

Submitting manuscripts

Original research papers in pure and applied mathematics intended for publication in this journal may be written in English, French or German. The submission of a paper implies the author's assurance that it has not been published or submitted for publication elsewhere.

Submit two copies of your manuscript, double spaced, to the Illinois Journal of Mathematics, 1409 West Green St., University of Illinois, Urbana, Illinois 61801 (ijm@math.uiuc.edu) or directly to one of the editors listed on the inside front cover.

Include your e-mail address with your covering letter.

Sending electronic files

Once your paper is accepted you will be given instructions for sending your electronic file, to be used in the typesetting process. But do not send any electronic files until then. We prefer a version of \TeX but can use any electronic files, including ChiWriter, T³, WordPerfect and Microsoft Word.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Page charges

To cover a part of the cost of production, the author's institution will be billed for \$40 per page.

Offprints

One hundred offprints are supplied to the sole author of a paper; fifty free offprints are supplied to each author of a joint paper. Additional offprints may be purchased.

	Page
Uniform and strong ergodic theorems in Banach spaces By TAKESHI YOSHIMOTO.....	525
Markov-type inequalities for constrained polynomials with complex coefficients By TAMÁS ERDÉLYI.....	544
Interpolation of Herz-type Hardy spaces By EUGENIO HERNÁNDEZ and DACHUN YANG.....	564
On the strong type multiplier norms of rational functions in several variables By MICHAŁ WOJCIECHOWSKI.....	582
Discrepancy norms on the space $M[0, 1]$ of Radon measures By MINOS A. PETRAKIS.....	601
On the sequences that are good in the mean for positive L_p -contractions, $1 \leq p \leq \infty$ By DOĞAN ÇÖMEZ and SEBASTIAN FERRANDO.....	617
Solutions to the quantum Yang-Baxter equation having certain bial- gebras as their reduced FRT construction By LARRY LAMBE and DAVID E. RADFORD.....	630
Squares of characters that are the sum of all irreducible characters By S. M. GAGOLA, JR. and M. L. LEWIS.....	655
Addendum to our paper "Conformal motion of contact manifolds with characteristic vector field in the k -nullity distribution" By RAMESH SHARMA.....	673
Differential Galois theory I By ANAND PILLAY.....	678
