INSTRUCTIONS TO AUTHORS

A. General

Manuscripts should be submitted in duplicate. They should preferably be written in English; papers in French or German are also accepted.

Manuscripts must be in their **final form**, typed on one side of each sheet only, with double spacing and wide margins. Formulae should be typewritten whenever possible. Mimeographed copies are not acceptable unless clearly legible.

Please include a "Note for the Printer" explaining markings used. See suggestion overleaf.

To speed up publication, authors will receive **only one set of proofs:** provisionally numbered page proofs. Authors are requested to **correct typographical errors only;** they will be charged for corrections involving changes, additions or deletions to the original manuscript.

Diagrams should be submitted on separate sheets, not included in the text. They should be drawn in Indian ink in clean uniform lines, the whole about twice the size of the finished illustration. Inscriptions should allow for the figure 1, for example, to be about 2 mm high in the final version (i.e. 4 mm for reduction $\times \frac{1}{2}$). The author should mark in the margin of the manuscript where diagrams may be inserted.

Footnotes, other than those which refer to the title heading, should be numbered consecutively and placed at the foot of the page to which they refer (not at the end of the article).

Please give on the first page of the manuscript a **running head** (condensed title), which should not exceed 70 letters including spaces.

References to the literature should be listed at the end of the manuscript. The following information should be provided for **journal articles:** names and initials of all authors, name of the journal, volume, first and last page numbers and year of publication. References to **books** should include name(s) of author(s), full title, edition, place of publication, publisher and year of publication.

Examples

Bombieri, E., Giusti, E.: Inventiones math. 15, 24–46 (1971)

Tate, J.T.: p-Divisible groups. In: Proceedings of a conference on local fields, pp. 158–183. Berlin-Heidelberg-New York: Springer 1967

B. Marking

1. Text

The words "Theorem", "Lemma", "Corollary", "Proposition" etc. are normally printed in boldface, followed by the formulation in italics (to be underlined in the manuscript).

The words "Proof", "Remark", "Definition", "Note" etc. are printed in italics with the formulation in ordinary typeface.

Words or sentences to be set in italics should be marked by single underlining.

2. Formulae

Letters in formulae are normally printed in italics, figures in ordinary typeface.

It will help the printer if in doubtful cases the position of indices and exponents is marked thus: bγ, aŸ. Spacing of indices and exponents must be specially indicated (A_m^n, m) otherwise they will be set (A_{mn}^{nm}) .

Underlining for special alphabets and typefaces should be done according to the following code:

single underlining:

small letter

double underlining:

capital letter

brown:

boldface headings, boldface letters in formulae

vellow:

(abbreviations e.g. Re, Im, log, sin, ord, id, lim, sup, etc.) Greek

red: blue:

Gothic

green:

Script

violet:

the numeral 1, and zero (to distinguish them from the small letter l

and the capital letter O)

The following are frequently confused:

 \cup , U, (), U; \circ , o, O, 0;

 \times , x, X, κ ;

 \vee , v, v;

 $\theta, \Theta, \phi, \varphi, \Phi, \emptyset;$ ψ, Ψ

ε. ∈:

 a', a^1 : the symbol a and the indefinite article a;

also the handwritten Roman letters:

c, C;e, l; I, J:

o, O; k, K;

p, P; s, S; u, U;

v, V;

w, W;x, X;

Please take care to distinguish them in some way.

C. Examples

1. Special alphabets or typefaces

NEW FROM ISI®

INDEX TO SCIENTIFIC & TECHNICAL PROCEEDINGS™

There has never been an effective way to search the proceedings literature. Until now.

Now, ISI introduces the <u>Index to Scientific & Technical Proceedings</u>—the first multidisciplinary tool to conference proceedings and the individual papers published in them—the effective answer to the problem of searches in the proceedings literature.

Current and Comprehensive...

ISTP™ indexes 3,000 proceedings annually—over 80,000 individual papers—from conference proceedings published in book form and in the journal literature. Broad coverage includes: life sciences • clinical medicine • engineering and applied sciences • physical and chemical sciences • biological, environmental and energy sciences. **ISTP** is issued monthly and cumulated twice a year, so you get the index to proceedings shortly after their publication.

... and Effectively Indexed.

An unequaled system of indexes offers you effective searches with a minimum of starting information. You can locate complete entries of proceedings and papers—in an easy-to-read contents page format—with just a speaker's name . . . a sponsor . . . even a speaker's organizational affiliation. Or by conference topic, title words, or geographical location. And you get all the data you need to order books or request interlibrary loans. You even get first authors' addresses for reprint requests.

ISI's Index to Scientific & Technical Proceedings offers an effective new approach to locating the scientific and technical information in conference proceedings. Subscriptions will begin in 1978, at \$500 annually. Use the coupon below to enter your order today.

☐ Please enter my subscription to Index to Scientific & Technical Proceedings™ for 1978, at \$500 annually. ☐ Please send more information.	☐ Please send Air Mail Europe, South & Central America, add \$100 All other locations, add \$125 (Air Mail not available in U S.A., Canada or Mexico)
