H. Bustos and M. Măntoiu , Twisted pseudo-differential operator on type I locally compact groups	365
Fanghui Liao, Yanchang Han and Zongguang Liu , New characterizations of Besov and Triebel–Lizorkin spaces via the $T1$ theorem	391
Andrey M. Mishchenko , Fixed-point index, the Incompatibility Theorem, and torus parametrization	413
Jesús A. Álvarez López and Robert Wolak , Growth of some transversely homogeneous foliations	447
Xiaojun Cui , Viscosity solutions, ends and ideal boundaries	459
Chenmin Sun and Bo Xia , Probabilistic well-posedness for supercritical wave equations with periodic boundary condition on dimension three	481
Mahmood Alaghmandan and Nico Spronk , Amenability properties of the central Fourier algebra of a compact group	505
A. Barros and I. Evangelista , Some results on compact almost Ricci solitons with null Cotton tensor	529
Robert M. Walker , Rational singularities and uniform symbolic topologies ...	541
Barry Booton , Alternate characterizations of bounded variation and of general monotonicity for functions	551
Mehmet Çelik and Yunus E. Zeytuncu , Obstructions for compactness of Hankel operators: Compactness multipliers	563
Yulin Song and Tiange Xu , Exponential convergence for some SPDEs with Lévy noises	587
Gregory Debruyne and Jasson Vindas , Generalization of the Wiener–Ikehara theorem	613
