

## **Table of contents Bernoulli 02/03 (1996)**

Inference in hidden Markov models I: Local asymptotic normality in the stationary case

*Authors: Peter J. Bickel, Ya'acov Ritov 199-228*

$L_p$  adaptive density estimation;

*Authors: Gérard Kerkycharian, Dominique Picard, Karine Tribouley 229-247*

Variance of Lipschitz functions and an isoperimetric problem for a class of product measures;

*Authors: Sergei G. Bobkov, Christian Houdré 249-255*

Almost sure oscillation of certain random processes;

*Authors: Jean-Marc Azaïs, Mario Wschebor 257-270*

Laplace and the origin of the Ornstein-Uhlenbeck process;

*Authors: Martin Jacobsen 271-286*

On the stochastic equation  $L(X)=L[B(X+C)]$  and a property of gamma distributions;

*Authors: Daniel Dufresne 287-291*
