

**JOURNALS PUBLISHED BY  
THE AMERICAN MATHEMATICAL SOCIETY  
TRANSLATION JOURNALS**

**Soviet Mathematics–Doklady** is a bimonthly translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR.

**Mathematics of the USSR–Izvestiya**, a bimonthly journal, is a cover-to-cover translation of IZVESTIYA AKADEMII NAUK SSSR SERIYA MATEMATICHESKAYA.

**Mathematics of the USSR–Sbornik** is a bimonthly journal and is a cover-to-cover translation of MATEMATICHESKIĬ SBORNIK (NOVAYA SERIYA).

**Theory of Probability and Mathematical Statistics** is the cover-to-cover translation into English of the TEORIYA VEROYATNOSTEĬ I MATEMATICHESKAYA STATISTIKA.

**Transactions of the Moscow Mathematical Society** is a translation into English of TRUDY MOSKOVSKOGO MATEMATICHESKOGO OBSHCHESTVA.

**Proceedings of the Steklov Institute of Mathematics** is a translation of AKADEMIYA NAUK SSSR TRUDY ORDENA LENINA MATEMATICHESKOGO INSTITUTA IMENI V. A. STEKLOVA.

**Leningrad Mathematical Journal** is a translation of ALGEBRA I ANALIZ.

**RESEARCH JOURNALS**

Submission information for these journals is included in the April and October issues of this BULLETIN.

**Bulletin (New Series) of the American Mathematical Society** is a quarterly journal which contains research-expository papers, research announcements, and reviews of books on advanced mathematics.

**Journal of the American Mathematical Society** is devoted to research articles of the highest quality in all areas of pure and applied mathematics.

**Mathematics of Computation** is a quarterly journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices, and other aids to computation.

**Memoirs of the American Mathematical Society** is a bimonthly journal constituting a series of paperbound research tracts which are of the same general character as the papers published in the TRANSACTIONS.

**Proceedings of the American Mathematical Society** is a monthly journal devoted entirely to research in pure and applied mathematics, principally to the publication of original papers of moderate length. A department called Shorter Notes was established for the purpose of publishing very short papers of an unusually elegant and polished character for which there is normally no other outlet.

**Transactions of the American Mathematical Society** is a monthly journal devoted entirely to research in pure and applied mathematics and, in general, includes longer papers than those in the PROCEEDINGS.

**OTHER JOURNALS**

**Abstracts of Papers Presented to the American Mathematical Society** contains abstracts of invited hour addresses, of papers presented in special sessions or in sessions for contributed papers, and of papers presented to the Society “by title”.

**Current Mathematical Publications**, issued three times a month, contains a subject-classified index of papers and books being published currently in mathematics.

**Mathematical Reviews** is a monthly journal devoted to abstracts and reviews of the current mathematical literature of the world. Abstracts and reviews are grouped according to the 1980 Mathematics Subject Classification scheme (1985 Revision). The subscription includes an annual author and subject index.

**Notices of the American Mathematical Society**, published ten times a year, contains programs and reports of the meetings of the Society, reports on Society business, communications to the membership, and news items and information of interest to the mathematical community.

## MANUSCRIPT, PROOF, AND COPYING INFORMATION

### MANUSCRIPT

Articles submitted for publication should be typewritten and double-spaced. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand-drawn symbols are satisfactory if clearly done; special instructions for the typesetter, when necessary, should be included on a separate sheet.

For Research-Expository Articles and Research Announcements, the first footnote should include *subject classification numbers* representing the primary and secondary subjects of the article. The 1980 Mathematics Subject Classification (1985 Revision) can be found in the annual subject index volumes of *Mathematical Reviews*.

To encourage the submission of manuscripts in electronic form using  $\text{T}_{\text{E}}\text{X}$  and the  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\text{T}_{\text{E}}\text{X}$  macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

### GALLEY PROOF

When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

### COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the

Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

## OFFPRINTS AND ADDRESS CHANGES

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

## COPYRIGHT TRANSFER AGREEMENT

The signing of a Copyright Transfer Agreement is a requirement of publication in the BULLETIN. A copy of the agreement is sent to the author upon receipt of a manuscript in the Providence Office of the Society; in case of joint authors, a copy is sent to each author. Authors are urged to return the form immediately to prevent delays in processing and publishing the manuscript. The 1984 edition of the *Manual for Authors* has a description of Society policy concerning copyright and a copy of the agreement.

## PUBLICATION CHARGES

There are no page charges assessed on papers published in the BULLETIN.

