# TABLE OF CONTENTS

## VOLUME 39, 2009

AOYAMA, H.: Lebesgue spaces with variable exponent on a probability space .....	207
AQZZOUZ, B. and EL ALJ, H. M.: Holomorphic functions taking values in a quotient of Fréchet-Schwartz spaces .....	277
BOGGI, M.: The congruence subgroup property for the hyperelliptic modular group: the open surface case .....	351
EVANS, R. and GREENE, J.: Evaluations of hypergeometric functions over finite fields .....	217
HIKIDA, M.: Singer's formulas for the Steenrod algebra .....	123
HOSHI, Y.: The exactness of the log homotopy sequence .....	61
IMAMURA, E., OKAMOTO, K., TSUKAMOTO, M. and YAMAMORI, A.: Eigenvalues of generalized Laplacians for generalized Poisson-Cauchy transforms on classical domains .....	237
KADOWAKI, S. and KAGEYAMA, S.: Existence of affine $\alpha$ -resolvable PBIB designs with some constructions .....	293
KHARLAMOV, M. P.: Bifurcation diagrams and critical subsystems of the Kowalevski gyrostat in two constant fields .....	327
MENG, C.: On unicity of meromorphic functions when two differential polynomials share one value .....	163
MORITA, J. and TERUI, A.: Words, tilings and combinatorial spectra .....	37
NAGASE, T. and SHIMA, A.: Properties of minimal charts and their applications II .....	1
NAKANISHI, Y. and OHYAMA, Y.: The Gordian complex with pass moves is not homogeneous with respect to Conway polynomials .....	443
NAKAZAWA, K., ISHIMURA, K. and ITO, S.: Negative slope algorithm and multiplicative Rauzy induction of 3-interval exchange transformations .....	451
TANAKA, H.: Spectral properties of a class of generalized Ruelle operators .....	181
ULYANOV, V. V. and ZUBOV, V. N.: Refinement on the convergence of one family of goodness-of-fit statistics to chi-squared distribution .....	133
YAMADA, T.: Higher-order asymptotic expansions for a parabolic system modeling chemotaxis in the whole space .....	363
YAMAGISHI, H.: The best constant of Sobolev inequality corresponding to Dirichlet-Neumann boundary value problem for $(-1)^M(d/dx)^{2M}$ .....	421
