
A MEMORIAL
to
JOHN VON NEUMANN

has been published by the
AMERICAN MATHEMATICAL SOCIETY

in the form of a supplement to the May 1958 issue of the Bulletin

“We do not erect statues of great scientists. Instead, the American Mathematical Society publishes this volume as a memorial to John von Neumann. Some of his friends describe his brilliant mind, his warm personality, his work which will live on in mathematics and in the other sciences to which he has contributed so much.”

CONTENTS

John von Neumann, 1903–1957	By S. Ulam
Von Neumann and Lattice Theory	By Garrett Birkhoff
Theory of Operators, Part I. Single Operators	By F. J. Murray
Theory of Operators, Part II. Operator Algebras	By Richard V. Kadison
Von Neumann on Measure and Ergodic Theory	By Paul R. Halmos
Von Neumann’s Contributions to Quantum Theory	By Léon Van Hove
John von Neumann’s Work in the Theory of Games and Mathematical Economics	By H. W. Kuhn and A. W. Tucker
Von Neumann’s Contributions to Automata Theory	By Claude E. Shannon

NOTE: At the end of the first article there is a complete bibliography of von Neumann’s publications. Valuable bibliographical material also appears elsewhere in the Memorial.

129 pp. \$3.20

25% discount to members of the Society

The Memorial is being distributed free of charge to all subscribers to Volume 64 (1958) of the BULLETIN of the American Mathematical Society.

CONTENTS

Vol. 2, No. 4A

December, 1958

	Page
Toroid transformation groups on euclidean space By D. MONTGOMERY and G. D. MOSTOW.	459
Projective topological spaces By ANDREW M. GLEASON.	482
Existence theorems for nonprojective complete algebraic varieties By MASAYOSHI NAGATA.	490
The probability that a matrix be nilpotent By N. J. FINE and I. N. HERSTEIN.	499
Prime ideals in rings of continuous functions By CARL W. KOHLS.	505
Minimal free c.s.s. groups By DANIEL M. KAN.	537
An axiomatization of the homotopy groups By DANIEL M. KAN.	548
Lowest order equation for zeros of a homogeneous linear differential polynomial By LAWRENCE GOLDMAN.	567
On the determination of characteristic values for a class of Sturm- Liouville problems By RICHARD BELLMAN.	577
Linear systems of first and second order differential equations with periodic coefficients By J. K. HALE.	586
The use of discrete Green's functions in the numerical solution of Poisson's equation By J. M. BERGER and G. J. LASHER.	593
Corrections to the paper, "On Witt vectors and periodic group-varieties" By IACOPO BARSOTTI.	608

Published by the University of Illinois Press in March, June, September, and December. Supported in part by the George A. Miller Endowment. Printed by Waverly Press, Baltimore, Maryland.

The subscription price is \$9.00 a volume (four numbers); this is reduced to \$5.00 for individual members of the American Mathematical Society. The price of a single number is \$3.00. Subscriptions should be sent to the University of Illinois Press, 1202 West California Avenue, Urbana, Illinois.
