N. SAWASHITA and M. SUGAWARA: On self H -equivalences of an H -space with respect to any multiplication	1
T. IWAKAMI and D. KIJIMA: Spaces of orderings and quadratic extensions of fields	21
M. MIMURA and K. OHARA: Standing wave solutions for a Fisher type equation with a nonlocal convection	33
T. SAKAMOTO: Lie algebras satisfying the weak minimal condition on ideals ...	51
D. P. MISHEV: Oscillatory properties of the solutions of hyperbolic differential equations with "maximum"	77
R. KAJIKIYA: On the asymptotic behavior of solutions of certain semilinear parabolic equations in \mathbf{R}^N	85
F-Y. MAEDA: Semilinear boundary value problems on a self-adjoint harmonic space with non-local boundary conditions	101
H. UDA: A characterization of Prüfer v -multiplication domains in terms of polynomial grade	115
K. SHIMOMURA and H. TAMURA: Non-triviality of some compositions of β -elements in the stable homotopy of the Moore spaces	121
N. KONNO: A limit theorem for collision path of one-dimensional independent random motions	135
T. KUSANO, M. NAITO and H. USAMI: Asymptotic behavior of solutions of a class of second order nonlinear differential equations	149
H. ISHITANI: A central limit theorem of mixed type for a class of 1-dimensional transformations	161
M. MIMURA and P. C. FIFE: A 3-component system of competition and diffusion	189
K. SHIMOMURA: On the Adams-Novikov spectral sequence and products of β -elements	209
Y. HEMMI: Corrections to the papers on finite H -spaces	225
