Submitting manuscripts

Original research papers in pure and applied mathematics intended for publication in this journal may be written in English, French or German. The submission of a paper implies the author's assurance that it has not been published or submitted for publication elsewhere.

Submit two copies of your manuscript, double spaced, to the Illinois Journal of Mathematics, 1409 West Green St., University of Illinois, Urbana, Illinois 61801 (ijm@math.uiuc.edu) or directly to one of the editors listed on the inside front cover.

Include your e-mail address with your covering letter.

Sending electronic files

Once your paper is accepted you will be given instructions for sending your electronic file, to be used in the typesetting process. But do not send any electronic files until then. We prefer a version of TEX but can use any electronic files, including ChiWriter, T^3, WordPerfect and Microsoft Word.

Proof

Authors will receive only galley proof. Proof sent to North American addresses will be accompanied by manuscript and sent by first class mail. To other addresses, proof will be sent by airmail, and manuscript will be sent only if requested. Authors are asked to return proof (and manuscript if sent) by the same class of mail that was used in sending it to them.

Page charges

To cover a part of the cost of production, the author's institution will be billed for $40 per page.

Offprints

One hundred offprints are supplied to the sole author of a paper; fifty free offprints are supplied to each author of a joint paper. Additional offprints may be purchased.

Page

Sharp upper bounds for the Betti numbers of Cohen-Macaulay modules
By JUAN ELIAS 505

Vector-valued analytic functions of bounded mean oscillation and geometry of Banach spaces
By OSCAR BLASCO 532

A Gaussian average property of Banach spaces
By P.G. CASAZZA and N.J. NIELSEN 559

Abel summability of the autoregressive series for the best linear least squares predictors
By M.L HUANG, R.A. KERMAN and Y. WEIT 577

Affine surfaces fibered by affine lines over the projective line
By DAVID WRIGHT 589

Codimension 2 subschemes of projective spaces with stable restricted tangent bundle and liason classes
By E. BALLICO 606

Extremal properties of Hilbert functions
By VESSELIN GASHAROV 612

A generalized Littlewood theorem for Weinstein potentials on a halfspace
By KOHUR GOWRISANKARAN and DAVID SINGMAN 630

Characterizing Hilbert space frames with the subframe property
By PETER G. CASAZZA 648

On the zeros of polynomials with restricted coefficients
By PETER BORWEIN and TAMÁS ERDÉLYI 667

Boundedness of commutators of fractional and singular integrals for the extreme values of p
By ELEONOR HARBOURE, CARLOS SEGOVIA and JOSÉ L. TORREA 676

Published by the University of Illinois Press on behalf of the Department of Mathematics of the University of Illinois in Spring, Summer, Fall, and Winter. Supported in part by the George A. Miller Endowment.
