

# INFORMATION FOR AUTHORS

## Manuscripts

Manuscripts for publication should be sent to Ms. Linda Kitch, Department of Mathematics, Harvard University, Cambridge, Massachusetts, 02138, U.S.A. A separate cover letter should note if the paper is available as an electronic manuscript, and if so, in which format. Please provide your e-mail address if available.

Manuscripts should be written in English, French, German, or Italian, and should be typewritten, double spaced, with generous margins. Diagrams should be drawn with black India ink on glossy white paper.

To eliminate unnecessary delay or difficulties in printing, authors may be guided by the article *Manual for authors of mathematical papers*, Bull. Amer. Math. Soc. **68** (1962), 429–444.

Footnotes, except a possible acknowledgement of assistance or financial support on the first page, should be avoided by being incorporated into the text, perhaps parenthetically.

The list of references must be in alphabetical-chronological order; abbreviations of names of journals and references to books should follow the standard form established by Mathematical Reviews. The following references are two typical examples:

- [1] E. Cartan, *La géométrie des groupes de transformations*, J. Math. Pures Appl. **6** (1927) 1–119.
- [2] O. Veblen & J. H. C. Whitehead, *The foundations of differential geometry*, Cambridge Tracts No. 29, Cambridge University Press, Cambridge, 1932.

## Proofs

Authors receive only one set of proofs for corrections and will be responsible for the expense of making excessive alterations of the original manuscripts during the proofreading.

## Offprints

One hundred offprints are supplied free for each article. In the case of multiple authors, the 100 free offprints will be divided equally among the authors. Additional offprints may be purchased at a reasonable cost.

## Electronically Prepared Manuscripts

The Editors of the *Journal of Differential Geometry* encourage submission of electronically prepared manuscripts in  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$  because properly prepared electronic manuscripts save the author proofreading time and move more quickly through the production process.

Electronic manuscripts may be requested (if available) after a paper has been submitted.
