

Contents

Proceedings of XIII Brazilian School of Bayesian Statistics

Preface	667
S. L. SCOTT Comparing consensus Monte Carlo strategies for distributed Bayesian computation	668
D. DRAPER and A. TERENIN Comment: A brief survey of the current state of play for Bayesian computation in data science at big-data scale	686
A. GELMAN and A. VEHTARI Comment: Consensus Monte Carlo using expectation propagation	692
S. L. SCOTT Rejoinder	697
J. NAKAJIMA and M. WEST Dynamics & sparsity in latent threshold factor models: A study in multivariate EEG signal processing	701
F. B. GONÇALVES, K. ŁATUSZYŃSKI and G. O. ROBERTS Barker's algorithm for Bayesian inference with intractable likelihoods	732
K. S. CONCEIÇÃO, A. K. SUZUKI, M. G. ANDRADE and F. LOUZADA A Bayesian approach for a zero modified Poisson model to predict match outcomes applied to the 2012–13 La Liga season	746
L. COSTA, T. NICHOLS and J. Q. SMITH Studying the effective brain connectivity using multiregression dynamic models	765
F. FERRAZ DO NASCIMENTO and M. BOURGUIGNON PEREIRA A Bayesian approach to extended models for exceedance	801
