

Communications in
Mathematical Physics

Chief Editor

R. Haag, Hamburg

Editorial Board

N. M. Hugenholtz, Groningen

J. Leray, Paris

D. Ruelle, Bures-sur-Yvette

A. H. Taub, Berkeley

A. S. Wightman, Princeton

Advisory Board

H. Araki, Kyoto

V. Glaser, Genève

K. Hepp, Zürich

P. Kristensen, Aarhus

M. C. Polivanov, Moskau

T. Regge, Princeton

R. F. Streater, London

Volume 33 · Number 4 · 1973

Springer-Verlag Berlin · Heidelberg · New York

Commun. math. Phys. — CMPHAY 33(4) 259 - 344 (1973) — 5. XI. 1973

It is a fundamental condition that manuscripts submitted have not been, and will not be published elsewhere, either simultaneously or at a later date. With the acceptance of a manuscript for publication, the publishers acquire the sole copyright for all languages and countries. Unless special permission has been granted by the publishers, no photographic reproductions, microform or any other reproductions of a similar nature may be made of the journal, of individual contributions contained therein or of extracts therefrom.

Grundsätzlich dürfen nur Arbeiten in deutscher, englischer oder französischer Sprache eingereicht werden, die vorher weder im Inland noch im Ausland veröffentlicht worden sind. Der Autor verpflichtet sich, seinen Beitrag auch nachträglich nicht an anderer Stelle zu publizieren. Mit der Annahme des Manuskriptes und seiner Veröffentlichung durch den Verlag geht auch das Recht der fotomechanischen Wiedergabe oder einer sonstigen Vervielfältigung, auch in Mikroform, an den Verlag über. Jedoch wird gewerblichen Unternehmen für den innerbetrieblichen Gebrauch nach Maßgabe des zwischen dem Börsenverein des Deutschen Buchhandels e.V. und dem Bundesverband der Deutschen Industrie abgeschlossenen Rahmenabkommens die Anfertigung einer fotomechanischen Vervielfältigung gestattet. Wenn für diese Zeitschrift kein Pauschalabkommen mit dem Verlag vereinbart worden ist, ist eine Wertmarke im Betrage von DM 0,40 pro Seite zu verwenden. *Der Verlag läßt diese Beträge den Autorenverbänden zufließen.*

75 offprints of each article will be supplied to the author free-of-charge and additional copies may be obtained at cost price if ordered before the issue goes to press.

Manuscripts may be sent to: see Editorial Note

In order to avoid delay in publication this journal appears in loose numbers which can be subsequently assembled in volumes. One volume usually consists of 4 numbers. The price of one volume is DM 116,— plus postage and handling.

Editorial Note

The evolution of a journal necessitates from time to time some reorganization and some new spirit. In addition, the duties of an editor make up a heavy burden over a long period, so that some rotation is desirable on the governing board of a journal. After eight years as chief editor of *Communications in Mathematical Physics*, R. Haag will be giving up this position after volume 33, and K. Hepp will succeed him for the next three years. This is also the time to acknowledge the helpful services of the present editorial and advisory board. The growing diversity of mathematical physics has prompted us to reorganize the governing board of the *Communications in Mathematical Physics*. From volume 34 onwards there will be a responsible editor for each of the journal's main fields in mathematical physics:

Prof. H. Araki
Research Institute
for Mathematical Sciences
Kyoto University
Kyoto, Japan

Prof. J. Ehlers
Max-Planck-Institut
für Physik und Astrophysik
Föhringer Ring 6
D - 8000 München 40
Bundesrepublik Deutschland

Prof. G. Gallavotti
Università di Napoli
Istituto di Fisica Teorica
Mostra d'Oltremare
I - 80125 Napoli, Italia

Prof. R. Haag
II. Institut für
theoretische Physik
Luruper Chaussee 149
D - 2000 Hamburg 50
Bundesrepublik Deutschland

Prof. K. Hepp
Seminar für
Theoretische Physik
E.T.H. Zürich
Hönggerberg
CH - 8049 Zürich, Schweiz

Mathematical methods
(Functional analysis, operator algebra and group theory, with direct relevance to physics)

General relativity (Gravitation and classical field theory)

Equilibrium statistical mechanics (Thermodynamic functions, phase transitions, equilibrium states, exactly soluble models)

General structure of quantum field theory and foundations of quantum mechanics

Chief Editor

Prof. W. Hunziker
Seminar für
Theoretische Physik
E.T.H. Zürich
Hönggerberg
CH - 8049 Zürich, Schweiz

Classical and quantum me-
chanics of finitely many
degrees of freedom

Prof. J. L. Lebowitz
Belfer Graduate School
of Science
Yeshiva University
New York, N. Y. 10033, USA

Nonequilibrium statistical
mechanics (Time development
of infinite systems, ergodic
theory, transport theory,
random processes, dissipa-
tive phenomena)

Prof. K. Symanski
DESY
Notkestieg 1
D - 2000 Hamburg 52
Bundesrepublik Deutschland

Lagrangian quantum field
theory (Perturbative ap-
proach)

Prof. A. S. Wightman
Princeton University
Jadwin Hall
Princeton, N. J. 08540, USA

Constructive quantum field
theory

All these editors assume full responsibility for the accep-
tance or rejection of papers in their field which are sub-
mitted to the *Communications in Mathematical Physics*. The
authors should address their paper either directly to the
appropriate editors or to the chief editor who will then
either send the manuscript to one of the editors or, in
cases beyond any doubt, accept or reject it. The editors
can consult referees, and they can suggest alterations be-
fore an article is finally accepted. The chief editor will
keep track of all the articles which are received, accepted,
and rejected by the journal, and transfer all manuscripts
which are ready for printing to Springer-Verlag. With the
help of the advisory board the editors and the chief editor
together will establish the publication policy of the jour-
nal which will follow essentially the present successful
line. Due to lack of space we have to be strongly biased
against overlong papers, against purely mathematical arti-
cles with no direct relevance to physics, and against phe-
nomenological papers.
