CONTENTS

Error bound for integral equations on the half line By P.M. ANSELONE AND C.T.H. BAKER	321
A discrete Galerkin method for first kind integral equations with a logarithmic kernel By KENDALL E. ATKINSON	343
An integral equation method for the time-harmonic maxwell equations with boundary conditions for the normal components By V. GÜLZOW	365
Uniform L^1 behavior in classes of integro-differential equations with convex kernels By RICHARD NOREN	385
Exponential stabilization of volterra integral equations with singular kernels By WOLFGANG DESCH AND RICHARD K. MILLER	397
Hölder estimates for the cauchy integral on a Lipschitz contour By WILLIAM MCLEAN	435
