
