## REMARKS ON RESEARCH ANNOUNCEMENTS

The BULLETIN of the American Mathematical Society is the only research mathematical journal received as a privilege of membership in the Society. Its circulation is larger, by an order of magnitude, than that of most journals, in particular specialized journals. Thus, a BULLETIN Research Announcement should contain results of sufficient depth and import to be of interest to a wide mathematical audience. And, consequently, beyond basic mathematical standards, Research Announcements should meet high standards for style.

Beyond general exhortations to write clearly and precisely, the following more specific suggestions are offered.

1. Keep in mind that you are writing for as wide an audience as possible. Avoid the shorthand and jargon of your area as much as you can. Carefully introduce the terminology needed to understand the main results. If space considerations prevent a full development of the concepts, delineate clearly what you are not explaining and provide references to it in the literature. Consider an Announcement an opportunity to explain your area of research to the world at large.

2. Do not confuse a graceful style with a sloppy style. Although a light touch or a colorful phrase can relieve the tedium of definitions, excessive breeziness and imprecision confuse readers who have only a casual knowledge of the subject. We say this not to encourage pedantic writing but to discourage obscure writing. Your results should be stated precisely with all important concepts and notations made clear.

3. Ask a colleague to review your manuscript before you submit it. Even better, ask two colleagues, one whose work is very close to yours, one whose work is farther away. (If you can't get two people you know to read your work before it is published, how many will want to read it after?) Ask for suggestions on how to improve the readability.

<b>Andreotti-Grauert theory by integral formulas</b> by Gennadi M. Henkin and Jürgen Leiterer—Reviewed by R. Michael Range.....	190
<b>Interpolation of operators</b> by Colin Bennett and Robert Sharpley—Reviewed by Yoram Sagher.....	198
<b>Theory of relations</b> by R. Fraïssé—Reviewed by Arnold W. Miller.....	206
<b>Boundary value problems of finite elasticity</b> by T. Valent—Reviewed by Philippe G. Ciarlet.....	209
<b>Heat kernels and spectral theory</b> by E. B. Davies—Reviewed by Robert S. Strichartz.....	222
<b>Stochastic processes with a multidimensional parameter</b> by M. Dozzi—Reviewed by Ely Merzbach.....	228
<b>Art gallery theorems and algorithms</b> by Joseph O'Rourke—Reviewed by David Avis.....	230
<b>Huygens' principle and hyperbolic equations</b> by Paul Günther—Reviewed by Bent Ørsted.....	235
<b>Existentially closed groups</b> by Graham Higman and Elizabeth Scott—Reviewed by Kenneth Hickin.....	242

**Research-Expository Papers**

Notes on invariant subspaces by *Hari Bercovici* ..... 1  
 Old and new conjectured diophantine inequalities by *Serge Lang* ..... 37

**Research Announcements**

Towards computerized proofs of identities by *Herbert S. Wilf and Doron Zeilberger* ..... 77  
 Splittings of surfaces by *Richard K. Skora* ..... 85  
 Heegaard surfaces in Haken 3-manifolds by *Klaus Johannson* ..... 91  
 Not all links are concordant to boundary links by *T. D. Cochran and K. E. Orr* ..... 99  
 Deformation rigidity for subgroups of  $SL(n, \mathbf{Z})$  acting on the  $n$ -torus by *Steven Hurder* ..... 107  
 A nonlinear extension of the Borel density theorem: Applications to invariance of geometric structures and to smooth orbit equivalence by *Alessandra Iozzi* ..... 115  
 Finitely generated groups,  $p$ -adic analytic groups, and Poincaré series by *Marcus P. F. du Sautoy* ..... 121  
 Ramanujan graphs and Hecke operators by *Arnold K. Pizer* ..... 127  
 Fundamental solutions and harmonic analysis on nilpotent groups by *A. Nagel, F. Ricci, and E. M. Stein* ..... 139  
 Gorenstein local homomorphisms by *Luchezar L. Avramov and Hans-Bjørn Foxby* ..... 145  
 The jump is definable in the structure of the degrees of unsolvability by *S. Barry Cooper* ..... 151  
 The adaption problem for approximating linear operators by *Mark A. Kon and Erich Novak* ..... 159

**Book Reviews**

Schander bases: Behavior and stability by *P. K. Kamthan and M. Gupta*—Reviewed by *J. R. Retherford* ..... 167  
 Continuous decoupling transformations for linear boundary value problems by *P. M. van Loon*—Reviewed by *Wolfgang Wasow* ..... 173  
 Derivatives, nuclei and dimensions on the frame of torsion theories by *Jonathan S. Golan and Harold Simmons*—Reviewed by *P. T. Johnstone* ..... 178  
 Algebraic homotopy by *H. J. Baues*—Reviewed by *Ronald Brown* ..... 182
