PROCEEDINGS OF SYMPOSIA IN APPLIED MATHEMATICS, VOLUME X

COMBINATORIAL ANALYSIS

Edited by Richard Bellman and Marshall Hall, Jr.

Problems involving the choice of a specified set of objects from a finite set of objects are usually called "combinatorial". Although there is seldom any theoretical difficulty concerning the existence of the desired subset, there is almost always an enormous amount of difficulty connected with the actual determination of this subset.

Questions of this type arise in all parts of mathematics, in algebra, geometry and analysis. In general, any advance in procedures requires a major theoretical advance. Quite often, the physical background of the mathematical problem suggests a new mathematical approach to a longstanding problem.

This volume contains a variety of papers devoted to combinatorial problems arising in the mathematical areas cited above, and in the new fields of scheduling, transportation, communication and design of experiments. A number of papers are devoted to the use of digital computers to attack the complicated problems which arise from apparently simple physical problems.

Not only will this volume furnish a valuable survey of the current state of the art, but it will also provide a source for research in this vast and growing field.

MATHEMATICAL REVIEWS

A Journal Containing Reviews of the Mathematical Literature of the World, with full Subject and Author Indices

Subscriptions accepted to cover the calendar year only. Issues appear monthly except July. $50.00 per year. $25.00 to members of sponsoring organizations. An edition printed on one side, for bibliographical purposes, is available at an additional charge of $1.00 per year. Unesco Book Coupons may be used in payment.

CONTENTS

Vol. 4, No. 4 **December, 1960**

Page

Dirichlet series
By A. C. SCHAEFFER† 479
Some remarks on A. C. Schaeffer's paper on Dirichlet series
By HWA S. HAHN 501
Groups on S^n with principal orbits of dimension $n-3$
By D. MONTGOMERY and C. T. YANG 507
Some properties of totally coregular matrices
By B. E. RHOADES 518
Some uniqueness theorems on Riemannian manifolds with boundary
By CHUAN-CHIH HSIUNG 526
Adequate subcategories
By J. R. ISBELL 541
A class of multiplicative linear functionals on the measure algebra of a locally compact Abelian group
By EDWIN HEWITT and SHIZUO KAKUTANI 553
Homogeneous symplectic multipliers
By R. C. GUNNING 575
On Weierstrass products of zero type on the real axis
By J. P. KAHANE and L. A. RUBEL 584
Two-point boundary problems involving a parameter linearly
By HYMAN J. ZIMMERBERG 593
Algebraic Lie algebras and representative functions. Supplement
By G. HOCHSCHILD 609
The structure of contours of a Fréchet surface
By R. E. FULLERTON 619
On last exit times
By K. L. CHUNG 629
Behavior of integral group representations under ground ring extension
By IRVING REINER 640
Solvable factorizable groups II
By W. R. SCOTT 652

Published by the University of Illinois Press in March, June, September and December. Supported in part by the George A. Miller Endowment. Printed by Waverly Press, Baltimore, Maryland.

The subscription price is $9.00 a volume (four numbers); this is reduced to $5.00 for individual members of the American Mathematical Society. The price of a single number is $3.00. Subscriptions should be sent to the University of Illinois Press, Urbana, Illinois.
