

“Required Reading”

Renormalization Group

Giuseppe Benfatto
and Giovanni Gallavotti

Scaling and self-similarity ideas and methods in theoretical physics have, in the last twenty-five years, coalesced into renormalization-group methods. This book analyzes, from a single perspective, some of the most important applications.

Physics Notes

Paper: \$14.95 ISBN 0-691-04446-5

Cloth: \$35.00 ISBN 0-691-04447-3

The Classical and Quantum $6j$ -symbols

J. Scott Carter, Daniel E. Flath,
and Masahico Saito

Addressing physicists and mathematicians alike, this book discusses the finite dimensional representation theory of $sl(2)$, both classical and quantum.

Mathematical Notes

Paper: \$22.50 ISBN 0-691-02730-7

Angular Momentum in Quantum Mechanics

A. R. Edmonds

This book offers a concise introduction to the angular momentum, one of the most fundamental quantities in all of quantum mechanics.

Paper \$13.95 ISBN 0-691-02589-4

The Seiberg-Witten Equations and Applications to the Topology of Smooth Four-Manifolds

John W. Morgan

The recent introduction of the Seiberg-Witten invariants of smooth four-manifolds has revolutionized the study of those manifolds. This book is an introduction to the Seiberg-Witten invariants.

Mathematical Notes

Paper \$19.95 ISBN 0-691-02597-5

REAL Computing Made Real

Preventing Errors in Scientific and Engineering Calculations

Forman S. Acton

For those engineers and scientists who use computers to solve their problems only to discover new, subtle problems in their results, this book is a welcome quick guide to trouble-shooting. Forman Acton offers practical advice on detecting and removing the insidious bugs that plague finite-precision calculations.

Cloth: \$29.95 ISBN 0-691-03663-2

A 3

We have the T_EXnology

D. Salomon

The Advanced T_EXbook

1995. XX, 482 pages.

Softcover DM 68,- ISBN 0-387-94556-3

Why is T_EX so hard to use? Because it is in essence a programming language, and so it is best viewed from this perspective. The author presents a complete course in T_EX which will be suitable for users of T_EX who want to advance beyond the basics.

The initial chapters introduce the essential workings of T_EX, including a detailed discussion of boxes and glue. Later chapters cover a wide range of advanced topics such as: macros, conditionals, tokens, leaders, file I/O, the line- and page-break algorithms, and output routines.

Throughout, numerous examples are given and exercises (with answers) provide a means for readers to test their understanding of the material. As a result, no serious user of T_EX will want to be without this text.

M. Seroul, S. Levy

A Beginner's Book of T_EX

1st ed. 1991. Corr. 3rd printing 1995.

XII, 284 pages. Softcover DM 61,-

ISBN 3-540-97562-4

A Beginner's Book of T_EX is addressed primarily to beginners, but it contains much information that will be useful to aspiring T_EX "wizards". Moreover, the authors kept firmly in mind the diversity of backgrounds that characterizes T_EX users: authors in the sciences and in the humanities, secretaries, technical typists. The book contains a careful explanation of all fundamental concepts and commands, but also a wealth of commented examples and "tricks" based on the authors' long experience with T_EX.

M. Doob

T_EX: starting from 1

1993. X, 114 pages. Softcover DM 44,-

ISBN 3-540-56441-1

This book is designed for the complete newcomer to T_EX. It starts by showing how to typeset simple text that mostly uses the defaults predefined by T_EX. By use of graded exercises, the situations covered slowly become more complex and include many different types of mathematical constructions and tables. In the end it is possible to handle almost any standard mathematical situation.

Prices subject to change without notice. In EU countries the local VAT is effective.

Subscription Information (ISSN 0010-3616)

Vols. 174-181 (3 issues each) will appear in 1996. **North America.** Recommended annual subscription rate: US \$ 4546.00, single issue price \$ 225.00 including carriage charges. Subscriptions are entered with prepayment only. Orders should be addressed to: Springer-Verlag New York Inc., Journal Fulfillment Services Dept., 333 Meadowlands Parkway, Secaucus, NJ 07094, USA, Tel (201) 348-4033, Telex 023125994, Fax (201)348-4505. Members of the International Association of Mathematical Physics (IAMPP) are entitled to receive the journal strictly for their own personal use at a special reduced rate. The orders must be placed through the IAMPP. **All Other Countries.** Recommended annual subscription rate: DM 6096.00, plus carriage charges: [Germany: DM 87.60 incl. VAT; all other countries: DM 175.20] SAL or airmail charges are available upon request. SAL delivery is mandatory to Japan, India, and Australia/New Zealand. Airmail delivery to all other countries is available upon request. Volume price: DM 762.00, single issue price: DM 304.80 plus carriage charges. Orders for all countries except North America can either be placed with your bookdealer or sent directly to: Springer-Verlag, Ms. Ticks, Postfach 311 340, D-10643 Berlin, Germany, Tel 030/8207-358, Telex 0183319, Fax (0)30/8207448. Cancellations must be received by September 30 to take effect at the end of the same year. **Changes of Address:** Allow six weeks for all changes to become effective. All communications should include both old and new addresses (with Postal Codes) and should be accompanied by a mailing label from a recent issue. According to § 4 Sect. 3 of the German Postal Services Data Protection Regulations, if a subscriber's address changes the German Federal Post Office can inform the publisher of the new address even if the subscriber has not submitted a formal application for mail to be forwarded. Subscribers not in agreement with this procedure may send a written complaint to Springer-Verlag's Berlin office within 14 days of publication of this issue. **Back Volumes.** Prices are available on request. **Microform:** Microform editions are available from: University Microfilms International, 300 N. Zeeb Road, Ann Arbor, MI 48106, USA
