Springer

# Springer L<sup>A</sup>T<sub>E</sub>X and plain-T<sub>E</sub>X macros

We can use your T<sub>E</sub>X files directly for phototypesetting if you have used our macros. Makropackages are available for the following journals:

**L<sub>J</sub>our1** L<sup>A</sup>T<sub>E</sub>X styles for Acta Informatica, Applicable Algebra in Engineering, Communication and Computing, Archive for Mathematical Logic, Astronomy & Astrophysics Reviews, Calculus of Variations, Communications in Mathematical Physics, Continuum Mechanics and Thermodynamics, Economic Theory, Inventiones mathematicae, Journal of Evolutionary Economics, Journal of Mathematical Biology, Manuscripta mathematica, Mathematische Annalen, Mathematische Semesterberichte, Mathematische Zeitschrift, Numerische Mathematik, Probability Theory and Related Fields, Statistical papers, Theoretica Chimica Acta

**P<sub>J</sub>our1g** global plain T<sub>E</sub>X packages for all journals mentioned above; **P<sub>J</sub>our 1** may also still be used. All packages are available via mailserver, FTP server or on DOS diskettes.

## Mailserver

Send an e-mail message to `svserv@vax.ntp.springer.de` which must contain one (several) of the following commands:

**L<sub>J</sub>our1** `get /tex/latex/ljour1.zip`  
**P<sub>J</sub>our1g** `get /tex/plain/pjour1g.zip`

In order to be transmitted ungarbled via the net, the files are pkzipped and unencoded. The line `get /tex/help-tex.txt` in your e-mail to `svserv` will send you a file explaining how to unpack the files you receive. Please do not send regular e-mail to this address.

## FTP server

The internet address is 192.129.24.12 (`trick.ntp.springer.de`) The username is FTP or ANONYMOUS and the files are in the directory `/pub/tex`

## Diskettes

To get the macro files and the AMS fonts (when needed) on 3.5" DOS diskettes please write to:

Springer-Verlag, Journal Production,  
Tiergartenstr. 17  
D-69121 Heidelberg, Germany  
e-mail: `springer@vax.ntp.springer.de`  
FAX number: x 49 6221 487625

Please indicate clearly which macro package you need and the journal for which your paper is intended.

**Use our L<sup>A</sup>T<sub>E</sub>X and plain-T<sub>E</sub>X macros to prepare your article for this and for other Springer journals.**

PRINCETON

# QED and the Men Who Made It

Dyson, Feynman, Schwinger, and Tomonaga

Silvan S. Schweber

"This is a masterful book. Sam Schweber is an excellent theoretical physicist, and an expert in assembling historic evidence. The book is likely to be the definitive history of that exciting time in physics."—Hans A. Bethe

"Schweber is a first-rate historian. . . . He has produced a lively and readable narrative history, with a lightness of touch that can come only to one who is absolute master of his subject."—Freeman Dyson

## Mechanics of Continua and Wave Dynamics

2nd ed. 1994. XII, 342 pp. 99 figs.

(Springer Series on Wave Phenomena, Vol. 1)

Softcover DM 78,- ISBN 3-540-57336-4

**Mechanics of Continua and Wave Dynamics** is a textbook for a course on the mechanics of solids and fluids with the emphasis on wave theory. The material is presented with simplicity and clarity but also with mathematical rigor. Many wave phenomena, especially those of geophysical nature (different types of waves in the ocean, seismic waves in the earth's crust, wave propagation in the atmosphere, etc.), are considered. Each subject is introduced with simple physical concepts using numerical examples and models. The treatment then goes into depth and complicated aspects are illustrated by appropriate generalizations. Numerous exercises with solutions will help students to comprehend and assimilate the ideas.

Prices are subject to change without notice. In EC countries the local VAT is effective.  
Customers in EC countries, please state your VAT-identification-Number if applicable.

For information on prices in Austrian schillings and Swiss francs please consult the German book directory
